## What is this product?

**Type:** Mutual Fund

**Duration:** The mutual fund has no maturity date or duration.

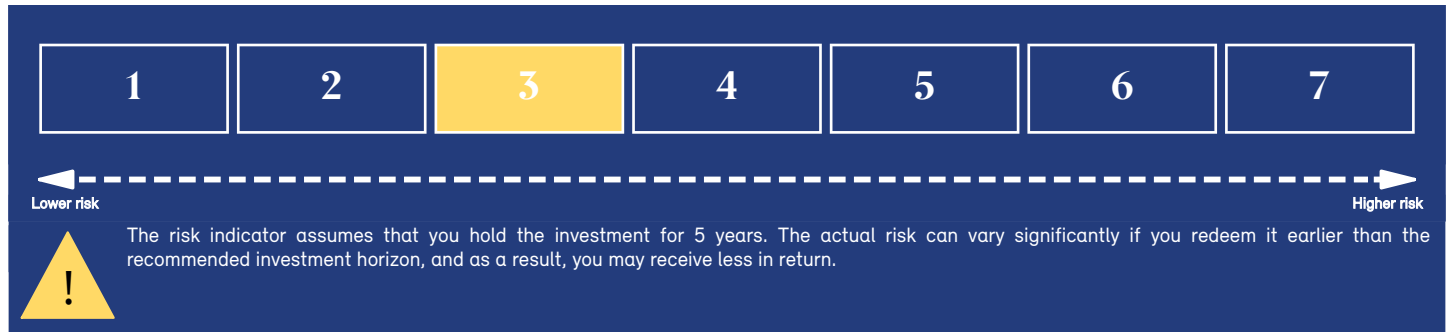

**Objective:** The fund's objective is to achieve the highest possible return beyond the fund's benchmark index through investments in Norwegian companies. The mutual fund seeks good diversification across various sectors. The fund will preferably invest in quality companies with high capital returns, a solid balance sheet, and long-term potential for dividend payments (as assessed by the manager). The performance of the mutual fund depends on whether the stocks it invests in increase or decrease in value. The mutual fund is actively managed, meaning that stock selections are made based on the manager's own assessments, supported by thorough analyses of the companies. The mutual fund will always allocate at least 80% of its assets to listed stocks and can allocate up to 10% to unlisted stocks. The fund's benchmark index is the Oslo Børs Fund Index. The composition of the fund's stocks will typically deviate

significantly from the benchmark index. Dividends received from underlying stocks are reinvested in the fund. Subscriptions and redemptions can occur on regular business days, provided that the fund's primary market is open for trading. **T**

**Target Audience:** The fund may be suitable for those looking to save for the long term, at least 5 years, and who understand that their investment may vary significantly in value, with a risk of losing money on the investment. Investing in this mutual fund does not require specific knowledge of or experience with mutual funds or the securities market.

**Other:** The fund's depositary is Danske Bank. Further information about the fund, including the prospectus, investment strategy, semi-annual reports, and the latest net asset value, can be obtained free of charge at [www.fondsfinans.no](http://www.fondsfinans.no).

## What are the risks and what could I get in return?

The risk indicator provides the overall risk level of this investment fund compared to other investment products. The indicator indicates how likely it is that you may lose money on the investment due to market developments. This product has no protection against unfavorable future market developments, and you may incur losses on your investment.

Your returns from this product depends on future market developments. Future market developments are uncertain and cannot be predicted with certainty. The unfavorable, moderate, and favorable scenarios displayed are illustrations of possible future returns based on the worst, average, and best performance of the fund over the past 10 years. The scenarios in the table are representations based on the product's historical performance and certain assumptions. Markets may evolve very differently in the future.

The amounts shown are net of all costs related to the product itself but may not necessarily be net of all costs you pay to your advisor or distributor. The amounts do not take into account your personal tax situation, which may impact how much you ultimately receive after taxes. What you will receive from this product depends on future market developments. Future market developments are uncertain and cannot be predicted with certainty.

## What happens if Fondsinans Kapitalforvaltning AS is unable to pay out?

The fund's assets are not held by the management company. In accordance with legal requirements, the fund's assets are held by a separate custodian appointed by the management company. If the fund management company enters bankruptcy proceedings, the management of the fund will be transferred to another management company. There is no compensation or guarantee scheme for fund investments.

## What are the costs?

The advisor or distributor selling you this fund may impose additional charges beyond those disclosed here. In such cases, the advisor or distributor should provide you with information about these costs and how they affect your investment.

The table displays the amounts deducted from your investment to cover various expenses. These amounts depend on how much you invest, how long you stay invested, and how well the mutual fund performs. The amounts shown here are illustrations based on an example investment in the mutual fund at different investment periods. In the example, we have assumed:

- If you redeem within the first year, you will receive back what you have invested (0% annual return). For other investment periods, we have assumed that the mutual fund performs in line with the moderate scenario.
- 100,000 Norwegian kroner are invested.

	If you exit after 1 year	If you exit after 5 years
Total costs	kr6015	kr12774
Annual cost impact (*)	6.0%	2.2% each year

(\*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 17.5% before costs and 15.3% after costs.
