Fund objectives and investment policy

The Fund aims to provide capital growth by investing in equity and equity related securities of Central and Eastern European companies.

Above is the Investment Objective of the fund. For details on the full fund's Investment Policy please see the KIID.

Special information

Due to the unprecedented geo-political situation caused by Russia's invasion of Ukraine and the resultant impact of sanctions and actions of governments and market counterparties on certain Russian issuers and assets, the calculation of the net asset value (NAV) and the issue and redemption of all share classes in the fund was suspended with effect from 25 February 2022 to 18 July 2022. Russian equities and equity related securities held by the fund as of 25 February 2022 were allocated on 18 July 2022 to two newly created share classes (X9 and Y9) within the fund. Shares in these new classes were issued on the same day to each shareholder in the fund on the basis of their percentage holding in the Fund on 25 February 2022. Following that allocation, the fund (through its share classes other than the two newly created classes) has no more exposure to Russian equities and equity related securities and will not make any further investments in Russian securities until further notice. This is consistent with the fund's target benchmark from which all Russian equities have been removed since 9 March 2022.

This fund does not have the objective of sustainable investment or binding environmental or social characteristics as defined by Regulation (EU) 2019/2088 on Sustainability-related Disclosures in the Financial Services Sector (the "SFDR"). Any references to the integration of sustainability considerations are made in relation to the processes of the investment manager or the Schroders Group and are not specific to the fund.

Relevant risks associated with an investment in this fund are shown below and should be carefully considered before making any investment.

Past Performance is not a guide to future performance and may not be repeated. The value of investments and the income from them may go down as well as up and investors may not get back the amounts originally invested. Exchange rate changes may cause the value of any overseas investments to rise or fall. Please note the Special Information section included above when reviewing the past performance of the fund.

10 year return of EUR 10,000

The fund was suspended from 25 February 2022 to 18 July 2022. Russia was removed from the target benchmark with effect from 9 March 2022. Please refer to the Special information section above. The chart is for illustrative purposes only and does not reflect an actual return on any investment.

Returns are calculated bid to bid (which means performance does not include the effect of any initial charges), net income reinvested, net of fees.

Risk considerations

Liquidity risk: In difficult market conditions, the fund may not be able to sell a security for full value or at all. This could affect performance and could cause the fund to defer or suspend redemptions of its shares. **Concentration risk:** The fund may be concentrated in a limited number of geographical regions, industry sectors, markets and/or individual positions. This may result in large changes in the value of the fund, both up or down.

Counterparty risk: The fund may have contractual agreements with counterparties. If a counterparty is unable to fulfil their obligations, the sum that they owe to the fund may be lost in part or in whole.

Currency risk: The fund may lose value as a result of movements in foreign exchange rates, otherwise known as currency rates.

Derivatives risk: Derivatives, which are financial instruments deriving their value from an underlying asset, may be used to manage the portfolio efficiently. The fund may also materially invest in derivatives including using short selling and leverage techniques with the aim of making a return. A derivative may not perform as expected, may create losses greater than the cost of the derivative and may result in losses to the fund.

Emerging markets & frontier risk: Emerging markets, and especially frontier markets, generally carry greater political, legal, counterparty, operational and liquidity risk than developed markets.

Liquidity risk: In difficult market conditions, the fund may not be able to sell a security for full value or at all. This could affect performance and could cause the fund to defer or suspend redemptions of its shares, meaning investors may not be able to have immediate access to their holdings.

Market risk: The value of investments can go up and down and an investor may not get back the amount initially invested.

Operational risk: Operational processes, including those related to the safekeeping of assets, may fail. This may result in losses to the fund.

Performance risk: Investment objectives express an intended result but there is no guarantee that such a result will be achieved. Depending on market conditions and the macro economic environment, investment objectives may become more difficult to achieve.

*Please refer to the Special information section above.

Synthetic risk & reward indicator (SRII)

The risk category was calculated using historical performance data (or indicative fund performance during periods of suspension) and may not be a reliable indicator of the fund's future risk profile. The fund's risk category is not guaranteed to remain fixed. Please see the Key Investor Information Document for more information.

Information relating to changes in fund manager, investment objective, benchmark and corporate action information

Please refer to the Special information section above.

Please note Russia was removed from the target benchmark with effect from 9 March 2022.

On 21/09/2023 the fund's target benchmark, MSCI Emerging Markets Europe 10/40 (Net TR), was removed. The fund performance should be compared against its comparator benchmark, MSCI EFM Europe + CIS (E+C) Index (Net TR).

Benchmarks: (If applicable)

Some performance differences between the fund and the benchmark may arise because the fund performance is calculated at a different valuation point from the benchmark. The fund is not managed with reference to a benchmark. The comparator benchmark has been selected because the investment manager believes that the benchmark is a suitable comparison for performance purposes given the fund's investment objective and policy.
