Definition of Terms

Annualised Volatility is a measure of how variable returns for a fund or comparative market index have been around their historical average. Two funds may produce the same return over a period. The fund whose monthly returns have varied less will have a lower annualised volatility and will be considered to have achieved its returns with less risk.

Beta is a measure of a fund's sensitivity to market movement (as represented by a market index). The beta of the market is 1.00 by definition. A beta of 1.10 shows that the fund could be expected to perform 10% better than the index in up markets and 10% worse in down markets, assuming all other factors remain constant. Conversely, a beta of 0.85 indicates that the fund could be expected to perform 15% worse than the market return during up markets and 15% better during down markets.

Sharpe Ratio is a measure of a fund's risk adjusted performance taking into account the return on a risk-free investment. The ratio allows an investor to assess whether the fund is generating adequate returns for the level of risk it is taking. The higher the ratio, the better the risk-adjusted performance has been. If the ratio is negative, the fund has returned less than the risk-free rate.

Active Money is the sum of the fund's overweight positions (including effective cash) when compared to the market index.

A position combines all equity investments (including derivatives) linked to an issuing company. Derivatives are included on an exposure basis so they reflect the equivalent underlying shares needed to generate the same return. Geographic and sector breakdown tables are calculated using the positions methodology.

The CPF interest rate for the Ordinary Account (OA) is based on the 12-month fixed deposit and month-end savings rates of the major local banks. Under the CPF Act, the Board pays a minimum interest of 2.5% per annum when this interest formula yields a lower rate. The CPF Board pays an extra interest rate of 1% per annum on the first \$60,000 of a CPF member's combined balances, including up to \$20,000 in the OA. The first \$20,000 in the OA will not be allowed to be invested under the CPF Investment Scheme. FIL Investment Management (Singapore) Limited [FIMSL] (Co. Reg. No.: 199006300E) is a responsible entity for the fund in Singapore. Prospectus of the fund is available from FIMSL or its distributors upon request.
