What is this product?

Type: Mutual Fund

Duration: The fund has no maturity date or duration.

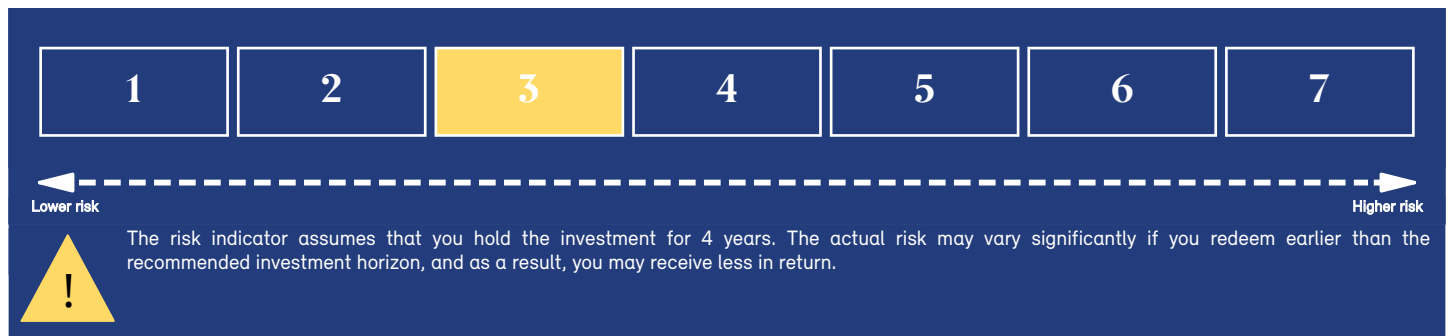

Objective: The fund's objective is to achieve the highest possible return by investing in equity and bond funds managed by Fondsfinans Kapitalforvaltning, as well as directly in securities. The fund's capital will typically be invested between 55% and 65% in stocks and equity funds both in Norway and globally, and between 35% and 45% in bond funds, interest-bearing securities, and bank deposits. The fixed income exposure will primarily be towards Nordic corporate bonds with good diversification in credit quality, sectors, and maturity. Interest rate risk will normally be low. The fund will actively rebalance within the described framework. The fund's performance depends on whether the assets it invests in increase or decrease in value. The fund is actively managed, meaning investments are chosen based on the manager's own assessments, based on

thorough analysis. The fund does not have a benchmark index. Dividends received by the fund from underlying stocks are reinvested in the fund. Subscriptions and redemptions can normally occur on all business days provided that the fund's main market is open for trading.

Target Audience: The fund may be suitable for those who want to save for the long term for at least 4 years and understand that their investment may vary significantly in value, and that they may risk losing money on the investment. Investing in this security fund does not require special knowledge or experience with mutual funds or the securities market.

Other: The fund's custodian is Danske Bank. More information about the fund, including the prospectus, investment strategy, semi-annual reports, and the latest NAV, can be obtained free of charge at www.fondsfinans.no.

What are the risks and what could I get in return?

The risk indicator provides an indication of the overall risk level of this mutual fund compared to other investment products. The indicator indicates how likely it is that you may lose money on your investment due to market developments. This product has no protection against unfavorable future market developments, and you may lose money on your investment.

Your returns from this product depends on future market developments. Future market developments are uncertain and cannot be predicted with certainty. The unfavorable, moderate, and favorable scenarios displayed are illustrations of possible future returns based on the worst, average, and best performance of the fund over the past 10 years. The scenarios in the table are representations based on the product's historical performance and certain assumptions. Markets may evolve very differently in the future.

The amounts shown are net of all costs related to the product itself but may not necessarily be net of all costs you pay to your advisor or distributor. The amounts do not take into account your personal tax situation, which may impact how much you ultimately receive after taxes. What you will receive from this product depends on future market developments. Future market developments are uncertain and cannot be predicted with certainty.

What happens if Fondsinans Kapitalforvaltning AS is unable to pay out?

The fund's assets are not held by the management company. In accordance with legal requirements, the fund's assets are held by a separate custodian appointed by the management company. If the fund management company enters bankruptcy proceedings, the management of the fund will be transferred to another management company. There is no compensation or guarantee scheme for fund investments.

What are the costs?

The advisor or distributor selling you this fund may impose additional charges beyond those disclosed here. In such cases, the advisor or distributor should provide you with information about these costs and how they affect your investment.

The table displays the amounts deducted from your investment to cover various expenses. These amounts depend on how much you invest, how long you stay invested, and how well the mutual fund performs. The amounts shown here are illustrations based on an example investment in the mutual fund at different investment periods. In the example, we have assumed:

- If you redeem within the first year, you will receive back what you have invested (0% annual return). For other investment periods, we have assumed that the mutual fund performs in line with the moderate scenario.
- 100,000 Norwegian kroner are invested.
