Report of the Board of Directors

2024 will be remembered as an overall positive year for most asset classes, this despite some volatility spikes and sharp market movements fuelled by macroeconomic and monetary policy uncertainties and announcements, along with rising geopolitical risk.

The best asset class was, for the second year in a row, the Global Equity Markets. Sector wise, Information Technology, Communication Services and Financials were the best performing sectors, while Materials, Real Estate and Healthcare lagged the most. The equity rally performance was followed by high beta credit assets and to a lesser extent higher duration and safer fixed income sub-asset classes. Looking at bonds, high quality government bonds (for example American) underperformed mostly due to mid-to-long end yields moving higher across the Atlantic. All in all, they offered returns from slightly positive (short end of the curve) to slightly negative (in the long end), which meant 2024 was another year where low risk/volatility assets significantly underperformed higher risk assets. An anomaly that has inverted the efficient frontier in recent years.

As we progress into 2025, the global investment landscape presents a complex tapestry of challenges as well as opportunities. Several key factors are shaping the financial markets. Policy evolution continues as regulatory frameworks and monetary policies adapt, creating a fluid environment for market participants. Shifting market structures, driven by technology and changing consumer behaviour, are altering the fundamental makeup of various sectors. These elements, among others, will be pivotal in shaping investment decisions. Global markets are awaiting the next moves from the Trump administration in the US, particularly regarding tariffs. Consequently, the emphasis on portfolio diversification remains pronounced.

With regards to Nordea 2, SICAV, N2 or the Company, Assets under Management, AuM, had a very positive development in 2024 going from EUR 14.8 billion end of 2023 to EUR 25.5 billion end of 2024. Also the total amount of net flows into N2 increased from EUR 577 million end of 2023 to an impressive EUR 7.9 billion end of 2024.

The N2 asset base is allocated across 23 sub-funds, same as at the end of 2023, led also this year by the Global Responsible Enhanced Equity Fund with EUR 8.5 billion in AuM. The Global Developed Responsible Enhanced Equity Fund is the second largest sub-fund with EUR 5.2 billion in AuM end of 2024. The diversity of the product range, building on the Company's strong position in the field of ESG as well as on other product areas, shows that competitive solutions can be provided to our shareholders.

At the Annual General Meeting of Shareholders, the Board of Directors will propose that, for the financial year 2024, Nordea 2, SICAV pays the following dividends:

Sub-fund name	Share class	Currency (*)	Amount per share
Nordea 2 - Emerging Markets Enhanced Equity Fund	AF	USD	3.741
Nordea 2 - Emerging Markets Responsible Enhanced Equity Fund	AF	USD	0.3154
Nordea 2 - Emerging Markets Responsible Enhanced Equity Fund	HAF - SEK	USD	1.3393
Nordea 2 - Euro Corporate Enhanced Bond Fund	HAF - SEK	EUR	2.1579
Nordea 2 - European Cross Credit ESG Fund	HAI - SEK	EUR	4.1345
Nordea 2 - Global Enhanced Equity Fund	AF	USD	3.7635
Nordea 2 - Global High Yield Enhanced Bond Fund - USD Hedged	HAF - SEK	USD	4.896
Nordea 2 - Japanese Responsible Enhanced Equity Fund	JI	JPY	361.7545
Nordea 2 - LCR Optimised Danish Covered Bond Fund - EUR Hedged	AI	EUR	1.9559
Nordea 2 - North American Responsible Enhanced Equity Fund	JI	USD	5.4378
Nordea 2 - Swedish Responsible Enhanced Equity Fund	AF	SEK	6.0579
Nordea 2 - US Corporate Enhanced Bond Fund	HAF - SEK	USD	3.8443

(*) These dividend amounts are expressed in base currency of the relevant Sub-fund and will be converted into the currency of the relevant Share class at ex-date.

The Board of Directors of Nordea 2, SICAV would like to thank all stakeholders involved in the running of the Company for their contribution in 2024 and is looking forward to continuing to support the shareholders also in 2025.

Claude Kremer, Chairman

The information stated in the report is historical and is not representative of future results.

Corporate Governance Statement

Introduction

Nordea 2, SICAV (hereafter the “Company”) has been authorised by the Commission de Surveillance du Secteur Financier (the “CSSF”) as an undertaking for collective investment in transferable securities (“UCITS”). The Company complies with the principles of good governance set out in the Association of the Luxembourg Fund Industry (“ALFI”) Code of Conduct Revision 2022 issued by ALFI in June 2022. The board of directors of the Company (the “Board of Directors”) is committed to maintaining the highest standards of corporate governance and is accountable to shareholders for the governance of the Company’s affairs. This statement summarises the corporate governance structure and processes in place for the Company for the period under review.

Board of Directors Composition

The Board of Directors currently consists of three Directors, (including one independent Director). The Board of Directors is committed to maintaining an appropriate balance of skills, experience, independence and knowledge amongst its members. The Company’s Articles (the “Articles”), in accordance with Luxembourg law, provides that Directors shall be elected by the shareholders at their annual general meeting and they are subject to the approval of the CSSF. Directors serve until their term ends, they resign, or their mandate is revoked, in accordance with the Company’s Articles.

Members of the Board of Directors shall start an induction program, if required by the Board of Directors, as soon as practicable after the appointment. Each respective Board of Directors shall self-evaluate its work every second year with the aim of developing its working methods and efficiency.

Board of Directors Responsibilities

The Board of Directors meets at least quarterly and also on an ad hoc basis as required. The Board of Directors is supplied with information in a timely manner.

The Board of Directors is responsible for the overall investment policy, objectives and management of the Company and, as described more fully in the Articles, has broad powers to act on behalf of the Company, including:

- appointing and supervising the management company;
- setting investment policy and approving the appointment of any investment manager or sub- investment manager;
- making all determinations regarding the launch, modification, merger or discontinuation of the Company and share classes, including such matters as timing, pricing, fees, base currency, dividend policy and payment of dividends, liquidation of the Company, and other conditions;
- determining eligibility requirements and ownership restrictions for investors or share class, and what steps may be taken in the case of any violation;
- determining the availability of any share class to any investor or distributor or in any jurisdiction;
- determining when and how the Company will exercise its rights and will distribute or publicise shareholder communications;
- ensuring that the appointments of the management company and the depositary bank are consistent with the 2010 Law and any applicable contracts of the Company;
- determining whether to list any shares on the Luxembourg stock exchange.

The Board of Directors may delegate some of these responsibilities to the management company.

Board of Directors Remuneration

The Company shall pay an aggregate remuneration to the independent Director amounting to EUR 30,000 gross per annum, excluding Luxembourg VAT, if any, subject to shareholder approval in the Annual General Meeting and is included within the caption “Approval of Directors’ fees”. Nordea representative do not receive any compensation for their directorship.

Audit Report

To the Shareholders of
Nordea 2, SICAV

Our opinion

In our opinion, the accompanying financial statements give a true and fair view of the financial position of Nordea 2, SICAV (the “Fund”) and of each of its sub-funds as at 31 December 2024, and of the results of their operations and changes in their net assets for the year then ended in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements.

What we have audited

The Fund’s financial statements comprise:

- the statement of net assets as at 31 December 2024;
- the statement of operations and changes in net assets for the year then ended;
- the statement of investments in securities and other net assets as at 31 December 2024;
- the statement of derivative instruments as at 31 December 2024; and
- the notes to the financial statements, which include a summary of significant accounting policies.

Basis for opinion

We conducted our audit in accordance with the Law of 23 July 2016 on the audit profession (Law of 23 July 2016) and with International Standards on Auditing (ISAs) as adopted for Luxembourg by the “Commission de Surveillance du Secteur Financier” (CSSF). Our responsibilities under the Law of 23 July 2016 and ISAs as adopted for Luxembourg by the CSSF are further described in the “Responsibilities of the “Réviseur d’entreprises agréé” for the audit of the financial statements” section of our report.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

We are independent of the Fund in accordance with the International Code of Ethics for Professional Accountants, including International Independence Standards, issued by the International Ethics Standards Board for Accountants (IESBA Code) as adopted for Luxembourg by the CSSF together with the ethical requirements that are relevant to our audit of the financial statements. We have fulfilled our other ethical responsibilities under those ethical requirements.

Other information

The Board of Directors of the Fund is responsible for the other information. The other information comprises the information stated in the annual report but does not include the financial statements and our audit report thereon.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information identified above and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of the Board of Directors of the Fund for the financial statements

The Board of Directors of the Fund is responsible for the preparation and fair presentation of the financial statements in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements, and for such internal control as the Board of Directors of the Fund determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the Board of Directors of the Fund is responsible for assessing the Fund's and each of its sub-funds' ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Board of Directors of the Fund either intends to liquidate the Fund or close any of its sub-funds or to cease operations, or has no realistic alternative but to do so.

Responsibilities of the "Réviseur d'entreprises agréé" for the audit of the financial statements

The objectives of our audit are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an audit report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with the Law of 23 July 2016 and with ISAs as adopted for Luxembourg by the CSSF will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with the Law of 23 July 2016 and with ISAs as adopted for Luxembourg by the CSSF, we exercise professional judgment and maintain professional scepticism throughout the audit. We also:

- identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control;
- obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Fund's internal control;
- evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the Board of Directors of the Fund;

- conclude on the appropriateness of the Board of Directors of the Fund's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Fund's or any of its sub-funds' ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our audit report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our audit report. However, future events or conditions may cause the Fund or any of its sub-funds to cease to continue as a going concern;
- evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Notes to the Financial Statements as of 31/12/2024

Note 1 - General

Nordea 2, SICAV (hereafter the "Company") is organized as a variable capital company, Société d'Investissement à Capital Variable (SICAV) with multiple compartments (each compartment being herein after referred to as a "Sub-fund", and defined as "fund" in the prospectus) under the law of 10 August 1915 relating to commercial companies as amended and part I of the law of 17 December 2010 on undertakings for collective investment (UCI) as amended (the "Law"). The board of directors of the Company (the "Board of Directors") appointed Nordea Investment Funds S.A. as its management company (the "Management Company"). The Management Company is in charge of the portfolio management, the administration and the distribution of the Company. J.P. Morgan SE, Luxembourg Branch has been appointed as depositary of the Company (the "Depositary"). The Management Company complies with the principles of good governance set out in the Association of the Luxembourg Fund Industry ("ALFI") Code of Conduct Revision 2022 issued by ALFI in June 2022.

At the end of the reporting year, the Company consists of the following launched Sub-funds:

Name of Sub-fund	Base Currency	Inception Date
Nordea 2 - Emerging Market Hard Currency Enhanced Bond Fund	USD	10/09/2019
Nordea 2 - Emerging Markets Enhanced Equity Fund	USD	17/08/2016
Nordea 2 - Emerging Markets Responsible Enhanced Equity Fund	USD	17/11/2020
Nordea 2 - Euro Corporate Enhanced Bond Fund	EUR	04/09/2019
Nordea 2 - European Cross Credit ESG Fund	EUR	15/04/2020
Nordea 2 - European Enhanced Equity Fund	EUR	30/08/2017
Nordea 2 - European Responsible Enhanced Equity Fund	EUR	29/09/2020
Nordea 2 - Global Asset Allocation Target Date Fund 1	EUR	29/11/2017
Nordea 2 - Global Developed Responsible Enhanced Equity Fund (Note 1a)	USD	13/06/2024
Nordea 2 - Global Enhanced Equity Fund	USD	13/06/2016
Nordea 2 - Global Enhanced Small Cap Fund	USD	20/06/2016

Nordea 2 - Swedish Responsible Enhanced Equity Fund	SEK	04/10/2016
Nordea 2 - Technology Enhanced Equity Fund (Note 1a)	USD	12/11/2024
Nordea 2 - US Corporate Enhanced Bond Fund	USD	30/11/2016
Nordea 2 - VAG Optimised Stable Return Fund	EUR	26/02/2019

a) Sub-fund launches

The Board of Directors of the Company took the decision to launch the following Sub-fund:

Name of Sub-fund	1st NAV date
Nordea 2 - Global Developed Responsible Enhanced Equity Fund	14/06/2024
Nordea 2 - Technology Enhanced Equity Fund	13/11/2024

b) Sub-funds liquidations

The following Sub-funds have been liquidated during the year:

Name of Sub-fund	Effective date
Nordea 2 - Balanced Growth Target Date Fund	11/03/2024
Nordea 2 - Emerging Market Local Debt Enhanced Fund*	22/05/2024

(*) As at year-end, a balance of EUR 80,800.80 remains blocked on a special cash account, under OFAC (Office of Foreign Assets Control) sanctions, held with the custodian JP Morgan. This amount is a forced conversion in EUR of a tax refund related to a Russian bond. Since frozen, the cash could not be distributed to the shareholders, at liquidation date. The management company is monitoring the situation and will distribute the cash to the shareholders present at liquidation date, as soon as the sanctions are lifted and the account is unblocked.

Notes to the Financial Statements as of 31/12/2024 (continued)

Note 2 - Summary of significant accounting policies

The financial statements are prepared in accordance with Luxembourg legal and regulatory requirements relating to investment funds under the going concern basis of accounting except for the Sub-fund merged as listed in the Note 15 - Subsequent events for which the financial statements have been prepared on a non-going concern basis. The application of the non-going concern basis of accounting has not led to material adjustments to the Sub-funds' published net asset values.

a) Valuation of assets

Assets are valued as follows:

1. The value of any cash on hand or on deposit, bills or notes payable, accounts receivable, prepaid expenses, cash dividends and interest accrued but not yet received shall be equal to the entire nominal or face amount thereof, unless the same is unlikely to be paid or received in full, in which case the value thereof shall be determined after making such discount as the Board of Directors may consider appropriate in such case to reflect the true or fair value thereof.
2. Transferable Securities and Money Market Instruments which are quoted, listed or traded on an exchange or regulated market will be valued, unless otherwise provided under paragraphs (3) and (6) below, at the last available market price or quotation, prior to the time of valuation, on the exchange or regulated market where the securities or instruments are primarily quoted, listed or traded. Where securities or instruments are quoted, listed or traded on more than one exchange or regulated market, the Board of Directors will determine on which exchange or regulated market the securities or instruments are primarily quoted, listed or traded and the market prices or quotations on such exchange or regulated market will be used for the purpose of their valuation. Transferable Securities and Money Market Instruments for which market prices or quotations are not available or representative, or which are not quoted, listed or traded on an exchange or regulated market, will be valued at their probable realisation value estimated with care and in good faith by the Board of Directors using any valuation method approved by the Board of Directors.
3. Where permitted under applicable laws and regulations, Money Market Instruments may be valued using an amortisation method whereby instruments are valued at their acquisition cost as adjusted for amortisation of premium or accrual of discount on a constant basis until maturity, regardless of the impact of fluctuating interest rates on the market value of the instruments. The amortisation method will only be used if it is not expected to result in a material discrepancy between the market value of the instruments and their value calculated according to the amortisation method.
4. Financial Derivative Instruments which are quoted, listed or traded on an exchange or regulated market will be valued at the last available closing or settlement price or quotation, prior to the time of valuation, on the exchange or regulated market where the instruments are primarily quoted, listed or traded. Where instruments are quoted, listed or traded on more than one exchange or regulated market, the Board of Directors will determine on which exchange or regulated market the instruments are primarily quoted, listed or traded and the closing or settlement prices or quotations on such exchange or regulated market will be used for the purpose of their valuation. Financial Derivative Instruments for which closing or settlement prices or quotations are not available or representative will be valued at their probable realisation value estimated with care and in good faith by the Board of Directors using any valuation method approved by the Board of Directors.
5. Financial Derivative Instruments which are traded 'over-the-counter' (OTC) will be valued daily at their fair market value, on the basis of valuations provided by the counterparty which will be approved or verified on a regular basis independently from the counterparty. Alternatively, OTC Financial Derivative Instruments may be valued on the basis of independent pricing services or valuation models approved by the Board of Directors which follow international best practice and valuation principles. Any such valuation will be reconciled to the counterparty valuation on a regular basis independently from the counterparty, and significant differences will be promptly investigated and explained.
6. Notwithstanding paragraph (2) above, shares or units in target investment funds (including, UCITS and UCI) will be valued at their latest available official net asset value, as reported or provided by or on behalf of the investment fund or at their latest available unofficial or estimated net asset value, provided that the Board of Directors is satisfied of the reliability of such unofficial or estimated net asset value. Alternatively, shares or units in target investment funds which are quoted, listed or traded on an exchange or regulated market may be valued in accordance with the provisions of paragraph (2) above.
7. The value of any other asset not specifically referenced above will be the probable realisation value estimated with care and in good faith by the Board of Directors using any valuation method approved by the Board of Directors.

b) Net realised gain or loss on sales of investment securities

The net realised gain or loss on sales of securities is determined on the basis of the average cost of the securities sold.

c) Foreign exchange translation

The financial statements of each Sub-fund of the Company are expressed in the base currency of each Sub-fund. Assets and liabilities in currencies other than the base currency are translated into the base currency at the exchange rates prevailing at year-end. Income and expenses in currencies other than the base currency are translated into the base currency at the exchange rates prevailing at payment dates. Resulting foreign exchange gains or losses are included in the Statement of Operations and Changes in Net Assets.

The principal exchange rates used at the end of the year were:

1 EUR = 7.457804 DKK	1 EUR = 11.785969 NOK	1 EUR = 11.454988 SEK
1 EUR = 163.0480313 JPY	1 EUR = 1.039350 USD	

d) Cost of investment securities

The cost of investment securities denominated in currencies other than the Sub-fund's base currency is translated into the base currency at the exchange rate prevailing at the date of purchase.

e) Dividends and interest

Dividends are recorded net of withholding taxes. They are recognized as income on the date securities are first quoted ex-dividend, to the extent that information thereon is reasonably available to the Sub-fund. Interest on bonds is accrued on a daily basis.

Notes to the Financial Statements as of 31/12/2024 (continued)

f) Financial futures contracts

The Company is authorised to buy and sell financial futures contracts. Upon entering into a contract the Company deposits and maintains cash as collateral with the clearing broker Merrill Lynch International Limited. The cash margin calls needed to cover the required contract margins are adjusted daily in the Company cash accounts, and results on open positions are considered as realised at that point in time but reflected as unrealised gain/(loss) in the financial statements ("Unrealised gain on futures already cashed"/"Unrealised loss on futures already cashed"). The margin is calculated as the difference between the value of the contract at previous valuation day and the financial future value at the valuation day.

g) Forward foreign exchange contracts

Forward foreign exchange contracts are valued at the forward rate applicable at the Statement of Net Assets date for the year until their maturity. The net unrealised appreciation/(depreciation) on open forward foreign exchange contracts at year-end is disclosed in the Statement of Net Assets under "Unrealised gain/(loss) on forward foreign exchange contracts".

h) Credit default swaps (CDS)

A credit default swap is a credit derivative transaction in which two parties enter into an agreement, whereby one party (the protection buyer) pays the other (the protection seller) a fixed periodic coupon for the specified life of the agreement in return for a payment contingent on a credit event related to the underlying reference obligation.

If a credit event occurs, the protection seller would be obliged to make a payment, which may be either: (i) a net cash settlement equal to the notional amount of the swap less the auction value of the reference obligation or (ii) the notional amount of the swap in exchange for the delivery of the reference obligation. Selling protection effectively adds leverage to a Sub-fund's portfolio up to the notional amount of swap agreements.

Credit default swaps are marked to market at each NAV calculation date. The market value is based on the valuation elements laid down in the contracts, and is obtained from internal models which is then compared against the counterparty or the Clearing Counterparty (CCP). The initial value of the contracts is equal to the mark-to-market value at inception and an upfront payment is exchanged to ensure that the economic value of the transaction is zero at initiation of the trade for the two parties.

The unrealised appreciation/(depreciation) is disclosed in the statement of net assets under "Unrealised gain/(loss) on credit default swaps." Realised gains/(losses) and change in unrealised appreciation/(depreciation) resulting there from are included in the statement of operations and changes in net assets respectively under the heading "Net realised gains/(losses) on credit default swaps" and "Changes in unrealised gain/(loss) on credit default swaps." The upfront fee paid or received when entering the contract is included in the initial value of the contract and disclosed in the Statement of Net Assets under "Credit default swaps at cost".

i) Interest rate swaps (IRS)

An interest rate swap is a bilateral agreement in which each party agrees to exchange a series of interest payments for another series of interest payments (usually fixed/floating) based on a notional amount that serves as a computation basis which is usually not exchanged.

Interest rate swaps are marked to market at each NAV calculation date. The market value is based on the valuation elements laid down in the contracts, and is obtained from internal models which are compared against a third party valuation, the counterparty or the Clearing Counterparty (CCP).

The unrealised appreciation/(depreciation) is disclosed in the statement of net assets under "Unrealised gain/(loss) on interest rate and inflation swaps."

Realised gains/(losses) and change in unrealised appreciation/(depreciation) resulting there from are included in the statement of operations and changes in net assets respectively under the heading "Net realised gains/(losses) on interest rate and inflation swaps" and "Changes in unrealised gain/(loss) on interest rate and inflation swaps." The upfront fee paid or received when entering the contract, if any, is included in the initial value of the contract and disclosed in the Statement of Net Assets under "Interest rate swaps at cost".

j) Inflation swaps

An inflation swap is a bilateral agreement in which one party pays a fixed rate cash flow on the nominal amount while the other party pays a floating rate linked to an inflation index. The party paying the floating rate pays the inflation-adjusted rate multiplied by the nominal amount. These amounts are calculated and booked for every time the NAV is calculated.

The unrealised appreciation/(depreciation) is disclosed in the statement of net assets under "Unrealised gain/(loss) on interest rate and inflation swaps."

Realised gains/(losses) and change in unrealised appreciation/(depreciation) resulting there from are included in the statement of operations and changes in net assets respectively under the heading "Net realised gains/(losses) on interest rate and inflation swaps" and "Changes in unrealised gain/(loss) on interest rate and inflation swaps."

Notes to the Financial Statements as of 31/12/2024 (continued)

k) Definition of terms used in the Statement of Investments in Securities and Other Net Assets and in the Credit Default Swaps (CDS) tables

FRN (Floating Rate Note): Bond with a coupon indexed to a benchmark interest rate such as LIBOR or Euribor plus or minus a spread. Only the dates of changes are known from the date of issue.

MULTI (Fixed-to-float or Fixed-to-variable bonds): The interest rates and dates of the changes are known from the date of issue.

VAR: Bond with an interest rate varying during its lifetime other than FRN or MULTI.

PERPETUAL: This term is used for bonds with no maturity date. The principal amount is never paid to the investor and instead he receives a steady stream of interest forever.

P-NOTE (Participatory note): Instruments issued by registered foreign institutional investors (FII) to overseas investors, who wish to invest in the Indian stock markets without registering themselves with the market regulator, the Securities and Exchange Board of India - SEBI.

No ref obligation: Disclosed in the Credit Default Swaps tables, when no underlying reference bond is available in the official RED database from Markit.

l) Combined statements

The Company's Combined Statement of Net Assets and the Combined Statement of Operations and Changes in Net Assets are the sum of the statements of each Sub-fund translated into EUR at the prevailing exchange rates as at end of the year. The difference between opening total net assets stated at exchange rates ruling at the beginning of the year and their value at the end of the year is shown as an exchange difference in caption "Revaluation difference on opening net assets" in the Combined Statement of Operations and Changes in Net Assets.

m) Provisions on Indian Capital Gain Tax

Capital gains realized on the disposal of Indian listed stocks within 12 months after purchase (short term gains) are subject to a capital gains tax. The disposal of Indian listed stocks after 12 months after purchase (long term gains) were exempt until April 2018. Starting April 2018, India also introduced a capital gains tax on long term gains. Until 9 December 2021, the capital gains taxes were taken into account on an arisen basis a few days after each trade at the applicable rates for a short term gain or a long term gain without taking a provision into account. Since 9 December 2021, the capital gains taxes for funds investing in India are accrued in the Net Asset Value.

The provision is disclosed in the caption "Net other receivable" or "Net other payable" in the Statement of Net Assets and in the caption "Changes in unrealised gain/(loss) on securities" in the Statement of Operations and Changes in net Assets.

Fund name	Base currency	Amount
Nordea 2 - Emerging Markets Enhanced Equity Fund	USD	5,201,392.12
Nordea 2 - Emerging Markets Responsible Enhanced Equity Fund	USD	2,850,916.35
Nordea 2 - Stable Emerging Markets Aksjer Etisk	NOK	43,678.66

n) Last tradable Net Asset Value of the year

The annual report shows all Sub-funds with a Net Asset Value dated 31 December 2024 while for the following Sub-funds, the last tradable Net Asset Value was dated 30 December 2024 due to closed markets in certain countries on 31 December 2024:

Nordea 2 - European Enhanced Equity Fund	Nordea 2 - LCR Optimised Danish Covered Bond Fund - EUR Hedged
Nordea 2 - European Responsible Enhanced Equity Fund	Nordea 2 - Stable Emerging Markets Aksjer Etisk
Nordea 2 - Japanese Responsible Enhanced Equity Fund	Nordea 2 - Swedish Responsible Enhanced Equity Fund

Note 3 - Charges taken from the Company over a year

a) Management fees

These fees, payable out of the assets of the relevant Sub-funds, are due to the Management Company. The management fees for D and Z shares are set in the separate terms that apply to investors in these shares. Management fees for X shares are not taken from the Company but are paid by investors in this type of shares. Management fees for Y shares are zero.

b) Operational expenses

These expenses consist of an administration fee (for central administration), depositary fees (charges for safekeeping, and other associated services), and the taxe d'abonnement (for further description on the taxe d'abonnement please see note 4 below). Safekeeping and related administration charges are based on the value of assets held in custody and vary from Sub-fund to Sub-fund depending on the countries the Sub-funds are invested in.

Operational expenses further include:

- All expenses of the auditor and legal advice.
- All expenses connected with publication and supply of information to shareholders, as well as expenses connected to regulatory requirements for the SICAV, in particular the cost of printing, the distribution of financial reports as well as any prospectuses.
- All expenses related to the maintenance, production, printing, translation, distribution, dispatch, storage and archiving of the Key Investor Information Documents (the "KIIDs") / Key Information Document ("KID").

Notes to the Financial Statements as of 31/12/2024 (continued)

- Any advertising costs and expenses other than those specified above that the Management Company determines to be directly related to the offer or distribution of shares and certain platform fees and expenses, as applicable.
- All expenses involved in registering and maintaining the registration of the Company with supervisory authorities and stock exchanges.
- Certain expenses associated with access to investment research.

Expenses not included in any of the above:

- all taxes payable on the assets and/or income except for the taxe d'abonnement
- depositary transaction fees
- other transaction-related fees, such as ordinary brokerage fees and commissions, bank charges, stamp duties and similar levies
- litigation expenses
- any extraordinary expenses or other unforeseen charges
- all other expenses chargeable to the SICAV

The following tables disclose the management fees and operational expenses of share classes available to (i) institutional investors and (ii) all investors excluding institutional investors.

Management fees and operational expenses of share classes available to institutional investors:

(*) Effective rate charged to the share class at report date. "n/a" when no outstanding shares.

c) Distribution fee

This fee is paid to the Management Company and in principle forwarded to the local distributor or intermediary. The fee is charged only on E shares and is 0.75% a year.

Note 4 - Taxes

The Company is subject to a taxe d'abonnement (subscription tax) at the following rates:

- Classes C, E, F, P and Q: 0.05%.
- Classes D, I, R, X, Y and Z: 0.01%.

This tax is calculated and payable quarterly, on the aggregate net asset value of the outstanding shares of the Company. The Company is not currently subject to any Luxembourg stamp tax, withholding tax, municipal business tax, net worth tax, or taxes on income, profits or capital gains. The taxe d'abonnement is paid out of the operational expenses.

To the extent that any country in which a Sub-fund invests imposes taxes on income or gains earned in that country, most of these taxes will be deducted before the Sub-fund receives its income or proceeds. Some of these taxes may be recoverable. The Sub-fund might also have to pay other taxes on its investments. See also "Tax risks" in the "Risk descriptions" of the prospectus of the Company. While the above tax information is accurate to the best of the board's knowledge, it is possible that a tax authority may modify existing taxes or impose new ones (including retroactive taxes) or that the Luxembourg tax authorities may determine, for example, that any class currently identified as being subject to the 0.01% taxe d'abonnement should be reclassified as being subject to the 0.05% rate. The latter case could happen for an institutional share class of any Sub-fund for any year during which an investor not entitled to hold institutional shares was found to have held such shares.

Notes to the Financial Statements as of 31/12/2024 (continued)

Note 5 - Statement of changes in investments

A list specifying for each Sub-fund the total purchases and sales in the investments which occurred during the year under review, can be obtained, free of charge and as hardcopy, from the registered office of the Company, the Depositary and the Principal Distributor or any company listed in the section "Representatives & Paying & Information Agents outside Luxembourg".

Note 6 - Total Expense Ratio (TER)

This ratio expresses the sum of all costs and commissions charged on an ongoing basis to the Sub-fund's net assets (operating expenses as shown under "Expenses" in the Statement of Operations and Changes in Net Assets but excluding the caption "Transaction related costs") taken retrospectively as a percentage of the average Sub-fund's net assets. The transaction fees incurred on the purchase and sale of investments are not included in the ratio. The TER is calculated in accordance with the Asset Management Association Switzerland (AMAS) guidelines dated 20 April 2015 and is in principle calculated using the following formula:

$$\text{TER \%} = \frac{\text{Total operating expenses in CU*}}{\text{Average Sub-fund's net assets in CU*}} \times 100$$

* CU = Currency units in the Sub-fund's accounting currency

The TER is calculated for the preceding 12 months as of the end of the financial year.

In the case of newly launched Sub-funds, the operating expenses are annualized.

Note 7 - Changes to the Prospectus of the Company during the reporting year

The latest prospectus of the Company is the one of November 2024.

The latest versions of the KIIDs and Key Information Document ("KID") for each of the Company's Sub-funds' share classes may be found on nordea.lu.

The current Prospectus and KIDs for the share classes of the Company's Sub-funds can also be obtained free of charge in electronic form and as hard copy, from the registered office of the Company.

Any material changes to the Prospectus will be communicated by a notice to be sent at the address on the shareholders register, either physically, electronically, or as an e-mailed link, subject to investor consent (where required), and on nordea.lu. Notices to shareholders will also be available at the registered office of the management Company and the Fund's Representatives outside of Luxembourg.

Note 8 - Country and Economic Sector classification of the portfolio (unaudited)

The Economic Sector classification of the portfolio is shown in accordance with the GICS Direct classifications (a joint product of MSCI and Standard & Poor's).

Note 9 - Share capital and share classes

Please refer to the sections "the SICAV" and "Share Classes" of the Company's prospectus for further information on the share capital and share classes of the Company respectively.

Note 10 - Swing factor

On business days when net dealing in Sub-fund shares exceeds a certain threshold, a Sub-fund's NAV may be adjusted by a swing factor. This adjustment reflects an assessment of the overall costs (estimated tax charges and trading costs that may be incurred by the fund and the estimated bid/offer spread of the assets in which the Sub-fund invests) incurred in buying or selling investments to satisfy, respectively, net subscriptions or net redemptions of shares (understanding that a Sub-fund generally maintains adequate daily liquidity to handle ordinary cash flows with little or no impact on ordinary investment operations). The NAV price will be adjusted upwards when net dealing in Sub-fund shares is positive (net subscription), and will be adjusted downwards when net dealing in Sub-fund shares is negative (net redemption).

Swing pricing is intended to reduce the impact of these costs on shareholders who are not dealing their shares at that time, and is impacting the shareholders who are dealing their shares by adjusting their NAV price by the swing factor. To the extent that markets have different charging structures on the buy and sell side, the swing factor may not be equal for net subscriptions or net redemptions.

The Board of Directors also delegated to the Management Company the decision-making regarding the correct application and level of swing factors and swing thresholds. Although all Sub-funds may be subject to swing pricing, thresholds and swing factors, as fixed by the Management Company can vary by Sub-fund. Under normal market conditions, the adjustment swing factor will not be larger than 2.00% of what the NAV would otherwise be for all share classes within a Sub-fund.

Notes to the Financial Statements as of 31/12/2024 (continued)

During the year, the swing pricing mechanism was applied on the following Sub-funds:

Nordea 2 - Emerging Market Hard Currency Enhanced Bond Fund	Nordea 2 - Global High Yield Enhanced Bond Fund - USD Hedged
Nordea 2 - Emerging Market Local Debt Enhanced Fund (Note 1b)	Nordea 2 - Global Opportunity Equity Fund - NOK Hedged
Nordea 2 - Emerging Markets Enhanced Equity Fund	Nordea 2 - Global Responsible Enhanced Equity Fund
Nordea 2 - Emerging Markets Responsible Enhanced Equity Fund	Nordea 2 - Global Responsible Enhanced Small Cap Fund
Nordea 2 - Euro Corporate Enhanced Bond Fund	Nordea 2 - Japanese Responsible Enhanced Equity Fund
Nordea 2 - European Cross Credit ESG Fund	Nordea 2 - North American Responsible Enhanced Equity Fund
Nordea 2 - European Enhanced Equity Fund	Nordea 2 - Stable Emerging Markets Aksjer Etisk
Nordea 2 - European Responsible Enhanced Equity Fund	Nordea 2 - Swedish Responsible Enhanced Equity Fund

Nordea 2 - Global Enhanced Equity Fund	Nordea 2 - US Corporate Enhanced Bond Fund
Nordea 2 - Global Enhanced Small Cap Fund	

A swing amount was booked in the following Sub-funds at reporting date:

- Nordea 2 - European Responsible Enhanced Equity Fund
- Nordea 2 - Global Enhanced Small Cap Fund
- Nordea 2 - Japanese Responsible Enhanced Equity Fund

Note 11 - Transaction fees

The transaction fees are in principle the sum of broker expenses and bank commissions.

The transaction related costs, as disclosed in the table below and in the Statement of Operations and Changes in Net Assets, include the bank commissions and the broker fees on derivatives.

The broker costs, as disclosed in the table below, are the expenses and stock exchange taxes (where applicable) billed by the broker directly and paid to him in settlement of shares, bonds and options. They are registered as integral part of the cost price at the same time as the transaction itself.

Name of Sub-fund	Currency	Broker costs in Sub-fund base currency	Transaction related costs in Sub-fund base currency

Notes to the Financial Statements as of 31/12/2024 (continued)

Note 12 - Dividend distributions

The Company has distributed annual dividends at ex-date 26 April 2024 and pay date at 2 May 2024, as disclosed in the Report of the Board of Directors of the previous reporting year.

The LP share class of Nordea 2 - Global Asset Allocation Target Date Fund 1 has distributed EUR 2 of dividend per share at ex-date 28 November 2024 and payment date 03 December 2024.

Note 13 - Performance calculation

The performance is calculated in accordance with the Swiss Funds & Asset Management Association guidelines dated May 16, 2008 and is calculated using the following general formula:

$$\text{Performance \%} = \left\{ \frac{\text{NAV}_{\text{End P}} \times f_1 \times f_2 \dots f_n}{\text{NAV}_{\text{Start P}}} - 1 \right\} \times 100$$

NAV_{End P} Net asset value per unit at end of observation period

NAV_{Start P} Net asset value per unit at start of observation period (i.e. the last figure for the preceding observation period)

f₁, f₂, ..., f_n Adjustment factors for distributions, where:

$$f = \frac{\text{NAV}_{\text{ex}} + \text{gross distribution}}{\text{NAV}_{\text{ex}}}$$

NAV_{ex} Net asset value per unit ex dividend

Gross distribution Gross amount of income and capital gains distributed per unit to investors

Note 14 - Sustainable Finance Disclosure Regulation

Information on environmental and/or social characteristics and/or sustainable investments is available in the relevant annexes under the Sustainable Finance Disclosure Regulation section.

Note 15 - Subsequent events

a) Sub-fund launches:

The Board of Directors of the Company took the decision to launch the following Sub-funds:

Name of Sub-fund	1st NAV date
Nordea 2 - Global Edge Sustainable Equity Fund	05/02/2025
Nordea 2 - US Enhanced Equity Fund	29/01/2025

b) Merger:

Nordea 2 - Emerging Market Hard Currency Enhanced Bond Fund merged into Nordea 1 - Emerging Market Bond Fund on 11 February 2025.

Shareholder's Information

The following documents may be obtained free of charge at the registered office of the Company, the Management Company or the Representatives and Paying Agents during their respective business days:

- the Articles of the Company;
- the Prospectus of the Company;
- the KIID/KID;
- the Application Form;
- the periodical financial reports;
- information on our core policies (conflicts of interest, remuneration, engagement, complaints handling etc);
- the marketing documents made available from time to time.

An up-to-date version of the KIIDs/KIDs will be made available on nordea.lu, and, depending on the local language(s) of the countries where the Company, a Sub-fund or a Share Class are registered for public offering, on the local Nordea websites ending with the international country codes of such relevant countries, as available.

The following documents may be consulted at the registered office of the Company or the Management Company during their respective business days:

- the Management Company Agreement between the Company and the Management Company;
- the Depositary and Custodian Agreement between the Company, the Management Company and J.P. Morgan SE, Luxembourg Branch.

Notices for all general meetings of the Shareholders are mailed to holders of registered shares of the Company and are available on nordea.lu.

Subscriptions can only be received on the basis of the current Prospectus accompanied by the latest Annual Report as well as by the latest Semi-Annual Report if published after the latest Annual Report.

Risk Transparency disclosures (unaudited)

A) General

The Management Company uses a risk management process that allows monitoring the risk of the portfolio positions and their share of the overall risk profile of the portfolios on the Sub-funds at any time.

In accordance with the Law of 17 December 2010 and the applicable regulatory requirements of the Commission de Surveillance du Secteur Financier ("CSSF") the Management Company reports to the CSSF on a regular basis on the risk management process. The Management Company assures, on the basis of appropriate and reasonable methods, that the overall risk, associated with derivatives, does not exceed the net asset value of the portfolio. The Management Company uses the following methods:

- The Commitment approach: the positions on derivative financial instruments are converted into equivalent positions in the underlying assets, after consideration of all netting and coverage effects.
- The Value-at-Risk (VaR) approach: The VaR is a mathematical-statistical concept and is used as a standard measure of risk in the financial sector. The VaR represents the potential loss of a portfolio over a given period (so-called holding period) for a certain probability (so-called confidence level). The VaR is measured at the whole Sub-fund level, on a holding period not exceeding one month (20 business days) and a confidence level not below 95%,
 - Relative VaR approach: The relative VaR concept determines the VaR based on a reference portfolio. The relative VaR cannot exceed the VaR of a reference portfolio by more than 100%, i.e. two times the reference VaR (200%). The reference portfolio is a matching portfolio in comparison to the Sub-fund's investment policy.
 - Absolute VaR approach: In the absolute VaR approach the VaR (min. 95% confidence level, max. 20-day holding period) of the Sub-fund cannot exceed 20% of the Sub-fund net assets (99% confidence level, 20-day holding period). The maximum limit of 20% is adjusted accordingly, when different holding periods or confidence levels are applied. Information of the applicable maximum limit is provided.

VaR add ons:

For Sub-funds measuring and monitoring the global risk on derivatives via VaR approach, the Management Company also determines the sum of the nominal values or equivalent values of all the relevant derivatives and estimates in this regard a degree of the expected average value (leverage). This level of leverage can, depending on the respective market conditions, derive from the actual value at the reporting date. Furthermore, the published expected level of leverage is explicitly not understood as an investment limit.

Risk Transparency disclosures (unaudited) (continued)

The Board of Directors decides on the implementation of the adequate methodology to calculate the global exposure for each of the Sub-funds within Nordea 2, SICAV. This methodology may vary from one Sub-fund to another. A majority of Sub-funds within Nordea 2, SICAV apply Commitment approach for measuring the global exposure. Sub-funds which apply VaR approach are listed in the table below, indicating the calculation concept chosen:

Sub-fund	Methodology
Nordea 2 - Global Asset Allocation Target Date Fund 1	Absolute VaR
Nordea 2 - VAG Optimised Stable Return Fund	Absolute VaR

B) Global risk measurement methods

Ad 1) Absolute VaR approach

In the period from 01/01/2024 to 31/12/2024 (the "Period"), the absolute VaR has been used for monitoring and measuring the global risk associated with the derivatives used by the Sub-funds. The following table indicates:

- (i) The minimum level, the maximum level and the average level of daily VaR observed during the Period.
- (ii) The VaR regulatory limit for each of these Sub-funds.

Sub-fund	Minimum	Maximum	Average	Regulatory limit
Nordea 2 - Global Asset Allocation Target Date Fund 1	2.83%	5.41%	3.98%	20%
Nordea 2 - VAG Optimised Stable Return Fund	3.52%	6.37%	4.87%	20%

The sum of the nominal values or equivalent values of all relevant derivatives (leverage) in the period from 01/01/2024 to 31/12/2024 lead to the following average level of leverage for 2024:

Sub-fund	Minimum (in % of NAV)*	Maximum (in % of NAV)*	Average (in % of NAV)*
Nordea 2 - Global Asset Allocation Target Date Fund 1	361%	640%	481%
Nordea 2 - VAG Optimised Stable Return Fund	237%	656%	335%

* Calculated at least with bi-weekly data.

Ad 2) Commitment Approach

In relation with the remaining Sub-funds that are not reported in Ad 1) above, the global risk on derivatives has been determined according to the commitment approach during the reporting period from 01/01/2024 to 31/12/2024.

Remuneration disclosures (unaudited)

A) General

The Management Company has implemented a Remuneration Policy, based on that of Nordea Group, that is consistent with, and promotes, sound and effective risk management and does not encourage risk taking that is inconsistent with the risk profile of the funds. The Management Company has committed to ensuring that all individuals subject to the Policy — which includes the Management Company's directors, managers and employees — will comply with the Policy.

The Remuneration Policy integrates governance, a pay structure that is balanced between fixed and variable components, and risk and long-term performance alignment rules. These alignment rules are designed to be consistent with the interests of the Management Company, the fund and the shareholders, with respect to such considerations as business strategy, objectives, values and interests, and include measures to avoid conflicts of interest. The Management Company ensures that the calculation of any variable remuneration is based on the applicable multi-year performance of the relevant fund and that the actual payment of such remuneration is spread over the same period. Employees in control functions do not receive variable remuneration.

Performance is assessed both, on the level of Nordea Group and at Management Company level. Individual staff assessments are based on a weighting of financial and non-financial targets linked to the specific job scope and role. As such, the principle of individual performance assessment is based on an assessment of objectives reached as well as an appreciation of the employee's long-term value creation. Furthermore, the performance reflects an assessment of business and interpersonal skills and is linked to the achievement of the individual. The criteria applied to establish fixed remuneration are job complexity, level of responsibility, professional experience and local market conditions.

The Policy is formulated by a remuneration committee and approved by the Board of Directors of the Management Company. The Policy follows a defined process establishing the principles, the approval, communication, implementation, review and update of the Policy which involves the Board of Directors, as well as Senior Management, Human Resources, Internal Audit and other control functions.

B) Methodology

Considering the functional setup of the Management Company in the context of its role as UCITs and AIFs management company, the below information represents a proportion of the total staff remuneration within the Management Company as attributable to all the funds under management, taking into account non-UCITS and UCITS alike, in relation to the total net assets of the Company, and including delegates of entities to which the Management Company has delegated portfolio management functions (the "Delegates"). Under the methodology the average number of staff considered amounted to 316 including Senior Management.

Remuneration reporting as at 31 December 2024:

Fund	Total Remuneration (EUR) including any Delegates		Senior Management (EUR)
	Fixed	Variable	
Nordea 2, SICAV	8,096,156	2,580,391	341,355

Disclosures under the Securities Financing Transaction Regulation (unaudited)

Based on the analysis conducted by the Management Company, the scope of these disclosures covers the transactions in total return swaps, contracts for difference and repurchase transactions.

There was no such position in portfolio at year end for the Company.

Disclosures under the Sustainable Finance Disclosure Regulation (unaudited)

Commission Delegated Regulation (EU) 2023/363 of 31 October 2022 amended and corrected the regulatory technical standards laid down in Delegated Regulation (EU) 2022/1288 as regards the content and presentation of information in relation to disclosures in pre-contractual documents and periodic reports for financial products investing in environmentally sustainable economic activities (amended SFDR RTS). The amended SFDR RTS introduce precontractual and periodic transparency requirements in relation to Taxonomy aligned fossil gas and nuclear energy related activities for financial products disclosing under Articles 8 and 9 of SFDR.

Article 6 Sub-funds

The investments underlying this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Nordea 2 - Balanced Growth Target Date Fund

Legal entity identifier: 549300NGXE18U2PGCK62

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

☒ ☒ ☐ Yes

☒ ☐ ☒ No

☐ It made **sustainable investments with an environmental objective:** ____%

☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It made **sustainable investments with a social objective:** ____%

☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 62 % of sustainable investments

☒ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☒ with a social objective

☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The E/S characteristics promoted could have been environmental and/or social and included the following features:

Sustainable investments Although the fund has not committed to make any sustainable investments, the fund promoted E/S characteristics by partially investing in companies and issuers involved in activities that contributed to an environmental or social objective as outlined in UN Sustainable Development Goals (SDGs) and/or the EU Taxonomy, while not significantly harming any other environmental or social objectives and following good governance practices.

Sector- and value-based exclusions The fund promoted E/S characteristics by excluding companies that were deemed to be inappropriate based on their business activities or corporate behaviour.

Nordea Asset Management's Paris-Aligned Fossil Fuel Policy The fund promoted E/S characteristics by refraining from investing in companies that had significant exposure to fossil fuels unless they had a credible transition strategy.

The benchmark used by the fund was not designated as a reference benchmark for the purpose of attaining the E/S characteristics promoted by the fund.

● **How did the sustainability indicators perform?**

Sustainability Indicator	Metric	Metric Value	Eligibility	Coverage
Carbon Footprint	Carbon footprint Scope 1+2	19 tCO ₂ e / m€ invested	91.42 %	91.30 %
	Carbon footprint Scope 1+2+3	139 tCO ₂ e / m€ invested	91.42 %	91.30 %
Investee countries subject to social violations (absolute and relative)	Number of investee countries subject to social violations (absolute number and relative number divided by all investee countries), as referred to in international treaties and conventions, United Nations principles and, where applicable, national law	0 investee countries subject to violations	3.84 %	3.84 %
		0.00 % investee countries subject to violations	3.84 %	3.84 %
% of total investments in companies violating United Nations Global Compact	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises	1.46 % involved in violations	91.42 %	91.42 %
Greenhouse Gas Intensity for sovereigns	GHG intensity of investee countries	343.52 tCO ₂ e / m€ of GDP	3.84 %	3.84 %

Eligibility: The proportion of the assets in the financial product (relative to NAV), which are in scope for the indicator.

Coverage: The proportion of the assets in the financial product (relative to NAV), where data is available to present the indicator.

● ...and compared to previous periods?

Sustainability Indicator	Metric	Reference Period	Metric Value	Eligibility	Coverage
Carbon Footprint	Carbon footprint Scope 1+2	2024	19 tCO ₂ e / m€ invested	91.42 %	91.30 %
		2023	14 tCO ₂ e / m€ invested	91.90 %	91.50 %
		2022	15 tCO ₂ e / m€ invested	90.87 %	90.49 %

Eligibility: The proportion of the assets in the financial product (relative to NAV), which are in scope for the indicator.

Coverage: The proportion of the assets in the financial product (relative to NAV), where data is available to present the indicator.

- ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

The objective of the sustainable investments that the fund partially made, was to contribute to one or several of the UN SDGs or alternatively be involved in Taxonomy-aligned activities. Sustainable investments contributed to the objectives through the fund's investments in companies where a minimum of 20% of their activity could be linked to economic activities supporting an environmentally-sustainable objective defined in the EU Taxonomy, or an environmental or social objective belonging to the list of UN SDGs.

The UN SDGs are a set of 17 Sustainable Development Goals adopted by the United Nations in 2015 as a call for action to end poverty, protect the planet, and ensure peace and prosperity by 2030.

The EU Taxonomy provides a framework for assessment of environmentally sustainable economic activities and lists economic activities that are considered environmentally sustainable in the context of the European Green Deal.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

- ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

As part of the process to identify sustainable investments, companies were screened to ensure that they did not significantly harm (DNSH test) any other social or environmental objectives. The DNSH test used PAI indicators, as described below, to identify and exclude companies that do not pass the thresholds.

- *How were the indicators for adverse impacts on sustainability factors taken into account?*

The DNSH test, as part of the methodology to identify sustainable investments, identified negative outliers and poor performance related to PAI indicators. The investment manager considered the PAI indicators from Table 1, annex 1 in the SFDR RTS. In the reporting period, data was mainly available for the use of the below indicators.

Climate and other environment related indicators:

- Greenhouse Gas emissions
- Biodiversity impact
- Emissions to water
- Hazardous waste

Indicators for social and employee, respect for human rights, anti-corruption and anti-bribery matters:

- Violations of the UNGC and OECD principles
- Board gender diversity
- Exposure to controversial weapons
- Severe human rights issues and incidents

Companies that did not pass the thresholds that were defined by the investment manager, did not qualify as a sustainable investment. This included companies that were involved in severe human rights incidents, severe controversies related to biodiversity or violations of the UNGC and OECD principles.

Companies also failed the DNSH test if they were among the worst performers on emissions to water, hazardous waste or Greenhouse Gas emissions. In addition, companies that derived more than 0% of revenue from unconventional fossil fuel failed the DNSH test, and companies that derived more than 5% from conventional fossil fuel or more than 50% from services specific to the fossil fuel industry only passed the DNSH test if they were below the climate related exclusions criteria of the EU Paris Aligned Benchmark with revenue thresholds of 1% for coal, 10% for oil, 50% for natural gas and 50% for fossil fuel based electricity generation, and had a climate transition plan. Our Paris Aligned Fossil Fuel Policy describes the criteria used to identify companies with credible transition plans.

Additional exclusions to further limit negative externalities were applied to the investment universe of the fund, to avoid investment in companies that were involved in thermal coal or production of fossil fuels from oil sands and arctic drilling, as well as controversial weapons, and pornography.

The data on PAI indicators needed for the DNSH test was sourced from third party data providers.

- Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Alignment of the sustainable investments with the OECD guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights was confirmed as part of the process to identify sustainable investments using the Violations of the UNGC and OECD principles indicator.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the fund that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this fund do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The specific PAI indicators that were taken into consideration for this fund were:

CLIMATE AND OTHER ENVIRONMENT-RELATED INDICATORS

Adverse Sustainability Indicator	Metric	Metric Value	Eligibility	Coverage
Greenhouse gas "GHG" emissions	Scope 1 GHG emissions	358 tCO ₂ e	91.42 %	91.30 %
	Scope 2 GHG emissions	151 tCO ₂ e	91.42 %	91.30 %

Cisco Systems	Communications	1.47 %	United States
Accenture	Technology	1.47 %	Ireland

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The product contains investments with both an environmental and a social objective. A single investment can both contribute to an environmental and a social objective resulting in a total allocation amounting to more than 100 per cent. There is no prioritisation of environmental and social objectives, and the strategy does not target any specific allocation or minimum proportion for either of these categories. The investment process accommodates the combination of environmental and social objectives by allowing the investment manager the flexibility to allocate between these based on availability and attractiveness of investment opportunities.

● *In which economic sectors were the investments made?*

Sum		100.00 %

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

- **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?**

Yes:

In fossil gas

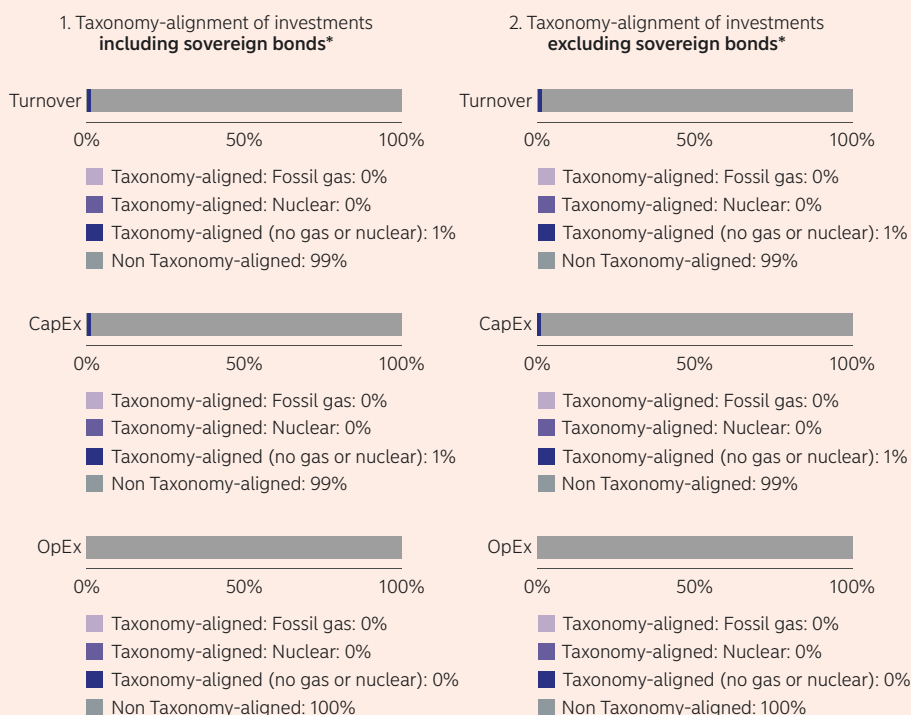

In nuclear energy

No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

There is no data available for the reporting period to confirm that the financial product invested in any fossil fuel gas and/or nuclear energy related activities that comply with the EU Taxonomy.

Assessment on Taxonomy alignment is currently conducted with data from third party providers as well as self-reported data from investee companies when available. Proprietary tools and processes to measure significant harm and minimum social safeguards have been developed.

The methodology applied by the third-party data providers assesses how companies are involved in economic activities that substantially contribute to an environmental objective while not significantly harming other sustainable objectives and meeting minimum social safeguards. Taxonomy-alignment of the investment is based on the percentage of turnover exposed or potentially exposed to taxonomy-aligned activities. Data providers' methodologies vary and results may not be fully aligned as long as publicly reported company data is still lacking and assessments rely largely on equivalent data.

We prioritise the use of self-reported data where available. Where data providers are used to deliver equivalent data, NAM has conducted due diligence on the data provider's methodology. Out of caution, unless we are able to confirm available data for the majority of the portfolio's holdings, we will report 0 (zero) per cent of Taxonomy-Aligned Investments.

The compliance of the investments with the EU Taxonomy has not been subject to an assurance by auditors or a review by third parties. Data provider methodologies vary and results may not be fully aligned as long as publicly reported data is still lacking.

● ***What was the share of investments made in transitional and enabling activities?***

Type of Activity	Assets
Transitional activities	0.01 %
Enabling activities	0.55 %
Sum	0.56 %

● ***How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?***

Reference Period	Taxonomy-Aligned Investments
2024	1.18 %
2023	0.00 %
2022	0.00 %

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 47 %.

What was the share of socially sustainable investments?

The share of socially sustainable investments was 56 %.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

Cash may have been held as ancillary liquidity or for risk balancing purposes. The fund may have used derivatives and other techniques for the purposes described in the “Fund Descriptions” in the prospectus. This category may also have included securities for which relevant data is not available. Minimum environmental or social safeguards were not applicable.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this fund have been monitored and documented on an ongoing basis.

How did this financial product perform compared to the reference benchmark?

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

ANNEX IV

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Nordea 2 - Emerging Markets Responsible Enhanced Equity Fund

Legal entity identifier: 5493008IEMBT0EVKQF84

Environmental and/or social characteristics

Sustainable investment

means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

☒ ☒ ☐ Yes

☒ ☐ ☒ No

☐ It made **sustainable investments with an environmental objective:** ____%

☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It made **sustainable investments with a social objective:** ____%

☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 62 % of sustainable investments

☒ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☒ with a social objective

☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The E/S characteristics promoted could have been environmental and/or social and included the following features:

Minimum proportion of sustainable investments The fund promoted E/S characteristics by partially investing in companies and issuers involved in activities that contributed to an environmental or social objective as outlined in UN Sustainable Development Goals (SDGs) and/or the EU Taxonomy, while not significantly harming any other environmental or social objectives and following good governance practices.

ESG rating The fund promoted E/S characteristics by investing in companies or issuers with favourable ESG ratings. Investee companies or issuers had been rated by a selected external provider to ensure that only securities issued by companies that met the minimum required ESG rating were eligible for inclusion and that ESG laggards were excluded.

Sector- and value-based exclusions The fund promoted E/S characteristics by excluding companies that were deemed to be inappropriate based on their business activities or corporate behaviour.

Nordea Asset Management's Paris-Aligned Fossil Fuel Policy The fund promoted E/S characteristics by refraining from investing in companies that had significant exposure to fossil fuels unless they had a credible transition strategy.

Carbon footprint scope 1 & 2 limit The fund promoted E/S characteristics by maintaining the total carbon footprint of the fund's investments at least 25% below the total carbon footprint of the reference benchmark. The carbon footprint was measured by the scope 1 and 2 greenhouse gas emissions.

There was no reference benchmark designated for the purpose of attaining the E/S characteristics of the fund.

● **How did the sustainability indicators perform?**

Sustainability Indicator	Metric	Metric Value	Eligibility	Coverage
% of sustainable investments	% of sustainable investments	62.41 %	99.03 %	99.00 %
% of Investments, aligned with the E/S characteristics, with an ESG rating that do not meet the minimum threshold	% of Investments, aligned with the E/S characteristics, with an ESG rating that do not meet the minimum threshold	0.00 %	99.12 %	99.12 %
% of investments, aligned with the E/S characteristics, that do not comply with sector- and value based exclusions	% of investments, aligned with the E/S characteristics, that do not comply with sector- and value based exclusions	0.00 %	99.12 %	99.12 %
% of investments, aligned with the E/S characteristics, that do not comply with NAM's Paris-Aligned Fossil Fuel Policy	% of investments, aligned with the E/S characteristics, that do not comply with NAM's Paris-Aligned Fossil Fuel Policy	0.00 %	99.12 %	99.12 %
Relative carbon footprint scope 1 and 2	Relative carbon footprint scope 1 and 2	-56.15 %	99.12 %	99.12 %

Eligibility: The proportion of the assets in the financial product (relative to NAV), which are in scope for the indicator.

Coverage: The proportion of the assets in the financial product (relative to NAV), where data is available to present the indicator.

Eligibility: The proportion of the assets in the financial product (relative to NAV), which are in scope for the indicator.

Coverage: The proportion of the assets in the financial product (relative to NAV), where data is available to present the indicator.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The objective of the sustainable investments that the fund partially made, was to contribute to one or several of the UN SDGs or alternatively be involved in Taxonomy-aligned activities. Sustainable investments contributed to the objectives through the fund's investments in companies where a minimum of 20% of their activity could be linked to economic activities supporting an environmentally-sustainable objective defined in the EU Taxonomy, or an environmental or social objective belonging to the list of UN SDGs.

The UN SDGs are a set of 17 Sustainable Development Goals adopted by the United Nations in 2015 as a call for action to end poverty, protect the planet, and ensure peace and prosperity by 2030.

The EU Taxonomy provides a framework for assessment of environmentally sustainable economic activities and lists economic activities that are considered environmentally sustainable in the context of the European Green Deal.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

As part of the process to identify sustainable investments, companies were screened to ensure that they did not significantly harm (DNSH test) any other social or environmental objectives. The DNSH test used PAI indicators, as described below, to identify and exclude companies that do not pass the thresholds.

- ***How were the indicators for adverse impacts on sustainability factors taken into account?***

The DNSH test, as part of the methodology to identify sustainable investments, identified negative outliers and poor performance related to PAI indicators. The investment manager considered the PAI indicators from Table 1, annex 1 in the SFDR RTS. In the reporting period, data was mainly available for the use of the below indicators.

Climate and other environment related indicators:

- Greenhouse Gas emissions
- Biodiversity impact
- Emissions to water
- Hazardous waste

Indicators for social and employee, respect for human rights, anti-corruption and anti-bribery matters:

- Violations of the UNGC and OECD principles
- Board gender diversity
- Exposure to controversial weapons
- Severe human rights issues and incidents

Companies that did not pass the thresholds that were defined by the investment manager, did not qualify as a sustainable investment. This included companies that were involved in severe human rights incidents, severe controversies related to biodiversity or violations of the UNGC and OECD principles.

Companies also failed the DNSH test if they were among the worst performers on emissions to water, hazardous waste or Greenhouse Gas emissions. In addition, companies that derived more than 0% of revenue from unconventional fossil fuel failed the DNSH test, and companies that derived more than 5% from conventional fossil fuel or more than 50% from services specific to the fossil fuel industry only passed the DNSH test if they were below the climate related exclusions criteria of the EU Paris Aligned Benchmark with revenue thresholds of 1% for coal, 10% for oil, 50% for natural gas and 50% for fossil fuel based electricity generation, and had a climate transition plan. Our Paris Aligned Fossil Fuel Policy describes the criteria used to identify companies with credible transition plans.

Additional exclusions to further limit negative externalities were applied to the investment universe of the fund, to avoid investment in companies that were involved in thermal coal or production of fossil fuels from oil sands and arctic drilling, as well as controversial weapons, and pornography.

The data on PAI indicators needed for the DNSH test was sourced from third party data providers.

- Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Alignment of the sustainable investments with the OECD guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights was confirmed as part of the process to identify sustainable investments using the Violations of the UNGC and OECD principles indicator.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the fund that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this fund do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The specific PAI indicators that were taken into consideration for this fund were:

CLIMATE AND OTHER ENVIRONMENT-RELATED INDICATORS

Adverse Sustainability Indicator	Metric	Metric Value	Eligibility	Coverage
Greenhouse gas "GHG" emissions	Scope 1 GHG emissions	42,762 tCO ₂ e	99.12 %	99.12 %

Shinhan Financial Group	Financial	1.02 %	Republic Of Korea
Infosys	Technology	1.00 %	India

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The product contains investments with both an environmental and a social objective. A single investment can both contribute to an environmental and a social objective resulting in a total allocation amounting to more than 100 per cent. There is no prioritisation of environmental and social objectives, and the strategy does not target any specific allocation or minimum proportion for either of these categories. The investment process accommodates the combination of environmental and social objectives by allowing the investment manager the flexibility to allocate between these based on availability and attractiveness of investment opportunities.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

☐ Yes:

☐ In fossil gas

☐ In nuclear energy

☒ No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments including sovereign bonds*

2. Taxonomy-alignment of investments excluding sovereign bonds*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

There is no data available for the reporting period to confirm that the financial product invested in any fossil fuel gas and/or nuclear energy related activities that comply with the EU Taxonomy.

Assessment on Taxonomy alignment is currently conducted with data from third party providers as well as self-reported data from investee companies when available. Proprietary tools and processes to measure significant harm and minimum social safeguards have been developed.

The methodology applied by the third-party data providers assesses how companies are involved in economic activities that substantially contribute to an environmental objective while not significantly harming other sustainable objectives and meeting minimum social safeguards. Taxonomy-alignment of the investment is based on the percentage of turnover exposed or potentially exposed to taxonomy-aligned activities. Data providers' methodologies vary and results may not be fully aligned as long as publicly reported company data is still lacking and assessments rely largely on equivalent data.

We prioritise the use of self-reported data where available. Where data providers are used to deliver equivalent data, NAM has conducted due diligence on the data provider's methodology. Out of caution, unless we are able to confirm available data for the majority of the portfolio's holdings, we will report 0 (zero) per cent of Taxonomy-Aligned Investments.

The compliance of the investments with the EU Taxonomy has not been subject to an assurance by auditors or a review by third parties. Data provider methodologies vary and results may not be fully aligned as long as publicly reported data is still lacking.

● ***What was the share of investments made in transitional and enabling activities?***

Type of Activity	Assets
Transitional activities	0.49 %
Enabling activities	2.24 %
Sum	2.73 %

● ***How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?***

Reference Period	Taxonomy-Aligned Investments
2024	4.77 %
2023	0.00 %
2022	0.00 %

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 48 %.

What was the share of socially sustainable investments?

The share of socially sustainable investments was 48 %.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

Cash may have been held as ancillary liquidity or for risk balancing purposes. The fund may have used derivatives and other techniques for the purposes described in the “Fund Descriptions” in the prospectus. This category may also have included securities for which relevant data is not available. Minimum environmental or social safeguards were not applicable.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this fund have been monitored and documented on an ongoing basis.

How did this financial product perform compared to the reference benchmark?

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

ANNEX IV

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Nordea 2 - European Cross Credit ESG Fund

Legal entity identifier: 549300H4A2NADOMUCJ03

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

☒ ☒ ☐ Yes

☒ ☐ ☒ No

☐ It made **sustainable investments with an environmental objective:** ____%

☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It made **sustainable investments with a social objective:** ____%

☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 66 % of sustainable investments

☒ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☒ with a social objective

☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The E/S characteristics promoted could have been environmental and/or social and included the following features:

Sustainable investments Although the fund has not committed to make any sustainable investments, the fund promoted E/S characteristics by partially investing in companies and issuers involved in activities that contributed to an environmental or social objective as outlined in UN Sustainable Development Goals (SDGs) and/or the EU Taxonomy, while not significantly harming any other environmental or social objectives and following good governance practices.

Sector- and value-based exclusions The fund promoted E/S characteristics by excluding companies that were deemed to be inappropriate based on their business activities or corporate behaviour.

Nordea Asset Management's Paris-Aligned Fossil Fuel Policy The fund promoted E/S characteristics by refraining from investing in companies that had significant exposure to fossil fuels unless they had a credible transition strategy.

There was no reference benchmark designated for the purpose of attaining the E/S characteristics of the fund.

● How did the sustainability indicators perform?

Sustainability Indicator	Metric	Metric Value	Eligibility	Coverage
% of investments, aligned with the E/S characteristics, that do not comply with sector- and value based exclusions	% of investments, aligned with the E/S characteristics, that do not comply with sector- and value based exclusions	0.00 %	96.49 %	96.49 %
% of investments, aligned with the E/S characteristics, that do not comply with NAM's Paris-Aligned Fossil Fuel Policy	% of investments, aligned with the E/S characteristics, that do not comply with NAM's Paris-Aligned Fossil Fuel Policy	0.00 %	96.49 %	96.49 %

Eligibility: The proportion of the assets in the financial product (relative to NAV), which are in scope for the indicator.

Coverage: The proportion of the assets in the financial product (relative to NAV), where data is available to present the indicator.

● **...and compared to previous periods?**

Sustainability Indicator	Metric	Reference Period	Metric Value	Eligibility	Coverage

		2022	N/A	N/A	N/A

Eligibility: The proportion of the assets in the financial product (relative to NAV), which are in scope for the indicator.

Coverage: The proportion of the assets in the financial product (relative to NAV), where data is available to present the indicator.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The objective of the sustainable investments that the fund partially made, was to contribute to one or several of the UN SDGs or alternatively be involved in Taxonomy-aligned activities. Sustainable investments contributed to the objectives through the fund's investments in companies where a minimum of 20% of their activity could be linked to economic activities supporting an environmentally-sustainable objective defined in the EU Taxonomy, or an environmental or social objective belonging to the list of UN SDGs.

The UN SDGs are a set of 17 Sustainable Development Goals adopted by the United Nations in 2015 as a call for action to end poverty, protect the planet, and ensure peace and prosperity by 2030.

The EU Taxonomy provides a framework for assessment of environmentally sustainable economic activities and lists economic activities that are considered environmentally sustainable in the context of the European Green Deal.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

As part of the process to identify sustainable investments, companies were screened to ensure that they did not significantly harm (DNSH test) any other social or environmental objectives. The DNSH test used PAI indicators, as described below, to identify and exclude companies that do not pass the thresholds.

- ***How were the indicators for adverse impacts on sustainability factors taken into account?***

The DNSH test, as part of the methodology to identify sustainable investments, identified negative outliers and poor performance related to PAI indicators. The investment manager considered the PAI indicators from Table 1, annex 1 in the SFDR RTS. In the reporting period, data was mainly available for the use of the below indicators.

Climate and other environment related indicators:

- Greenhouse Gas emissions
- Biodiversity impact
- Emissions to water
- Hazardous waste

Indicators for social and employee, respect for human rights, anti-corruption and anti-bribery matters:

- Violations of the UNGC and OECD principles
- Board gender diversity
- Exposure to controversial weapons
- Severe human rights issues and incidents

Companies that did not pass the thresholds that were defined by the investment manager, did not qualify as a sustainable investment. This included companies that were involved in severe human rights incidents, severe controversies related to biodiversity or violations of the UNGC and OECD principles.

Companies also failed the DNSH test if they were among the worst performers on emissions to water, hazardous waste or Greenhouse Gas emissions. In addition, companies that derived more than 0% of revenue from unconventional fossil fuel failed the DNSH test, and companies that derived more than 5% from conventional fossil fuel or more than 50% from services specific to the fossil fuel industry only passed the DNSH test if they were below the climate related exclusions criteria of the EU Paris Aligned Benchmark with revenue thresholds of 1% for coal, 10% for oil, 50% for natural gas and 50% for fossil fuel based electricity generation, and had a climate transition plan. Our Paris Aligned Fossil Fuel Policy describes the criteria used to identify companies with credible transition plans.

Additional exclusions to further limit negative externalities were applied to the investment universe of the fund, to avoid investment in companies that were involved in thermal coal or production of fossil fuels from oil sands and arctic drilling, as well as controversial weapons, and pornography.

The data on PAI indicators needed for the DNSH test was sourced from third party data providers.

- Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Alignment of the sustainable investments with the OECD guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights was confirmed as part of the process to identify sustainable investments using the Violations of the UNGC and OECD principles indicator.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the fund that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this fund do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The specific PAI indicators that were taken into consideration for this fund were:

CLIMATE AND OTHER ENVIRONMENT-RELATED INDICATORS

Adverse Sustainability Indicator	Metric	Metric Value	Eligibility	Coverage

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The product contains investments with both an environmental and a social objective. A single investment can both contribute to an environmental and a social objective resulting in a total allocation amounting to more than 100 per cent. There is no prioritisation of environmental and social objectives, and the strategy does not target any specific allocation or minimum proportion for either of these categories. The investment process accommodates the combination of environmental and social objectives by allowing the investment manager the flexibility to allocate between these based on availability and attractiveness of investment opportunities.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

☒ Yes:

☐ In fossil gas

☒ In nuclear energy

☐ No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

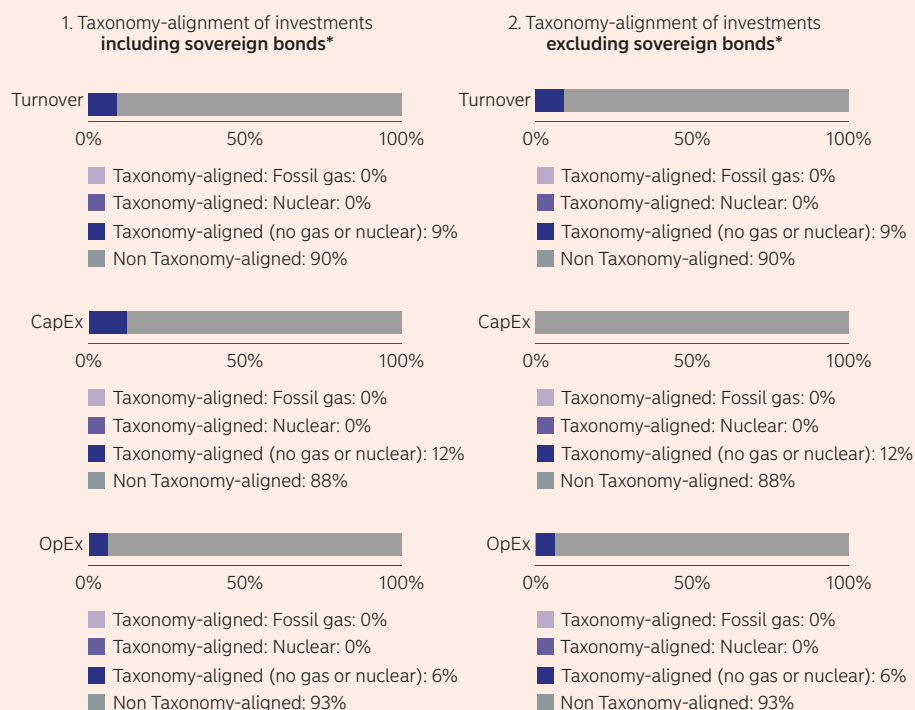

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

There is no data available for the reporting period to confirm that the financial product invested in any fossil fuel gas and/or nuclear energy related activities that comply with the EU Taxonomy.

Assessment on Taxonomy alignment is currently conducted with data from third party providers as well as self-reported data from investee companies when available. Proprietary tools and processes to measure significant harm and minimum social safeguards have been developed.

The methodology applied by the third-party data providers assesses how companies are involved in economic activities that substantially contribute to an environmental objective while not significantly harming other sustainable objectives and meeting minimum social safeguards. Taxonomy-alignment of the investment is based on the percentage of turnover exposed or potentially exposed to taxonomy-aligned activities. Data providers' methodologies vary and results may not be fully aligned as long as publicly reported company data is still lacking and assessments rely largely on equivalent data.

We prioritise the use of self-reported data where available. Where data providers are used to deliver equivalent data, NAM has conducted due diligence on the data provider's methodology. Out of caution, unless we are able to confirm available data for the majority of the portfolio's holdings, we will report 0 (zero) per cent of Taxonomy-Aligned Investments.

The compliance of the investments with the EU Taxonomy has not been subject to an assurance by auditors or a review by third parties. Data provider methodologies vary and results may not be fully aligned as long as publicly reported data is still lacking.

● ***What was the share of investments made in transitional and enabling activities?***

Type of Activity	Assets
Transitional activities	0.22 %
Enabling activities	3.52 %
Sum	3.74 %

● ***How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?***

Reference Period	Taxonomy-Aligned Investments
2024	9.58 %
2023	0.00 %
2022	0.00 %

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 51 %.

What was the share of socially sustainable investments?

The share of socially sustainable investments was 46 %.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

Cash may have been held as ancillary liquidity or for risk balancing purposes. The fund may have used derivatives and other techniques for the purposes described in the “Fund Descriptions” in the prospectus. This category may also have included securities for which relevant data is not available. Minimum environmental or social safeguards were not applicable.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this fund have been monitored and documented on an ongoing basis.

How did this financial product perform compared to the reference benchmark?

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

ANNEX IV

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Nordea 2 - European Responsible Enhanced Equity Fund
Legal entity identifier: 549300ZCJ2HQU88XH69

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

☒ ☒ ☐ Yes

☒ ☐ ☒ No

☐ It made **sustainable investments with an environmental objective:** ____%

☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It made **sustainable investments with a social objective:** ____%

☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 72 % of sustainable investments

☒ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☒ with a social objective

☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The E/S characteristics promoted could have been environmental and/or social and included the following features:

Minimum proportion of sustainable investments The fund promoted E/S characteristics by partially investing in companies and issuers involved in activities that contributed to an environmental or social objective as outlined in UN Sustainable Development Goals (SDGs) and/or the EU Taxonomy, while not significantly harming any other environmental or social objectives and following good governance practices.

ESG rating The fund promoted E/S characteristics by investing in companies or issuers with favourable ESG ratings. Investee companies or issuers had been rated by a selected external provider to ensure that only securities issued by companies that met the minimum required ESG rating were eligible for inclusion and that ESG laggards were excluded.

The average market value weighted ESG rating on equity holdings was measured and controlled against a minimum threshold.

Sector- and value-based exclusions The fund promoted E/S characteristics by excluding companies that were deemed to be inappropriate based on their business activities or corporate behaviour.

Nordea Asset Management's Paris-Aligned Fossil Fuel Policy The fund promoted E/S characteristics by refraining from investing in companies that had significant exposure to fossil fuels unless they had a credible transition strategy.

Carbon footprint scope 1 & 2 limit The fund promoted E/S characteristics by maintaining the total carbon footprint of the fund's investments at least 25% below the total carbon footprint of the reference benchmark. The carbon footprint was measured by the scope 1 and 2 greenhouse gas emissions.

There was no reference benchmark designated for the purpose of attaining the E/S characteristics of the fund.

● **How did the sustainability indicators perform?**

Sustainability Indicator	Metric	Metric Value	Eligibility	Coverage
% of sustainable investments	% of sustainable investments	73.65 %	99.50 %	99.43 %
% of Investments, aligned with the E/S characteristics, with an ESG rating that do not meet the minimum threshold	% of Investments, aligned with the E/S characteristics, with an ESG rating that do not meet the minimum threshold	0.00 %	99.46 %	99.46 %
% of investments, aligned with the E/S characteristics, that do not comply with sector- and value based exclusions	% of investments, aligned with the E/S characteristics, that do not comply with sector- and value based exclusions	0.00 %	99.46 %	99.46 %
% of investments, aligned with the E/S characteristics, that do not comply with NAM's Paris-Aligned Fossil Fuel Policy	% of investments, aligned with the E/S characteristics, that do not comply with NAM's Paris-Aligned Fossil Fuel Policy	0.00 %	99.46 %	99.46 %
Relative carbon footprint scope 1 and 2	Relative carbon footprint scope 1 and 2	-33.80 %	99.46 %	99.46 %

Eligibility: The proportion of the assets in the financial product (relative to NAV), which are in scope for the indicator.

Coverage: The proportion of the assets in the financial product (relative to NAV), where data is available to present the indicator.

Eligibility: The proportion of the assets in the financial product (relative to NAV), which are in scope for the indicator.

Coverage: The proportion of the assets in the financial product (relative to NAV), where data is available to present the indicator.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The objective of the sustainable investments that the fund partially made, was to contribute to one or several of the UN SDGs or alternatively be involved in Taxonomy-aligned activities. Sustainable investments contributed to the objectives through the fund's investments in companies where a minimum of 20% of their activity could be linked to economic activities supporting an environmentally-sustainable objective defined in the EU Taxonomy, or an environmental or social objective belonging to the list of UN SDGs.

The UN SDGs are a set of 17 Sustainable Development Goals adopted by the United Nations in 2015 as a call for action to end poverty, protect the planet, and ensure peace and prosperity by 2030.

The EU Taxonomy provides a framework for assessment of environmentally sustainable economic activities and lists economic activities that are considered environmentally sustainable in the context of the European Green Deal.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

As part of the process to identify sustainable investments, companies were screened to ensure that they did not significantly harm (DNSH test) any other social or environmental objectives. The DNSH test used PAI indicators, as described below, to identify and exclude companies that do not pass the thresholds.

- How were the indicators for adverse impacts on sustainability factors taken into account?

The DNSH test, as part of the methodology to identify sustainable investments, identified negative outliers and poor performance related to PAI indicators. The investment manager considered the PAI indicators from Table 1, annex 1 in the SFDR RTS. In the reporting period, data was mainly available for the use of the below indicators.

Climate and other environment related indicators:

- Greenhouse Gas emissions
- Biodiversity impact
- Emissions to water
- Hazardous waste

Indicators for social and employee, respect for human rights, anti-corruption and anti-bribery matters:

- Violations of the UNGC and OECD principles
- Board gender diversity
- Exposure to controversial weapons
- Severe human rights issues and incidents

Companies that did not pass the thresholds that were defined by the investment manager, did not qualify as a sustainable investment. This included companies that were involved in severe human rights incidents, severe controversies related to biodiversity or violations of the UNGC and OECD principles.

Companies also failed the DNSH test if they were among the worst performers on emissions to water, hazardous waste or Greenhouse Gas emissions. In addition, companies that derived more than 0% of revenue from unconventional fossil fuel failed the DNSH test, and companies that derived more than 5% from conventional fossil fuel or more than 50% from services specific to the fossil fuel industry only passed the DNSH test if they were below the climate related exclusions criteria of the EU Paris Aligned Benchmark with revenue thresholds of 1% for coal, 10% for oil, 50% for natural gas and 50% for fossil fuel based electricity generation, and had a climate transition plan. Our Paris Aligned Fossil Fuel Policy describes the criteria used to identify companies with credible transition plans.

Additional exclusions to further limit negative externalities were applied to the investment universe of the fund, to avoid investment in companies that were involved in thermal coal or production of fossil fuels from oil sands and arctic drilling, as well as controversial weapons, and pornography.

The data on PAI indicators needed for the DNSH test was sourced from third party data providers.

- Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Alignment of the sustainable investments with the OECD guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights was confirmed as part of the process to identify sustainable investments using the Violations of the UNGC and OECD principles indicator.

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the fund that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this fund do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The specific PAI indicators that were taken into consideration for this fund were:

CLIMATE AND OTHER ENVIRONMENT-RELATED INDICATORS

Adverse Sustainability Indicator	Metric	Metric Value	Eligibility	Coverage
Greenhouse gas "GHG" emissions	GHG emissions	Scope 1 GHG emissions	7,269 tCO ₂ e	99.46 %

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The product contains investments with both an environmental and a social objective. A single investment can both contribute to an environmental and a social objective resulting in a total allocation amounting to more than 100 per cent. There is no prioritisation of environmental and social objectives, and the strategy does not target any specific allocation or minimum proportion for either of these categories. The investment process accommodates the combination of environmental and social objectives by allowing the investment manager the flexibility to allocate between these based on availability and attractiveness of investment opportunities.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

- **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?**

Yes:

In fossil gas

In nuclear energy

No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

There is no data available for the reporting period to confirm that the financial product invested in any fossil fuel gas and/or nuclear energy related activities that comply with the EU Taxonomy.

Assessment on Taxonomy alignment is currently conducted with data from third party providers as well as self-reported data from investee companies when available. Proprietary tools and processes to measure significant harm and minimum social safeguards have been developed.

The methodology applied by the third-party data providers assesses how companies are involved in economic activities that substantially contribute to an environmental objective while not significantly harming other sustainable objectives and meeting minimum social safeguards. Taxonomy-alignment of the investment is based on the percentage of turnover exposed or potentially exposed to taxonomy-aligned activities. Data providers' methodologies vary and results may not be fully aligned as long as publicly reported company data is still lacking and assessments rely largely on equivalent data.

We prioritise the use of self-reported data where available. Where data providers are used to deliver equivalent data, NAM has conducted due diligence on the data provider's methodology. Out of caution, unless we are able to confirm available data for the majority of the portfolio's holdings, we will report 0 (zero) per cent of Taxonomy-Aligned Investments.

The compliance of the investments with the EU Taxonomy has not been subject to an assurance by auditors or a review by third parties. Data provider methodologies vary and results may not be fully aligned as long as publicly reported data is still lacking.

● ***What was the share of investments made in transitional and enabling activities?***

Type of Activity	Assets
Transitional activities	0.27 %
Enabling activities	2.51 %
Sum	2.78 %

● ***How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?***

Reference Period	Taxonomy-Aligned Investments
2024	4.14 %
2023	0.00 %
2022	0.00 %

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 51 %.

What was the share of socially sustainable investments?

The share of socially sustainable investments was 57 %.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

Cash may have been held as ancillary liquidity or for risk balancing purposes. The fund may have used derivatives and other techniques for the purposes described in the “Fund Descriptions” in the prospectus. This category may also have included securities for which relevant data is not available. Minimum environmental or social safeguards were not applicable.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this fund have been monitored and documented on an ongoing basis.

How did this financial product perform compared to the reference benchmark?

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

ANNEX IV

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Nordea 2 - Global Developed Responsible Enhanced Equity Fund
Legal entity identifier: 254900JDPZF3RH20W842

Environmental and/or social characteristics

Sustainable investment

means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

☒ ☒ ☐ Yes

☒ ☐ ☒ No

☐ It made **sustainable investments with an environmental objective:** ____%

☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It made **sustainable investments with a social objective:** ____%

☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 74 % of sustainable investments

☒ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☒ with a social objective

☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The E/S characteristics promoted could have been environmental and/or social and included the following features:

Minimum proportion of sustainable investments The fund promoted E/S characteristics by partially investing in companies and issuers involved in activities that contributed to an environmental or social objective as outlined in UN Sustainable Development Goals (SDGs) and/or the EU Taxonomy, while not significantly harming any other environmental or social objectives and following good governance practices.

ESG rating The fund promoted E/S characteristics by investing in companies or issuers with favourable ESG ratings. Investee companies or issuers had been rated by a selected external provider to ensure that only securities issued by companies that met the minimum required ESG rating were eligible for inclusion and that ESG laggards were excluded.

Sector- and value-based exclusions The fund promoted E/S characteristics by excluding companies that were deemed to be inappropriate based on their business activities or corporate behaviour.

Nordea Asset Management's Paris-Aligned Fossil Fuel Policy The fund promoted E/S characteristics by refraining from investing in companies that had significant exposure to fossil fuels unless they had a credible transition strategy.

Carbon footprint scope 1 & 2 limit The fund promoted E/S characteristics by maintaining the total carbon footprint of the fund's investments at least 25% below the total carbon footprint of the reference benchmark. The carbon footprint was measured by the scope 1 and 2 greenhouse gas emissions.

There was no reference benchmark designated for the purpose of attaining the E/S characteristics of the fund.

● **How did the sustainability indicators perform?**

Sustainability Indicator	Metric	Metric Value	Eligibility	Coverage
% of sustainable investments	% of sustainable investments	74.90 %	99.58 %	99.47 %
% of Investments, aligned with the E/S characteristics, with an ESG rating that do not meet the minimum threshold	% of Investments, aligned with the E/S characteristics, with an ESG rating that do not meet the minimum threshold	0.00 %	99.55 %	99.55 %
% of investments, aligned with the E/S characteristics, that do not comply with sector- and value based exclusions	% of investments, aligned with the E/S characteristics, that do not comply with sector- and value based exclusions	0.00 %	99.55 %	99.55 %
% of investments, aligned with the E/S characteristics, that do not comply with NAM's Paris-Aligned Fossil Fuel Policy	% of investments, aligned with the E/S characteristics, that do not comply with NAM's Paris-Aligned Fossil Fuel Policy	0.00 %	99.55 %	99.55 %
Relative carbon footprint scope 1 and 2	Relative carbon footprint scope 1 and 2	-35.69 %	99.55 %	99.55 %

Eligibility: The proportion of the assets in the financial product (relative to NAV), which are in scope for the indicator.

Coverage: The proportion of the assets in the financial product (relative to NAV), where data is available to present the indicator.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The objective of the sustainable investments that the fund partially made, was to contribute to one or several of the UN SDGs or alternatively be involved in Taxonomy-aligned activities. Sustainable investments contributed to the objectives through the fund's investments in companies where a minimum of 20% of their activity could be linked to economic activities supporting an environmentally-sustainable objective defined in the EU Taxonomy, or an environmental or social objective belonging to the list of UN SDGs.

The UN SDGs are a set of 17 Sustainable Development Goals adopted by the United Nations in 2015 as a call for action to end poverty, protect the planet, and ensure peace and prosperity by 2030.

The EU Taxonomy provides a framework for assessment of environmentally sustainable economic activities and lists economic activities that are considered environmentally sustainable in the context of the European Green Deal.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

As part of the process to identify sustainable investments, companies were screened to ensure that they did not significantly harm (DNSH test) any other social or environmental objectives. The DNSH test used PAI indicators, as described below, to identify and exclude companies that do not pass the thresholds.

- How were the indicators for adverse impacts on sustainability factors taken into account?

The DNSH test, as part of the methodology to identify sustainable investments, identified negative outliers and poor performance related to PAI indicators. The investment manager considered the PAI indicators from Table 1, annex 1 in the SFDR RTS. In the reporting period, data was mainly available for the use of the below indicators.

Climate and other environment related indicators:

- Greenhouse Gas emissions
- Biodiversity impact
- Emissions to water
- Hazardous waste

Indicators for social and employee, respect for human rights, anti-corruption and anti-bribery matters:

- Violations of the UNGC and OECD principles
- Board gender diversity
- Exposure to controversial weapons
- Severe human rights issues and incidents

Companies that did not pass the thresholds that were defined by the investment manager, did not qualify as a sustainable investment. This included companies that were involved in severe human rights incidents, severe controversies related to biodiversity or violations of the UNGC and OECD principles.

Companies also failed the DNSH test if they were among the worst performers on emissions to water, hazardous waste or Greenhouse Gas emissions. In addition, companies that derived more than 0% of revenue from unconventional fossil fuel failed the DNSH test, and companies that derived more than 5% from conventional fossil fuel or more than 50% from services specific to the fossil fuel industry only passed the DNSH test if they were below the climate related exclusions criteria of the EU Paris Aligned Benchmark with revenue thresholds of 1% for coal, 10% for oil, 50% for natural gas and 50% for fossil fuel based electricity generation, and had a climate transition plan. Our Paris Aligned Fossil Fuel Policy describes the criteria used to identify companies with credible transition plans.

Additional exclusions to further limit negative externalities were applied to the investment universe of the fund, to avoid investment in companies that were involved in thermal coal or production of fossil fuels from oil sands and arctic drilling, as well as controversial weapons, and pornography.

The data on PAI indicators needed for the DNSH test was sourced from third party data providers.

- Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Alignment of the sustainable investments with the OECD guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights was confirmed as part of the process to identify sustainable investments using the Violations of the UNGC and OECD principles indicator.

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the fund that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this fund do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The specific PAI indicators that were taken into consideration for this fund were:

CLIMATE AND OTHER ENVIRONMENT-RELATED INDICATORS

Adverse Sustainability Indicator		Metric	Metric Value	Eligibility	Coverage
Greenhouse gas "GHG" emissions	GHG emissions	Scope 1 GHG emissions	47,013 tCO2e	99.55 %	99.55 %
		Scope 2 GHG emissions	19,670 tCO2e	99.55 %	99.55 %

United Rentals	Consumer, Non-cyclical	1.03 %	United States
Visa	Financial	1.01 %	United States
Broadcom	Technology	1.01 %	United States
Manulife Financial	Financial	0.95 %	Canada
Snap-on	Industrial	0.89 %	United States

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The product contains investments with both an environmental and a social objective. A single investment can both contribute to an environmental and a social objective resulting in a total allocation amounting to more than 100 per cent. There is no prioritisation of environmental and social objectives, and the strategy does not target any specific allocation or minimum proportion for either of these categories. The investment process accommodates the combination of environmental and social objectives by allowing the investment manager the flexibility to allocate between these based on availability and attractiveness of investment opportunities.

Coverage: The proportion of the assets in the financial product (relative to NAV), where data is available to present the indicator.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The objective of the sustainable investments that the fund partially made, was to contribute to one or several of the UN SDGs or alternatively be involved in Taxonomy-aligned activities. Sustainable investments contributed to the objectives through the fund's investments in companies where a minimum of 20% of their activity could be linked to economic activities supporting an environmentally-sustainable objective defined in the EU Taxonomy, or an environmental or social objective belonging to the list of UN SDGs.

The UN SDGs are a set of 17 Sustainable Development Goals adopted by the United Nations in 2015 as a call for action to end poverty, protect the planet, and ensure peace and prosperity by 2030.

The EU Taxonomy provides a framework for assessment of environmentally sustainable economic activities and lists economic activities that are considered environmentally sustainable in the context of the European Green Deal.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

As part of the process to identify sustainable investments, companies were screened to ensure that they did not significantly harm (DNSH test) any other social or environmental objectives. The DNSH test used PAI indicators, as described below, to identify and exclude companies that do not pass the thresholds.

- How were the indicators for adverse impacts on sustainability factors taken into account?

The DNSH test, as part of the methodology to identify sustainable investments, identified negative outliers and poor performance related to PAI indicators. The investment manager considered the PAI indicators from Table 1, annex 1 in the SFDR RTS. In the reporting period, data was mainly available for the use of the below indicators.

Climate and other environment related indicators:

- Greenhouse Gas emissions
- Biodiversity impact
- Emissions to water
- Hazardous waste

Indicators for social and employee, respect for human rights, anti-corruption and anti-bribery matters:

- Violations of the UNGC and OECD principles
- Board gender diversity
- Exposure to controversial weapons
- Severe human rights issues and incidents

Companies that did not pass the thresholds that were defined by the investment manager, did not qualify as a sustainable investment. This included companies that were involved in severe human rights incidents, severe controversies related to biodiversity or violations of the UNGC and OECD principles.

Companies also failed the DNSH test if they were among the worst performers on emissions to water, hazardous waste or Greenhouse Gas emissions. In addition, companies that derived more than 0% of revenue from unconventional fossil fuel failed the DNSH test, and companies that derived more than 5% from conventional fossil fuel or more than 50% from services specific to the fossil fuel industry only passed the DNSH test if they were below the climate related exclusions criteria of the EU Paris Aligned Benchmark with revenue thresholds of 1% for coal, 10% for oil, 50% for natural gas and 50% for fossil fuel based electricity generation, and had a climate transition plan. Our Paris Aligned Fossil Fuel Policy describes the criteria used to identify companies with credible transition plans.

Additional exclusions to further limit negative externalities were applied to the investment universe of the fund, to avoid investment in companies that were involved in thermal coal or production of fossil fuels from oil sands and arctic drilling, as well as controversial weapons, and pornography.

The data on PAI indicators needed for the DNSH test was sourced from third party data providers.

- Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Alignment of the sustainable investments with the OECD guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights was confirmed as part of the process to identify sustainable investments using the Violations of the UNGC and OECD principles indicator.

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the fund that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this fund do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The specific PAI indicators that were taken into consideration for this fund were:

CLIMATE AND OTHER ENVIRONMENT-RELATED INDICATORS

Adverse Sustainability Indicator	Metric	Metric Value	Eligibility	Coverage
Greenhouse gas "GHG" emissions	GHG emissions	Scope 1 GHG emissions	334 tCO ₂ e	99.44 %

	Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	Share of investments in investee companies without policies to monitor compliance with the UNGC principles or OECD Guidelines for Multinational Enterprises or grievance / complaints handling mechanisms to address violations of the UNGC principles or OECD Guidelines for Multinational Enterprises	0.00 % without policies	99.44 %
	Unadjusted gender pay gap	Average unadjusted gender pay gap of investee companies	11.07 % pay gap	99.44 %
	Board gender diversity	Average ratio of female to male board members in investee companies, expressed as a percentage of all board members	34.13 % (female directors / total directors)	99.44 %
	Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	Share of investments in investee companies involved in the manufacture or selling of controversial weapons	0.00 % involvement	99.44 %

Eligibility: The proportion of the assets in the financial product (relative to NAV), which are in scope for the indicator.

Coverage: The proportion of the assets in the financial product (relative to NAV), where data is available to present the indicator.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 1 January 2024 - 31 December 2024

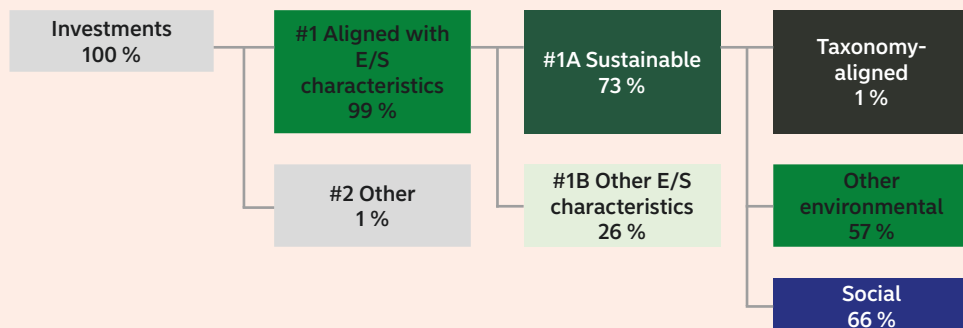

Largest investments	Sector	Assets	Country
NVIDIA	Technology	5.05 %	United States
S&P Global	Consumer, Non-cyclical	5.05 %	United States
Mastercard	Financial	4.54 %	United States
Linde	Basic Materials	4.31 %	United States
Alphabet	Communications	4.02 %	United States
Atlas Copco A	Industrial	3.97 %	Sweden
UnitedHealth Group	Consumer, Non-cyclical	3.59 %	United States
Airbnb	Communications	3.56 %	United States
Costco Wholesale	Consumer, Cyclical	3.54 %	United States
Roper Technologies	Technology	3.51 %	United States
O'Reilly Automotive	Consumer, Cyclical	3.47 %	United States
Home Depot	Consumer, Cyclical	3.46 %	United States

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The product contains investments with both an environmental and a social objective. A single investment can both contribute to an environmental and a social objective resulting in a total allocation amounting to more than 100 per cent. There is no prioritisation of environmental and social objectives, and the strategy does not target any specific allocation or minimum proportion for either of these categories. The investment process accommodates the combination of environmental and social objectives by allowing the investment manager the flexibility to allocate between these based on availability and attractiveness of investment opportunities.

● *In which economic sectors were the investments made?*

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

- **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?**

Yes:

In fossil gas

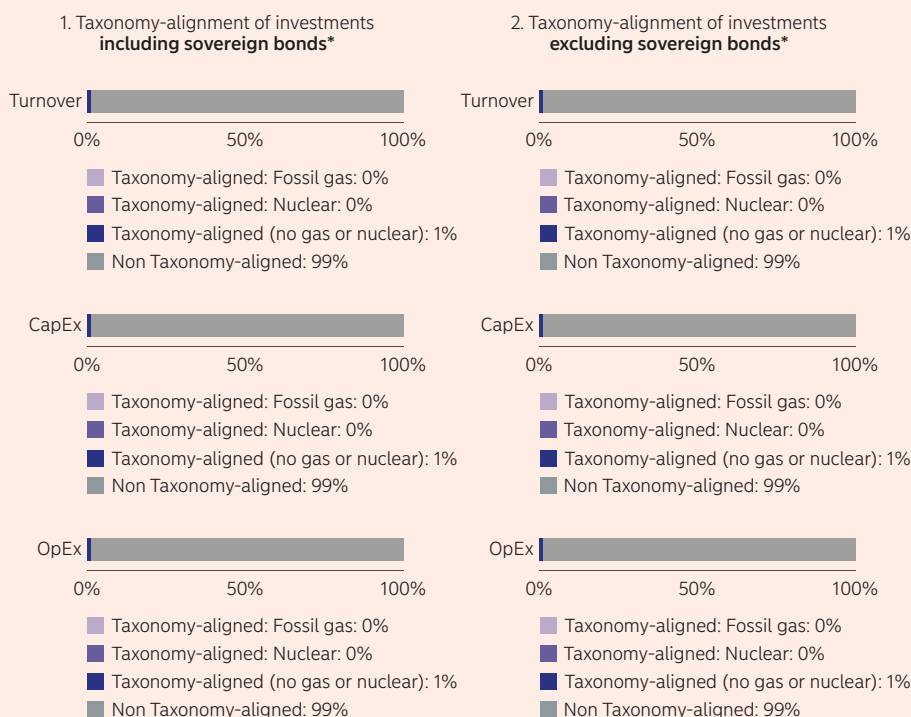

In nuclear energy

No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

There is no data available for the reporting period to confirm that the financial product invested in any fossil fuel gas and/or nuclear energy related activities that comply with the EU Taxonomy.

Assessment on Taxonomy alignment is currently conducted with data from third party providers as well as self-reported data from investee companies when available. Proprietary tools and processes to measure significant harm and minimum social safeguards have been developed.

The methodology applied by the third-party data providers assesses how companies are involved in economic activities that substantially contribute to an environmental objective while not significantly harming other sustainable objectives and meeting minimum social safeguards. Taxonomy-alignment of the investment is based on the percentage of turnover exposed or potentially exposed to taxonomy-aligned activities. Data providers' methodologies vary and results may not be fully aligned as long as publicly reported company data is still lacking and assessments rely largely on equivalent data.

We prioritise the use of self-reported data where available. Where data providers are used to deliver equivalent data, NAM has conducted due diligence on the data provider's methodology. Out of caution, unless we are able to confirm available data for the majority of the portfolio's holdings, we will report 0 (zero) per cent of Taxonomy-Aligned Investments.

The compliance of the investments with the EU Taxonomy has not been subject to an assurance by auditors or a review by third parties. Data provider methodologies vary and results may not be fully aligned as long as publicly reported data is still lacking.

● ***What was the share of investments made in transitional and enabling activities?***

Type of Activity	Assets
Transitional activities	0.00 %
Enabling activities	0.53 %
Sum	0.53 %

● ***How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?***

Reference Period	Taxonomy-Aligned Investments
2024	0.63 %
2023	0.00 %
2022	0.00 %

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 57 %.

What was the share of socially sustainable investments?

The share of socially sustainable investments was 66 %.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

Cash may have been held as ancillary liquidity or for risk balancing purposes. The fund may have used derivatives and other techniques for the purposes described in the “Fund Descriptions” in the prospectus. This category may also have included securities for which relevant data is not available. Minimum environmental or social safeguards were not applicable.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this fund have been monitored and documented on an ongoing basis.

How did this financial product perform compared to the reference benchmark?

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

ANNEX IV

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Nordea 2 - Global Responsible Enhanced Equity Fund

Legal entity identifier: 549300W1JV4Z4T54GM32

Environmental and/or social characteristics

Sustainable investment

means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

☒ ☒ ☐ Yes

☒ ☐ ☒ No

☐ It made **sustainable investments with an environmental objective:** ____%

☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It made **sustainable investments with a social objective:** ____%

☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 74 % of sustainable investments

☒ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☒ with a social objective

☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The E/S characteristics promoted could have been environmental and/or social and included the following features:

Minimum proportion of sustainable investments The fund promoted E/S characteristics by partially investing in companies and issuers involved in activities that contributed to an environmental or social objective as outlined in UN Sustainable Development Goals (SDGs) and/or the EU Taxonomy, while not significantly harming any other environmental or social objectives and following good governance practices.

ESG rating The fund promoted E/S characteristics by investing in companies or issuers with favourable ESG ratings. Investee companies or issuers had been rated by a selected external provider to ensure that only securities issued by companies that met the minimum required ESG rating were eligible for inclusion and that ESG laggards were excluded.

Sector- and value-based exclusions The fund promoted E/S characteristics by excluding companies that were deemed to be inappropriate based on their business activities or corporate behaviour.

Nordea Asset Management's Paris-Aligned Fossil Fuel Policy The fund promoted E/S characteristics by refraining from investing in companies that had significant exposure to fossil fuels unless they had a credible transition strategy.

Carbon footprint scope 1 & 2 limit The fund promoted E/S characteristics by maintaining the total carbon footprint of the fund's investments at least 25% below the total carbon footprint of the reference benchmark. The carbon footprint was measured by the scope 1 and 2 greenhouse gas emissions.

There was no reference benchmark designated for the purpose of attaining the E/S characteristics of the fund.

● **How did the sustainability indicators perform?**

Sustainability Indicator	Metric	Metric Value	Eligibility	Coverage
% of sustainable investments	% of sustainable investments	74.48 %	99.69 %	99.62 %

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The objective of the sustainable investments that the fund partially made, was to contribute to one or several of the UN SDGs or alternatively be involved in Taxonomy-aligned activities. Sustainable investments contributed to the objectives through the fund's investments in companies where a minimum of 20% of their activity could be linked to economic activities supporting an environmentally-sustainable objective defined in the EU Taxonomy, or an environmental or social objective belonging to the list of UN SDGs.

The UN SDGs are a set of 17 Sustainable Development Goals adopted by the United Nations in 2015 as a call for action to end poverty, protect the planet, and ensure peace and prosperity by 2030.

The EU Taxonomy provides a framework for assessment of environmentally sustainable economic activities and lists economic activities that are considered environmentally sustainable in the context of the European Green Deal.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

As part of the process to identify sustainable investments, companies were screened to ensure that they did not significantly harm (DNSH test) any other social or environmental objectives. The DNSH test used PAI indicators, as described below, to identify and exclude companies that do not pass the thresholds.

- ***How were the indicators for adverse impacts on sustainability factors taken into account?***

The DNSH test, as part of the methodology to identify sustainable investments, identified negative outliers and poor performance related to PAI indicators. The investment manager considered the PAI indicators from Table 1, annex 1 in the SFDR RTS. In the reporting period, data was mainly available for the use of the below indicators.

Climate and other environment related indicators:

- Greenhouse Gas emissions
- Biodiversity impact
- Emissions to water
- Hazardous waste

Indicators for social and employee, respect for human rights, anti-corruption and anti-bribery matters:

- Violations of the UNGC and OECD principles
- Board gender diversity
- Exposure to controversial weapons
- Severe human rights issues and incidents

Companies that did not pass the thresholds that were defined by the investment manager, did not qualify as a sustainable investment. This included companies that were involved in severe human rights incidents, severe controversies related to biodiversity or violations of the UNGC and OECD principles.

Companies also failed the DNSH test if they were among the worst performers on emissions to water, hazardous waste or Greenhouse Gas emissions. In addition, companies that derived more than 0% of revenue from unconventional fossil fuel failed the DNSH test, and companies that derived more than 5% from conventional fossil fuel or more than 50% from services specific to the fossil fuel industry only passed the DNSH test if they were below the climate related exclusions criteria of the EU Paris Aligned Benchmark with revenue thresholds of 1% for coal, 10% for oil, 50% for natural gas and 50% for fossil fuel based electricity generation, and had a climate transition plan. Our Paris Aligned Fossil Fuel Policy describes the criteria used to identify companies with credible transition plans.

Additional exclusions to further limit negative externalities were applied to the investment universe of the fund, to avoid investment in companies that were involved in thermal coal or production of fossil fuels from oil sands and arctic drilling, as well as controversial weapons, and pornography.

The data on PAI indicators needed for the DNSH test was sourced from third party data providers.

- Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Alignment of the sustainable investments with the OECD guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights was confirmed as part of the process to identify sustainable investments using the Violations of the UNGC and OECD principles indicator.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the fund that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this fund do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The specific PAI indicators that were taken into consideration for this fund were:

CLIMATE AND OTHER ENVIRONMENT-RELATED INDICATORS

Adverse Sustainability Indicator	Metric	Metric Value	Eligibility	Coverage
Greenhouse gas "GHG" emissions	Scope 1 GHG emissions	122,347 tCO ₂ e	99.56 %	99.56 %

HCA Healthcare	Consumer, Non-cyclical	0.87 %	United States

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The product contains investments with both an environmental and a social objective. A single investment can both contribute to an environmental and a social objective resulting in a total allocation amounting to more than 100 per cent. There is no prioritisation of environmental and social objectives, and the strategy does not target any specific allocation or minimum proportion for either of these categories. The investment process accommodates the combination of environmental and social objectives by allowing the investment manager the flexibility to allocate between these based on availability and attractiveness of investment opportunities.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

- **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?**

Yes:

In fossil gas

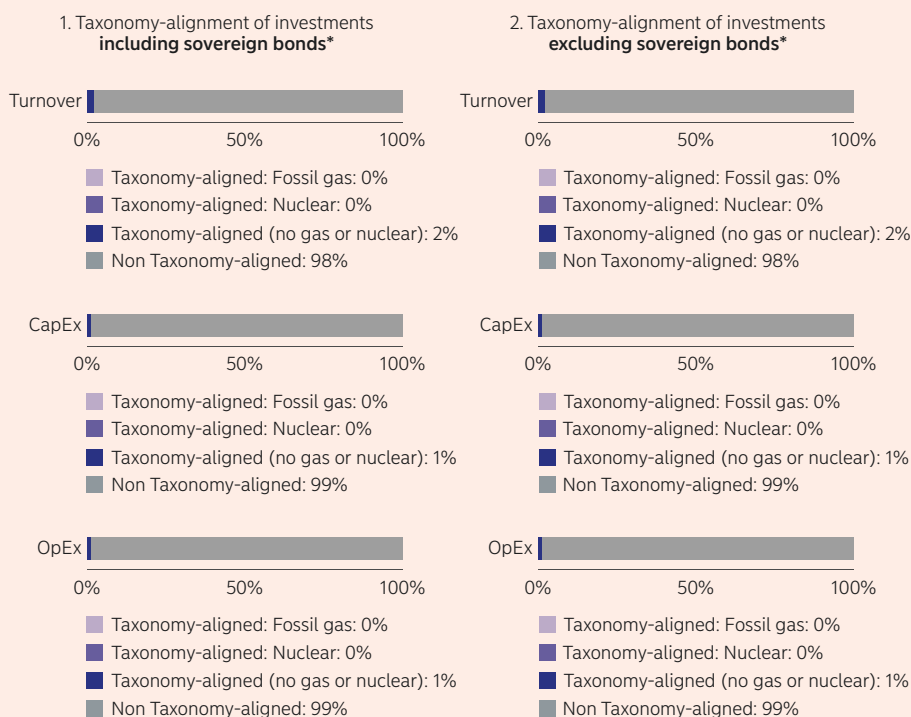

In nuclear energy

No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

There is no data available for the reporting period to confirm that the financial product invested in any fossil fuel gas and/or nuclear energy related activities that comply with the EU Taxonomy.

Assessment on Taxonomy alignment is currently conducted with data from third party providers as well as self-reported data from investee companies when available. Proprietary tools and processes to measure significant harm and minimum social safeguards have been developed.

The methodology applied by the third-party data providers assesses how companies are involved in economic activities that substantially contribute to an environmental objective while not significantly harming other sustainable objectives and meeting minimum social safeguards. Taxonomy-alignment of the investment is based on the percentage of turnover exposed or potentially exposed to taxonomy-aligned activities. Data providers' methodologies vary and results may not be fully aligned as long as publicly reported company data is still lacking and assessments rely largely on equivalent data.

We prioritise the use of self-reported data where available. Where data providers are used to deliver equivalent data, NAM has conducted due diligence on the data provider's methodology. Out of caution, unless we are able to confirm available data for the majority of the portfolio's holdings, we will report 0 (zero) per cent of Taxonomy-Aligned Investments.

The compliance of the investments with the EU Taxonomy has not been subject to an assurance by auditors or a review by third parties. Data provider methodologies vary and results may not be fully aligned as long as publicly reported data is still lacking.

● ***What was the share of investments made in transitional and enabling activities?***

Type of Activity	Assets
Transitional activities	0.04 %
Enabling activities	0.83 %
Sum	0.87 %

● ***How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?***

Reference Period	Taxonomy-Aligned Investments
2024	2.03 %
2023	0.00 %
2022	0.00 %

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 62 %.

What was the share of socially sustainable investments?

The share of socially sustainable investments was 59 %.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

Cash may have been held as ancillary liquidity or for risk balancing purposes. The fund may have used derivatives and other techniques for the purposes described in the “Fund Descriptions” in the prospectus. This category may also have included securities for which relevant data is not available. Minimum environmental or social safeguards were not applicable.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this fund have been monitored and documented on an ongoing basis.

How did this financial product perform compared to the reference benchmark?

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

ANNEX IV

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Nordea 2 - Global Responsible Enhanced Small Cap Fund

Legal entity identifier: 54930005P61E978YSE05

Environmental and/or social characteristics

Sustainable investment

means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

☒ ☒ ☐ Yes

☒ ☐ ☒ No

☐ It made **sustainable investments with an environmental objective:** ____%

☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It made **sustainable investments with a social objective:** ____%

☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 71 % of sustainable investments

☒ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☒ with a social objective

☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The E/S characteristics promoted could have been environmental and/or social and included the following features:

Minimum proportion of sustainable investments The fund promoted E/S characteristics by partially investing in companies and issuers involved in activities that contributed to an environmental or social objective as outlined in UN Sustainable Development Goals (SDGs) and/or the EU Taxonomy, while not significantly harming any other environmental or social objectives and following good governance practices.

ESG rating The fund promoted E/S characteristics by investing in companies or issuers with favourable ESG ratings. Investee companies or issuers had been rated by a selected external provider to ensure that only securities issued by companies that met the minimum required ESG rating were eligible for inclusion and that ESG laggards were excluded.

Sector- and value-based exclusions The fund promoted E/S characteristics by excluding companies that were deemed to be inappropriate based on their business activities or corporate behaviour.

Nordea Asset Management's Paris-Aligned Fossil Fuel Policy The fund promoted E/S characteristics by refraining from investing in companies that had significant exposure to fossil fuels unless they had a credible transition strategy.

Carbon footprint scope 1 & 2 limit The fund promoted E/S characteristics by maintaining the total carbon footprint of the fund's investments at least 25% below the total carbon footprint of the reference benchmark. The carbon footprint was measured by the scope 1 and 2 greenhouse gas emissions.

There was no reference benchmark designated for the purpose of attaining the E/S characteristics of the fund.

● **How did the sustainability indicators perform?**

Sustainability Indicator	Metric	Metric Value	Eligibility	Coverage
% of sustainable investments	% of sustainable investments	71.14 %	99.46 %	99.43 %
% of Investments, aligned with the E/S characteristics, with an ESG rating that do not meet the minimum threshold	% of Investments, aligned with the E/S characteristics, with an ESG rating that do not meet the minimum threshold	0.00 %	99.46 %	99.46 %
% of investments, aligned with the E/S characteristics, that do not comply with sector- and value based exclusions	% of investments, aligned with the E/S characteristics, that do not comply with sector- and value based exclusions	0.00 %	99.46 %	99.46 %
% of investments, aligned with the E/S characteristics, that do not comply with NAM's Paris-Aligned Fossil Fuel Policy	% of investments, aligned with the E/S characteristics, that do not comply with NAM's Paris-Aligned Fossil Fuel Policy	0.00 %	99.46 %	99.46 %
Relative carbon footprint scope 1 and 2	Relative carbon footprint scope 1 and 2	-40.50 %	99.46 %	99.46 %

Eligibility: The proportion of the assets in the financial product (relative to NAV), which are in scope for the indicator.

Coverage: The proportion of the assets in the financial product (relative to NAV), where data is available to present the indicator.

Eligibility: The proportion of the assets in the financial product (relative to NAV), which are in scope for the indicator.

Coverage: The proportion of the assets in the financial product (relative to NAV), where data is available to present the indicator.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The objective of the sustainable investments that the fund partially made, was to contribute to one or several of the UN SDGs or alternatively be involved in Taxonomy-aligned activities. Sustainable investments contributed to the objectives through the fund's investments in companies where a minimum of 20% of their activity could be linked to economic activities supporting an environmentally-sustainable objective defined in the EU Taxonomy, or an environmental or social objective belonging to the list of UN SDGs.

The UN SDGs are a set of 17 Sustainable Development Goals adopted by the United Nations in 2015 as a call for action to end poverty, protect the planet, and ensure peace and prosperity by 2030.

The EU Taxonomy provides a framework for assessment of environmentally sustainable economic activities and lists economic activities that are considered environmentally sustainable in the context of the European Green Deal.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

As part of the process to identify sustainable investments, companies were screened to ensure that they did not significantly harm (DNSH test) any other social or environmental objectives. The DNSH test used PAI indicators, as described below, to identify and exclude companies that do not pass the thresholds.

- ***How were the indicators for adverse impacts on sustainability factors taken into account?***

he DNSH test, as part of the methodology to identify sustainable investments, identified negative outliers and poor performance related to PAI indicators. The investment manager considered the PAI indicators from Table 1, annex 1 in the SFDR RTS. In the reporting period, data was mainly available for the use of the below indicators.

Climate and other environment related indicators:

- Greenhouse Gas emissions
- Biodiversity impact
- Emissions to water
- Hazardous waste

Indicators for social and employee, respect for human rights, anti-corruption and anti-bribery matters:

- Violations of the UNGC and OECD principles
- Board gender diversity
- Exposure to controversial weapons
- Severe human rights issues and incidents

Companies that did not pass the thresholds that were defined by the investment manager, did not qualify as a sustainable investment. This included companies that were involved in severe human rights incidents, severe controversies related to biodiversity or violations of the UNGC and OECD principles.

Companies also failed the DNSH test if they were among the worst performers on emissions to water, hazardous waste or Greenhouse Gas emissions. In addition, companies that derived more than 0% of revenue from unconventional fossil fuel failed the DNSH test, and companies that derived more than 5% from conventional fossil fuel or more than 50% from services specific to the fossil fuel industry only passed the DNSH test if they were below the climate related exclusions criteria of the EU Paris Aligned Benchmark with revenue thresholds of 1% for coal, 10% for oil, 50% for natural gas and 50% for fossil fuel based electricity generation, and had a climate transition plan. Our Paris Aligned Fossil Fuel Policy describes the criteria used to identify companies with credible transition plans.

Additional exclusions to further limit negative externalities were applied to the investment universe of the fund, to avoid investment in companies that were involved in thermal coal or production of fossil fuels from oil sands and arctic drilling, as well as controversial weapons, and pornography.

The data on PAI indicators needed for the DNSH test was sourced from third party data providers.

- Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Alignment of the sustainable investments with the OECD guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights was confirmed as part of the process to identify sustainable investments using the Violations of the UNGC and OECD principles indicator.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the fund that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this fund do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The specific PAI indicators that were taken into consideration for this fund were:

CLIMATE AND OTHER ENVIRONMENT-RELATED INDICATORS

Adverse Sustainability Indicator	Metric	Metric Value	Eligibility	Coverage
Greenhouse gas "GHG" emissions	Scope 1 GHG emissions	21,453 tCO ₂ e	99.46 %	99.46 %

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The product contains investments with both an environmental and a social objective. A single investment can both contribute to an environmental and a social objective resulting in a total allocation amounting to more than 100 per cent. There is no prioritisation of environmental and social objectives, and the strategy does not target any specific allocation or minimum proportion for either of these categories. The investment process accommodates the combination of environmental and social objectives by allowing the investment manager the flexibility to allocate between these based on availability and attractiveness of investment opportunities.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

☐ Yes:

☐ In fossil gas

☐ In nuclear energy

☒ No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

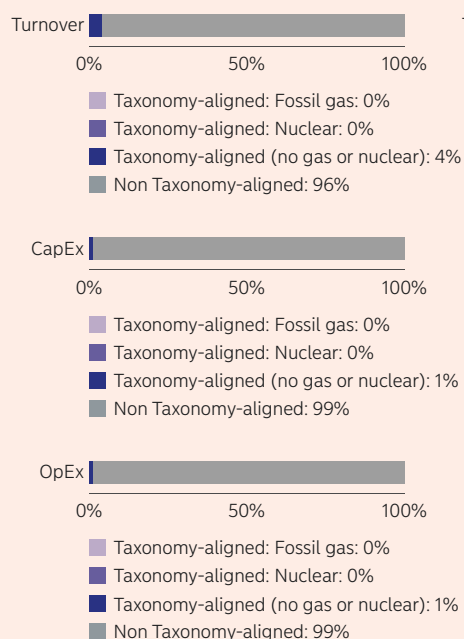

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments including sovereign bonds*

2. Taxonomy-alignment of investments excluding sovereign bonds*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

There is no data available for the reporting period to confirm that the financial product invested in any fossil fuel gas and/or nuclear energy related activities that comply with the EU Taxonomy.

Assessment on Taxonomy alignment is currently conducted with data from third party providers as well as self-reported data from investee companies when available. Proprietary tools and processes to measure significant harm and minimum social safeguards have been developed.

The methodology applied by the third-party data providers assesses how companies are involved in economic activities that substantially contribute to an environmental objective while not significantly harming other sustainable objectives and meeting minimum social safeguards. Taxonomy-alignment of the investment is based on the percentage of turnover exposed or potentially exposed to taxonomy-aligned activities. Data providers' methodologies vary and results may not be fully aligned as long as publicly reported company data is still lacking and assessments rely largely on equivalent data.

We prioritise the use of self-reported data where available. Where data providers are used to deliver equivalent data, NAM has conducted due diligence on the data provider's methodology. Out of caution, unless we are able to confirm available data for the majority of the portfolio's holdings, we will report 0 (zero) per cent of Taxonomy-Aligned Investments.

The compliance of the investments with the EU Taxonomy has not been subject to an assurance by auditors or a review by third parties. Data provider methodologies vary and results may not be fully aligned as long as publicly reported data is still lacking.

● ***What was the share of investments made in transitional and enabling activities?***

Type of Activity	Assets
Transitional activities	0.53 %
Enabling activities	0.70 %
Sum	1.23 %

● ***How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?***

Reference Period	Taxonomy-Aligned Investments
2024	3.87 %
2023	0.00 %
2022	0.00 %

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 61 %.

What was the share of socially sustainable investments?

The share of socially sustainable investments was 60 %.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

Cash may have been held as ancillary liquidity or for risk balancing purposes. The fund may have used derivatives and other techniques for the purposes described in the “Fund Descriptions” in the prospectus. This category may also have included securities for which relevant data is not available. Minimum environmental or social safeguards were not applicable.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this fund have been monitored and documented on an ongoing basis.

How did this financial product perform compared to the reference benchmark?

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

ANNEX IV

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Nordea 2 - Japanese Responsible Enhanced Equity Fund
Legal entity identifier: 549300SGPKI5DLJ77I30

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

☒ ☒ ☐ Yes

☒ ☐ ☒ No

☐ It made **sustainable investments with an environmental objective:** ____%

☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It made **sustainable investments with a social objective:** ____%

☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 64 % of sustainable investments

☒ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☒ with a social objective

☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The E/S characteristics promoted could have been environmental and/or social and included the following features:

Minimum proportion of sustainable investments The fund promoted E/S characteristics by partially investing in companies and issuers involved in activities that contributed to an environmental or social objective as outlined in UN Sustainable Development Goals (SDGs) and/or the EU Taxonomy, while not significantly harming any other environmental or social objectives and following good governance practices.

ESG rating The fund promoted E/S characteristics by investing in companies or issuers with favourable ESG ratings. Investee companies or issuers had been rated by a selected external provider to ensure that only securities issued by companies that met the minimum required ESG rating were eligible for inclusion and that ESG laggards were excluded.

Sector- and value-based exclusions The fund promoted E/S characteristics by excluding companies that were deemed to be inappropriate based on their business activities or corporate behaviour.

Nordea Asset Management's Paris-Aligned Fossil Fuel Policy The fund promoted E/S characteristics by refraining from investing in companies that had significant exposure to fossil fuels unless they had a credible transition strategy.

Carbon footprint scope 1 & 2 limit The fund promoted E/S characteristics by maintaining the total carbon footprint of the fund's investments at least 25% below the total carbon footprint of the reference benchmark. The carbon footprint was measured by the scope 1 and 2 greenhouse gas emissions.

There was no reference benchmark designated for the purpose of attaining the E/S characteristics of the fund.

● **How did the sustainability indicators perform?**

Sustainability Indicator	Metric	Metric Value	Eligibility	Coverage
% of sustainable investments	% of sustainable investments	64.22 %	99.20 %	99.20 %
% of Investments, aligned with the E/S characteristics, with an ESG rating that do not meet the minimum threshold	% of Investments, aligned with the E/S characteristics, with an ESG rating that do not meet the minimum threshold	0.00 %	98.92 %	98.92 %
% of investments, aligned with the E/S characteristics, that do not comply with sector- and value based exclusions	% of investments, aligned with the E/S characteristics, that do not comply with sector- and value based exclusions	0.00 %	98.92 %	98.92 %
% of investments, aligned with the E/S characteristics, that do not comply with NAM's Paris-Aligned Fossil Fuel Policy	% of investments, aligned with the E/S characteristics, that do not comply with NAM's Paris-Aligned Fossil Fuel Policy	0.00 %	98.92 %	98.92 %
Relative carbon footprint scope 1 and 2	Relative carbon footprint scope 1 and 2	-32.03 %	98.92 %	98.92 %

Eligibility: The proportion of the assets in the financial product (relative to NAV), which are in scope for the indicator.

Coverage: The proportion of the assets in the financial product (relative to NAV), where data is available to present the indicator.

● **How did the sustainability indicators perform?**

Sustainability Indicator	Metric	Reference Period	Metric Value	Eligibility	Coverage

Eligibility: The proportion of the assets in the financial product (relative to NAV), which are in scope for the indicator.

Coverage: The proportion of the assets in the financial product (relative to NAV), where data is available to present the indicator.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The objective of the sustainable investments that the fund partially made, was to contribute to one or several of the UN SDGs or alternatively be involved in Taxonomy-aligned activities. Sustainable investments contributed to the objectives through the fund's investments in companies where a minimum of 20% of their activity could be linked to economic activities supporting an environmentally-sustainable objective defined in the EU Taxonomy, or an environmental or social objective belonging to the list of UN SDGs.

The UN SDGs are a set of 17 Sustainable Development Goals adopted by the United Nations in 2015 as a call for action to end poverty, protect the planet, and ensure peace and prosperity by 2030.

The EU Taxonomy provides a framework for assessment of environmentally sustainable economic activities and lists economic activities that are considered environmentally sustainable in the context of the European Green Deal.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

As part of the process to identify sustainable investments, companies were screened to ensure that they did not significantly harm (DNSH test) any other social or environmental objectives. The DNSH test used PAI indicators, as described below, to identify and exclude companies that do not pass the thresholds.

- How were the indicators for adverse impacts on sustainability factors taken into account?

The DNSH test, as part of the methodology to identify sustainable investments, identified negative outliers and poor performance related to PAI indicators. The investment manager considered the PAI indicators from Table 1, annex 1 in the SFDR RTS. In the reporting period, data was mainly available for the use of the below indicators.

Climate and other environment related indicators:

- Greenhouse Gas emissions
- Biodiversity impact
- Emissions to water
- Hazardous waste

Indicators for social and employee, respect for human rights, anti-corruption and anti-bribery matters:

- Violations of the UNGC and OECD principles
- Board gender diversity
- Exposure to controversial weapons
- Severe human rights issues and incidents

Companies that did not pass the thresholds that were defined by the investment manager, did not qualify as a sustainable investment. This included companies that were involved in severe human rights incidents, severe controversies related to biodiversity or violations of the UNGC and OECD principles.

Companies also failed the DNSH test if they were among the worst performers on emissions to water, hazardous waste or Greenhouse Gas emissions. In addition, companies that derived more than 0% of revenue from unconventional fossil fuel failed the DNSH test, and companies that derived more than 5% from conventional fossil fuel or more than 50% from services specific to the fossil fuel industry only passed the DNSH test if they were below the climate related exclusions criteria of the EU Paris Aligned Benchmark with revenue thresholds of 1% for coal, 10% for oil, 50% for natural gas and 50% for fossil fuel based electricity generation, and had a climate transition plan. Our Paris Aligned Fossil Fuel Policy describes the criteria used to identify companies with credible transition plans.

Additional exclusions to further limit negative externalities were applied to the investment universe of the fund, to avoid investment in companies that were involved in thermal coal or production of fossil fuels from oil sands and arctic drilling, as well as controversial weapons, and pornography.

The data on PAI indicators needed for the DNSH test was sourced from third party data providers.

- Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Alignment of the sustainable investments with the OECD guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights was confirmed as part of the process to identify sustainable investments using the Violations of the UNGC and OECD principles indicator.

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the fund that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this fund do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The specific PAI indicators that were taken into consideration for this fund were:

CLIMATE AND OTHER ENVIRONMENT-RELATED INDICATORS

Adverse Sustainability Indicator		Metric	Metric Value	Eligibility	Coverage
Greenhouse gas "GHG" emissions	GHG emissions	Scope 1 GHG emissions	5,059 tCO2e	98.92 %	98.92 %

SoftBank	Communications	1.76 %	Japan
Mizuho Financial Group	Financial	1.73 %	Japan
Hoya	Industrial	1.68 %	Japan

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The product contains investments with both an environmental and a social objective. A single investment can both contribute to an environmental and a social objective resulting in a total allocation amounting to more than 100 per cent. There is no prioritisation of environmental and social objectives, and the strategy does not target any specific allocation or minimum proportion for either of these categories. The investment process accommodates the combination of environmental and social objectives by allowing the investment manager the flexibility to allocate between these based on availability and attractiveness of investment opportunities.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

- **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?**

☐

Yes:

☐

In fossil gas

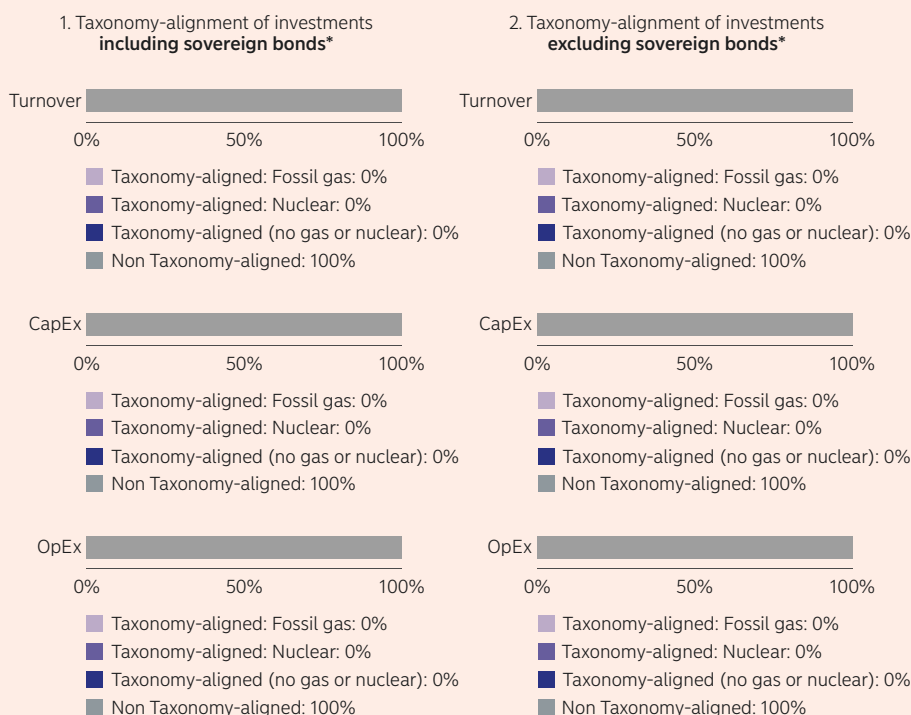

☐

In nuclear energy

☒

No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

There is no data available for the reporting period to confirm that the financial product invested in any fossil fuel gas and/or nuclear energy related activities that comply with the EU Taxonomy.

Assessment on Taxonomy alignment is currently conducted with data from third party providers as well as self-reported data from investee companies when available. Proprietary tools and processes to measure significant harm and minimum social safeguards have been developed.

The methodology applied by the third-party data providers assesses how companies are involved in economic activities that substantially contribute to an environmental objective while not significantly harming other sustainable objectives and meeting minimum social safeguards. Taxonomy-alignment of the investment is based on the percentage of turnover exposed or potentially exposed to taxonomy-aligned activities. Data providers' methodologies vary and results may not be fully aligned as long as publicly reported company data is still lacking and assessments rely largely on equivalent data.

We prioritise the use of self-reported data where available. Where data providers are used to deliver equivalent data, NAM has conducted due diligence on the data provider's methodology. Out of caution, unless we are able to confirm available data for the majority of the portfolio's holdings, we will report 0 (zero) per cent of Taxonomy-Aligned Investments.

The compliance of the investments with the EU Taxonomy has not been subject to an assurance by auditors or a review by third parties. Data provider methodologies vary and results may not be fully aligned as long as publicly reported data is still lacking.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 57 %.

What was the share of socially sustainable investments?

The share of socially sustainable investments was 58 %.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

Cash may have been held as ancillary liquidity or for risk balancing purposes. The fund may have used derivatives and other techniques for the purposes described in the “Fund Descriptions” in the prospectus. This category may also have included securities for which relevant data is not available. Minimum environmental or social safeguards were not applicable.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this fund have been monitored and documented on an ongoing basis.

How did this financial product perform compared to the reference benchmark?

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

ANNEX IV

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Nordea 2 - LCR Optimised Danish Covered Bond Fund - EUR Hedged

Legal entity identifier: 549300FDI5XW0BNY6I86

Environmental and/or social characteristics

Sustainable investment

means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

☒ ☒ ☐ Yes

☒ ☐ ☒ No

☐ It made **sustainable investments with an environmental objective:** ____%

☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It made **sustainable investments with a social objective:** ____%

☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 39 % of sustainable investments

☒ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☒ with a social objective

☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The E/S characteristics promoted could have been environmental and/or social and included the following features:

Minimum proportion of sustainable investments The fund promoted E/S characteristics by partially investing in companies and issuers involved in activities that contributed to an environmental or social objective as outlined in UN Sustainable Development Goals (SDGs) and/or the EU Taxonomy, while not significantly harming any other environmental or social objectives and following good governance practices.

Sector- and value-based exclusions The fund promoted E/S characteristics by excluding companies that were deemed to be inappropriate based on their business activities or corporate behaviour.

Nordea Asset Management's Paris-Aligned Fossil Fuel Policy The fund promoted E/S characteristics by refraining from investing in companies that had significant exposure to fossil fuels unless they had a credible transition strategy.

There was no reference benchmark designated for the purpose of attaining the E/S characteristics of the fund.

● How did the sustainability indicators perform?

Sustainability Indicator	Metric	Metric Value	Eligibility	Coverage
% of sustainable investments	% of sustainable investments	38.63 %	98.48 %	98.48 %
% of investments, aligned with the E/S characteristics, that do not comply with sector- and value based exclusions	% of investments, aligned with the E/S characteristics, that do not comply with sector- and value based exclusions	0.00 %	98.77 %	98.77 %
% of investments, aligned with the E/S characteristics, that do not comply with NAM's Paris-Aligned Fossil Fuel Policy	% of investments, aligned with the E/S characteristics, that do not comply with NAM's Paris-Aligned Fossil Fuel Policy	0.00 %	98.77 %	98.77 %

Eligibility: The proportion of the assets in the financial product (relative to NAV), which are in scope for the indicator.

Coverage: The proportion of the assets in the financial product (relative to NAV), where data is available to present the indicator.

● **...and compared to previous periods?**

Sustainability Indicator	Metric	Reference Period	Metric Value	Eligibility	Coverage

Eligibility: The proportion of the assets in the financial product (relative to NAV), which are in scope for the indicator.

Coverage: The proportion of the assets in the financial product (relative to NAV), where data is available to present the indicator.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The objective of the sustainable investments that the fund partially made, was to contribute to one or several of the UN SDGs or alternatively be involved in Taxonomy-aligned activities. Sustainable investments contributed to the objectives through the fund's investments in companies where a minimum of 20% of their activity could be linked to economic activities supporting an environmentally-sustainable objective defined in the EU Taxonomy, or an environmental or social objective belonging to the list of UN SDGs.

The UN SDGs are a set of 17 Sustainable Development Goals adopted by the United Nations in 2015 as a call for action to end poverty, protect the planet, and ensure peace and prosperity by 2030.

The EU Taxonomy provides a framework for assessment of environmentally sustainable economic activities and lists economic activities that are considered environmentally sustainable in the context of the European Green Deal.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

As part of the process to identify sustainable investments, companies were screened to ensure that they did not significantly harm (DNSH test) any other social or environmental objectives. The DNSH test used PAI indicators, as described below, to identify and exclude companies that do not pass the thresholds.

- How were the indicators for adverse impacts on sustainability factors taken into account?

The DNSH test, as part of the methodology to identify sustainable investments, identified negative outliers and poor performance related to PAI indicators. The investment manager considered the PAI indicators from Table 1, annex 1 in the SFDR RTS. In the reporting period, data was mainly available for the use of the below indicators.

Climate and other environment related indicators:

- Greenhouse Gas emissions
- Biodiversity impact
- Emissions to water
- Hazardous waste

Indicators for social and employee, respect for human rights, anti-corruption and anti-bribery matters:

- Violations of the UNGC and OECD principles
- Board gender diversity
- Exposure to controversial weapons
- Severe human rights issues and incidents

Companies that did not pass the thresholds that were defined by the investment manager, did not qualify as a sustainable investment. This included companies that were involved in severe human rights incidents, severe controversies related to biodiversity or violations of the UNGC and OECD principles.

Companies also failed the DNSH test if they were among the worst performers on emissions to water, hazardous waste or Greenhouse Gas emissions. In addition, companies that derived more than 0% of revenue from unconventional fossil fuel failed the DNSH test, and companies that derived more than 5% from conventional fossil fuel or more than 50% from services specific to the fossil fuel industry only passed the DNSH test if they were below the climate related exclusions criteria of the EU Paris Aligned Benchmark with revenue thresholds of 1% for coal, 10% for oil, 50% for natural gas and 50% for fossil fuel based electricity generation, and had a climate transition plan. Our Paris Aligned Fossil Fuel Policy describes the criteria used to identify companies with credible transition plans.

Additional exclusions to further limit negative externalities were applied to the investment universe of the fund, to avoid investment in companies that were involved in thermal coal or production of fossil fuels from oil sands and arctic drilling, as well as controversial weapons, and pornography.

The data on PAI indicators needed for the DNSH test was sourced from third party data providers.

- Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Alignment of the sustainable investments with the OECD guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights was confirmed as part of the process to identify sustainable investments using the Violations of the UNGC and OECD principles indicator.

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the fund that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this fund do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The specific PAI indicators that were taken into consideration for this fund were:

CLIMATE AND OTHER ENVIRONMENT-RELATED INDICATORS

Adverse Sustainability Indicator	Metric	Metric Value	Eligibility	Coverage
Greenhouse gas "GHG" emissions	GHG emissions	Scope 1 GHG emissions	1 tCO ₂ e	84.03 %
		Scope 2 GHG emissions	4 tCO ₂ e	84.03 %

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The product contains investments with both an environmental and a social objective. A single investment can both contribute to an environmental and a social objective resulting in a total allocation amounting to more than 100 per cent. There is no prioritisation of environmental and social objectives, and the strategy does not target any specific allocation or minimum proportion for either of these categories. The investment process accommodates the combination of environmental and social objectives by allowing the investment manager the flexibility to allocate between these based on availability and attractiveness of investment opportunities.

● *In which economic sectors were the investments made?*

Sector	Sub Sector	Assets
Cash	Cash	1.19 %
Financial	Banks	22.57 %
Financial	Diversified Finan Serv	61.46 %
FX Forwards	FX Forwards	0.04 %
Government bonds	Sovereign	14.75 %
Sum		100.00 %

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

☐ Yes:

☐ In fossil gas

☐ In nuclear energy

☒ No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments including sovereign bonds*

2. Taxonomy-alignment of investments excluding sovereign bonds*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

There is no data available for the reporting period to confirm that the financial product invested in any fossil fuel gas and/or nuclear energy related activities that comply with the EU Taxonomy.

Assessment on Taxonomy alignment is currently conducted with data from third party providers as well as self-reported data from investee companies when available. Proprietary tools and processes to measure significant harm and minimum social safeguards have been developed.

The methodology applied by the third-party data providers assesses how companies are involved in economic activities that substantially contribute to an environmental objective while not significantly harming other sustainable objectives and meeting minimum social safeguards. Taxonomy-alignment of the investment is based on the percentage of turnover exposed or potentially exposed to taxonomy-aligned activities. Data providers' methodologies vary and results may not be fully aligned as long as publicly reported company data is still lacking and assessments rely largely on equivalent data.

We prioritise the use of self-reported data where available. Where data providers are used to deliver equivalent data, NAM has conducted due diligence on the data provider's methodology. Out of caution, unless we are able to confirm available data for the majority of the portfolio's holdings, we will report 0 (zero) per cent of Taxonomy-Aligned Investments.

The compliance of the investments with the EU Taxonomy has not been subject to an assurance by auditors or a review by third parties. Data provider methodologies vary and results may not be fully aligned as long as publicly reported data is still lacking.

● ***What was the share of investments made in transitional and enabling activities?***

Type of Activity	Assets
Transitional activities	0.00 %
Enabling activities	0.00 %
Sum	0.00 %

● ***How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?***

Reference Period	Taxonomy-Aligned Investments
2024	1.50 %
2023	0.00 %
2022	0.00 %

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 37 %.

What was the share of socially sustainable investments?

The share of socially sustainable investments was 6 %.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

Cash may have been held as ancillary liquidity or for risk balancing purposes. The fund may have used derivatives and other techniques for the purposes described in the “Fund Descriptions” in the prospectus. This category may also have included securities for which relevant data is not available. Minimum environmental or social safeguards were not applicable.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this fund have been monitored and documented on an ongoing basis.

How did this financial product perform compared to the reference benchmark?

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

ANNEX IV

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Nordea 2 - North American Responsible Enhanced Equity Fund

Legal entity identifier: 549300CE1UG4IV657J56

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

☒ ☒ ☐ Yes

☒ ☐ ☒ No

☐ It made **sustainable investments with an environmental objective:** ____%

☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It made **sustainable investments with a social objective:** ____%

☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 76 % of sustainable investments

☒ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☒ with a social objective

☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The E/S characteristics promoted could have been environmental and/or social and included the following features:

Minimum proportion of sustainable investments The fund promoted E/S characteristics by partially investing in companies and issuers involved in activities that contributed to an environmental or social objective as outlined in UN Sustainable Development Goals (SDGs) and/or the EU Taxonomy, while not significantly harming any other environmental or social objectives and following good governance practices.

ESG rating The fund promoted E/S characteristics by investing in companies or issuers with favourable ESG ratings. Investee companies or issuers had been rated by a selected external provider to ensure that only securities issued by companies that met the minimum required ESG rating were eligible for inclusion and that ESG laggards were excluded.

Sector- and value-based exclusions The fund promoted E/S characteristics by excluding companies that were deemed to be inappropriate based on their business activities or corporate behaviour.

Nordea Asset Management's Paris-Aligned Fossil Fuel Policy The fund promoted E/S characteristics by refraining from investing in companies that had significant exposure to fossil fuels unless they had a credible transition strategy.

Carbon footprint scope 1 & 2 limit The fund promoted E/S characteristics by maintaining the total carbon footprint of the fund's investments at least 25% below the total carbon footprint of the reference benchmark. The carbon footprint was measured by the scope 1 and 2 greenhouse gas emissions.

There was no reference benchmark designated for the purpose of attaining the E/S characteristics of the fund.

● **How did the sustainability indicators perform?**

Sustainability Indicator	Metric	Metric Value	Eligibility	Coverage
% of sustainable investments	% of sustainable investments	75.91 %	99.63 %	99.63 %

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The objective of the sustainable investments that the fund partially made, was to contribute to one or several of the UN SDGs or alternatively be involved in Taxonomy-aligned activities. Sustainable investments contributed to the objectives through the fund's investments in companies where a minimum of 20% of their activity could be linked to economic activities supporting an environmentally-sustainable objective defined in the EU Taxonomy, or an environmental or social objective belonging to the list of UN SDGs.

The UN SDGs are a set of 17 Sustainable Development Goals adopted by the United Nations in 2015 as a call for action to end poverty, protect the planet, and ensure peace and prosperity by 2030.

The EU Taxonomy provides a framework for assessment of environmentally sustainable economic activities and lists economic activities that are considered environmentally sustainable in the context of the European Green Deal.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

As part of the process to identify sustainable investments, companies were screened to ensure that they did not significantly harm (DNSH test) any other social or environmental objectives. The DNSH test used PAI indicators, as described below, to identify and exclude companies that do not pass the thresholds.

- How were the indicators for adverse impacts on sustainability factors taken into account?

The DNSH test, as part of the methodology to identify sustainable investments, identified negative outliers and poor performance related to PAI indicators. The investment manager considered the PAI indicators from Table 1, annex 1 in the SFDR RTS. In the reporting period, data was mainly available for the use of the below indicators.

Climate and other environment related indicators:

- Greenhouse Gas emissions
- Biodiversity impact
- Emissions to water
- Hazardous waste

Indicators for social and employee, respect for human rights, anti-corruption and anti-bribery matters:

- Violations of the UNGC and OECD principles
- Board gender diversity
- Exposure to controversial weapons
- Severe human rights issues and incidents

Companies that did not pass the thresholds that were defined by the investment manager, did not qualify as a sustainable investment. This included companies that were involved in severe human rights incidents, severe controversies related to biodiversity or violations of the UNGC and OECD principles.

Companies also failed the DNSH test if they were among the worst performers on emissions to water, hazardous waste or Greenhouse Gas emissions. In addition, companies that derived more than 0% of revenue from unconventional fossil fuel failed the DNSH test, and companies that derived more than 5% from conventional fossil fuel or more than 50% from services specific to the fossil fuel industry only passed the DNSH test if they were below the climate related exclusions criteria of the EU Paris Aligned Benchmark with revenue thresholds of 1% for coal, 10% for oil, 50% for natural gas and 50% for fossil fuel based electricity generation, and had a climate transition plan. Our Paris Aligned Fossil Fuel Policy describes the criteria used to identify companies with credible transition plans.

Additional exclusions to further limit negative externalities were applied to the investment universe of the fund, to avoid investment in companies that were involved in thermal coal or production of fossil fuels from oil sands and arctic drilling, as well as controversial weapons, and pornography.

The data on PAI indicators needed for the DNSH test was sourced from third party data providers.

- Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Alignment of the sustainable investments with the OECD guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights was confirmed as part of the process to identify sustainable investments using the Violations of the UNGC and OECD principles indicator.

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the fund that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this fund do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The specific PAI indicators that were taken into consideration for this fund were:

CLIMATE AND OTHER ENVIRONMENT-RELATED INDICATORS

Adverse Sustainability Indicator		Metric	Metric Value	Eligibility	Coverage
Greenhouse gas "GHG" emissions	GHG emissions	Scope 1 GHG emissions	12,942 tCO2e	99.64 %	99.64 %

Johnson & Johnson	Consumer, Non-cyclical	1.06 %	United States

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The product contains investments with both an environmental and a social objective. A single investment can both contribute to an environmental and a social objective resulting in a total allocation amounting to more than 100 per cent. There is no prioritisation of environmental and social objectives, and the strategy does not target any specific allocation or minimum proportion for either of these categories. The investment process accommodates the combination of environmental and social objectives by allowing the investment manager the flexibility to allocate between these based on availability and attractiveness of investment opportunities.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

- **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?**

☐

Yes:

☐

In fossil gas

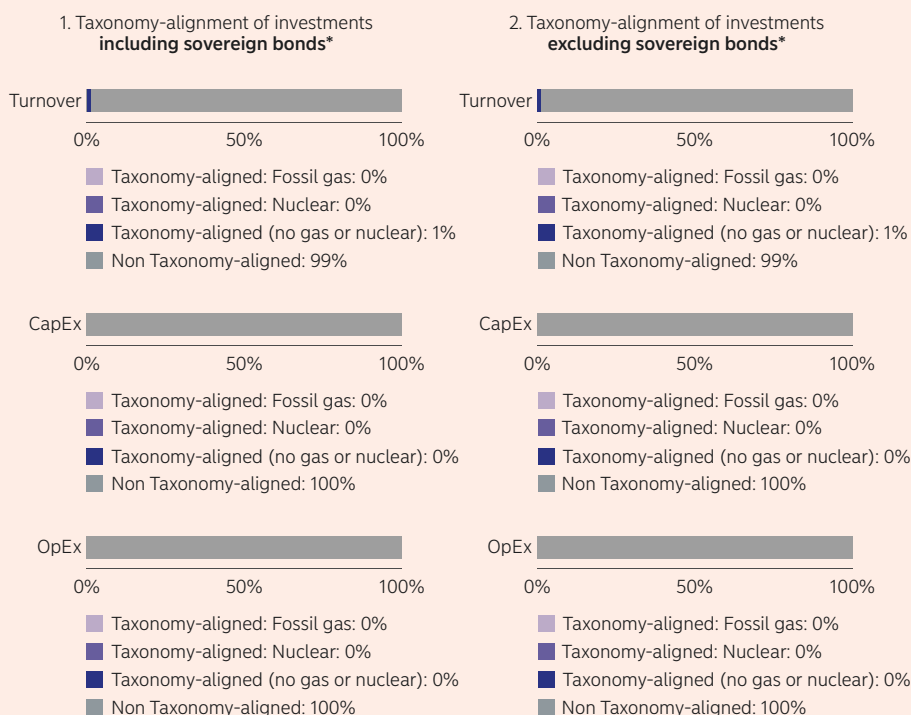

☐

In nuclear energy

☒

No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

There is no data available for the reporting period to confirm that the financial product invested in any fossil fuel gas and/or nuclear energy related activities that comply with the EU Taxonomy.

Assessment on Taxonomy alignment is currently conducted with data from third party providers as well as self-reported data from investee companies when available. Proprietary tools and processes to measure significant harm and minimum social safeguards have been developed.

The methodology applied by the third-party data providers assesses how companies are involved in economic activities that substantially contribute to an environmental objective while not significantly harming other sustainable objectives and meeting minimum social safeguards. Taxonomy-alignment of the investment is based on the percentage of turnover exposed or potentially exposed to taxonomy-aligned activities. Data providers' methodologies vary and results may not be fully aligned as long as publicly reported company data is still lacking and assessments rely largely on equivalent data.

We prioritise the use of self-reported data where available. Where data providers are used to deliver equivalent data, NAM has conducted due diligence on the data provider's methodology. Out of caution, unless we are able to confirm available data for the majority of the portfolio's holdings, we will report 0 (zero) per cent of Taxonomy-Aligned Investments.

The compliance of the investments with the EU Taxonomy has not been subject to an assurance by auditors or a review by third parties. Data provider methodologies vary and results may not be fully aligned as long as publicly reported data is still lacking.

● ***What was the share of investments made in transitional and enabling activities?***

Type of Activity	Assets
Transitional activities	0.00 %
Enabling activities	0.08 %
Sum	0.08 %

● ***How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?***

Reference Period	Taxonomy-Aligned Investments
2024	1.00 %
2023	0.00 %
2022	0.00 %

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 65 %.

What was the share of socially sustainable investments?

The share of socially sustainable investments was 61 %.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

Cash may have been held as ancillary liquidity or for risk balancing purposes. The fund may have used derivatives and other techniques for the purposes described in the “Fund Descriptions” in the prospectus. This category may also have included securities for which relevant data is not available. Minimum environmental or social safeguards were not applicable.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this fund have been monitored and documented on an ongoing basis.

How did this financial product perform compared to the reference benchmark?

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

ANNEX IV

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Nordea 2 - Stable Emerging Markets Aksjer Etisk

Legal entity identifier: 549300Q37E87H2VALN56

Environmental and/or social characteristics

Sustainable investment

means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

☒ ☒ ☐ Yes

☒ ☐ ☒ No

☐ It made **sustainable investments with an environmental objective:** ____%

☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It made **sustainable investments with a social objective:** ____%

☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 75 % of sustainable investments

☒ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☒ with a social objective

☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The E/S characteristics promoted could have been environmental and/or social and included the following features:

Sustainable investments Although the fund has not committed to make any sustainable investments, the fund promoted E/S characteristics by partially investing in companies and issuers involved in activities that contributed to an environmental or social objective as outlined in UN Sustainable Development Goals (SDGs) and/or the EU Taxonomy, while not significantly harming any other environmental or social objectives and following good governance practices.

Sector- and value-based exclusions The fund promoted E/S characteristics by excluding companies that were deemed to be inappropriate based on their business activities or corporate behaviour.

Nordea Asset Management's Paris-Aligned Fossil Fuel Policy The fund promoted E/S characteristics by refraining from investing in companies that had significant exposure to fossil fuels unless they had a credible transition strategy.

There was no reference benchmark designated for the purpose of attaining the E/S characteristics of the fund.

● How did the sustainability indicators perform?

Sustainability Indicator	Metric	Metric Value	Eligibility	Coverage
% of investments, aligned with the E/S characteristics, that do not comply with sector- and value based exclusions	% of investments, aligned with the E/S characteristics, that do not comply with sector- and value based exclusions	0.00 %	98.53 %	98.53 %
% of investments, aligned with the E/S characteristics, that do not comply with NAM's Paris-Aligned Fossil Fuel Policy	% of investments, aligned with the E/S characteristics, that do not comply with NAM's Paris-Aligned Fossil Fuel Policy	0.00 %	98.53 %	98.53 %

Eligibility: The proportion of the assets in the financial product (relative to NAV), which are in scope for the indicator.

Coverage: The proportion of the assets in the financial product (relative to NAV), where data is available to present the indicator.

● **...and compared to previous periods?**

Sustainability Indicator	Metric	Reference Period	Metric Value	Eligibility	Coverage
% of investments, aligned with the E/S characteristics, that do not comply with sector- and value based exclusions	% of investments, aligned with the E/S characteristics, that do not comply with sector- and value based exclusions	2024	0.00 %	98.53 %	98.53 %
		2023	N/A	N/A	N/A
		2022	N/A	N/A	N/A
% of investments, aligned with the E/S characteristics, that do not comply with NAM's Paris-Aligned Fossil Fuel Policy	% of investments, aligned with the E/S characteristics, that do not comply with NAM's Paris-Aligned Fossil Fuel Policy	2024	0.00 %	98.53 %	98.53 %
		2023	N/A	N/A	N/A
		2022	N/A	N/A	N/A

Eligibility: The proportion of the assets in the financial product (relative to NAV), which are in scope for the indicator.

Coverage: The proportion of the assets in the financial product (relative to NAV), where data is available to present the indicator.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The objective of the sustainable investments that the fund partially made, was to contribute to one or several of the UN SDGs or alternatively be involved in Taxonomy-aligned activities. Sustainable investments contributed to the objectives through the fund's investments in companies where a minimum of 20% of their activity could be linked to economic activities supporting an environmentally-sustainable objective defined in the EU Taxonomy, or an environmental or social objective belonging to the list of UN SDGs.

The UN SDGs are a set of 17 Sustainable Development Goals adopted by the United Nations in 2015 as a call for action to end poverty, protect the planet, and ensure peace and prosperity by 2030.

The EU Taxonomy provides a framework for assessment of environmentally sustainable economic activities and lists economic activities that are considered environmentally sustainable in the context of the European Green Deal.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

As part of the process to identify sustainable investments, companies were screened to ensure that they did not significantly harm (DNSH test) any other social or environmental objectives. The DNSH test used PAI indicators, as described below, to identify and exclude companies that do not pass the thresholds.

- How were the indicators for adverse impacts on sustainability factors taken into account?

The DNSH test, as part of the methodology to identify sustainable investments, identified negative outliers and poor performance related to PAI indicators. The investment manager considered the PAI indicators from Table 1, annex 1 in the SFDR RTS. In the reporting period, data was mainly available for the use of the below indicators.

Climate and other environment related indicators:

- Greenhouse Gas emissions
- Biodiversity impact
- Emissions to water
- Hazardous waste

Indicators for social and employee, respect for human rights, anti-corruption and anti-bribery matters:

- Violations of the UNGC and OECD principles
- Board gender diversity
- Exposure to controversial weapons
- Severe human rights issues and incidents

Companies that did not pass the thresholds that were defined by the investment manager, did not qualify as a sustainable investment. This included companies that were involved in severe human rights incidents, severe controversies related to biodiversity or violations of the UNGC and OECD principles.

Companies also failed the DNSH test if they were among the worst performers on emissions to water, hazardous waste or Greenhouse Gas emissions. In addition, companies that derived more than 0% of revenue from unconventional fossil fuel failed the DNSH test, and companies that derived more than 5% from conventional fossil fuel or more than 50% from services specific to the fossil fuel industry only passed the DNSH test if they were below the climate related exclusions criteria of the EU Paris Aligned Benchmark with revenue thresholds of 1% for coal, 10% for oil, 50% for natural gas and 50% for fossil fuel based electricity generation, and had a climate transition plan. Our Paris Aligned Fossil Fuel Policy describes the criteria used to identify companies with credible transition plans.

Additional exclusions to further limit negative externalities were applied to the investment universe of the fund, to avoid investment in companies that were involved in thermal coal or production of fossil fuels from oil sands and arctic drilling, as well as controversial weapons, and pornography.

The data on PAI indicators needed for the DNSH test was sourced from third party data providers.

- Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Alignment of the sustainable investments with the OECD guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights was confirmed as part of the process to identify sustainable investments using the Violations of the UNGC and OECD principles indicator.

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the fund that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this fund do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The specific PAI indicators that were taken into consideration for this fund were:

CLIMATE AND OTHER ENVIRONMENT-RELATED INDICATORS

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The product contains investments with both an environmental and a social objective. A single investment can both contribute to an environmental and a social objective resulting in a total allocation amounting to more than 100 per cent. There is no prioritisation of environmental and social objectives, and the strategy does not target any specific allocation or minimum proportion for either of these categories. The investment process accommodates the combination of environmental and social objectives by allowing the investment manager the flexibility to allocate between these based on availability and attractiveness of investment opportunities.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

- **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?**

☐

Yes:

☐

In fossil gas

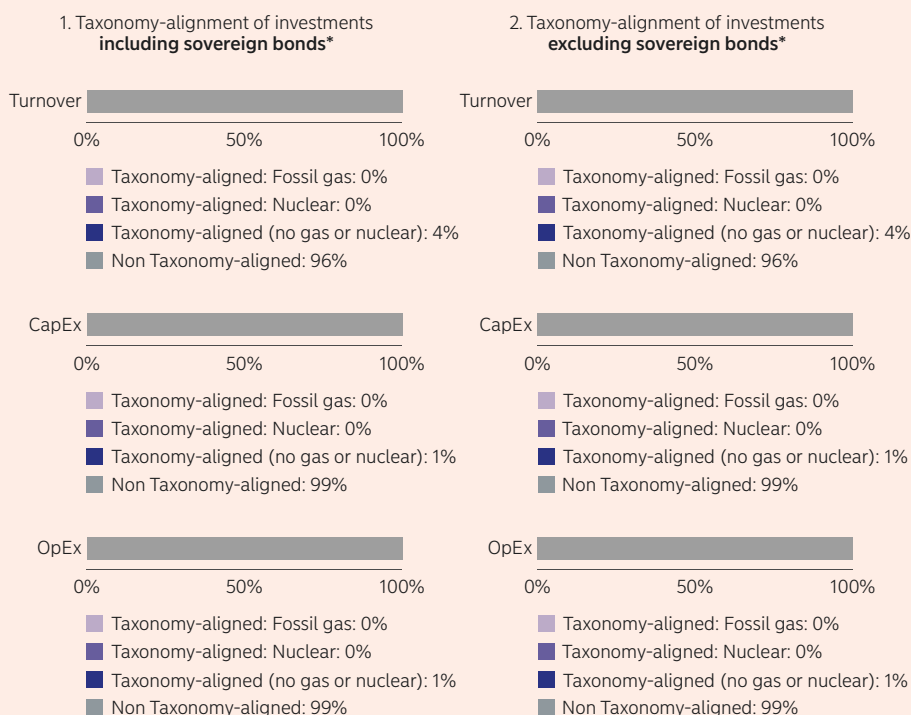

☐

In nuclear energy

☒

No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

There is no data available for the reporting period to confirm that the financial product invested in any fossil fuel gas and/or nuclear energy related activities that comply with the EU Taxonomy.

Assessment on Taxonomy alignment is currently conducted with data from third party providers as well as self-reported data from investee companies when available. Proprietary tools and processes to measure significant harm and minimum social safeguards have been developed.

The methodology applied by the third-party data providers assesses how companies are involved in economic activities that substantially contribute to an environmental objective while not significantly harming other sustainable objectives and meeting minimum social safeguards. Taxonomy-alignment of the investment is based on the percentage of turnover exposed or potentially exposed to taxonomy-aligned activities. Data providers' methodologies vary and results may not be fully aligned as long as publicly reported company data is still lacking and assessments rely largely on equivalent data.

We prioritise the use of self-reported data where available. Where data providers are used to deliver equivalent data, NAM has conducted due diligence on the data provider's methodology. Out of caution, unless we are able to confirm available data for the majority of the portfolio's holdings, we will report 0 (zero) per cent of Taxonomy-Aligned Investments.

The compliance of the investments with the EU Taxonomy has not been subject to an assurance by auditors or a review by third parties. Data provider methodologies vary and results may not be fully aligned as long as publicly reported data is still lacking.

● ***What was the share of investments made in transitional and enabling activities?***

Type of Activity	Assets
Transitional activities	0.00 %
Enabling activities	1.43 %
Sum	1.43 %

● ***How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?***

Reference Period	Taxonomy-Aligned Investments
2024	4.15 %
2023	0.00 %
2022	0.00 %

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 61 %.

What was the share of socially sustainable investments?

The share of socially sustainable investments was 58 %.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

Cash may have been held as ancillary liquidity or for risk balancing purposes. The fund may have used derivatives and other techniques for the purposes described in the “Fund Descriptions” in the prospectus. This category may also have included securities for which relevant data is not available. Minimum environmental or social safeguards were not applicable.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this fund have been monitored and documented on an ongoing basis.

How did this financial product perform compared to the reference benchmark?

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

ANNEX IV

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Nordea 2 - Swedish Responsible Enhanced Equity Fund
Legal entity identifier: 549300LWWKGI2TVGU502

Environmental and/or social characteristics

Sustainable investment

means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

☒ ☒ ☐ Yes

☒ ☐ ☒ No

☐ It made **sustainable investments with an environmental objective:** ____%

☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It made **sustainable investments with a social objective:** ____%

☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 78 % of sustainable investments

☒ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☒ with a social objective

☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The E/S characteristics promoted could have been environmental and/or social and included the following features:

Minimum proportion of sustainable investments The fund promoted E/S characteristics by partially investing in companies and issuers involved in activities that contributed to an environmental or social objective as outlined in UN Sustainable Development Goals (SDGs) and/or the EU Taxonomy, while not significantly harming any other environmental or social objectives and following good governance practices.

ESG rating The fund promoted E/S characteristics by investing in companies or issuers with favourable ESG ratings. Investee companies or issuers had been rated by a selected external provider to ensure that only securities issued by companies that met the minimum required ESG rating were eligible for inclusion and that ESG laggards were excluded.

Sector- and value-based exclusions The fund promoted E/S characteristics by excluding companies that were deemed to be inappropriate based on their business activities or corporate behaviour.

Nordea Asset Management's Paris-Aligned Fossil Fuel Policy The fund promoted E/S characteristics by refraining from investing in companies that had significant exposure to fossil fuels unless they had a credible transition strategy.

There was no reference benchmark designated for the purpose of attaining the E/S characteristics of the fund.

● How did the sustainability indicators perform?

Sustainability Indicator	Metric	Metric Value	Eligibility	Coverage
% of sustainable investments	% of sustainable investments	79.53 %	99.26 %	99.26 %
% of Investments, aligned with the E/S characteristics, with an ESG rating that do not meet the minimum threshold	% of Investments, aligned with the E/S characteristics, with an ESG rating that do not meet the minimum threshold	0.00 %	99.23 %	99.23 %
% of investments, aligned with the E/S characteristics, that do not comply with sector- and value based exclusions	% of investments, aligned with the E/S characteristics, that do not comply with sector- and value based exclusions	0.00 %	99.23 %	99.23 %
% of investments, aligned with the E/S characteristics, that do not comply with NAM's Paris-Aligned Fossil Fuel Policy	% of investments, aligned with the E/S characteristics, that do not comply with NAM's Paris-Aligned Fossil Fuel Policy	0.00 %	99.23 %	99.23 %

Eligibility: The proportion of the assets in the financial product (relative to NAV), which are in scope for the indicator.

Coverage: The proportion of the assets in the financial product (relative to NAV), where data is available to present the indicator.

● **...and compared to previous periods?**

Sustainability Indicator	Metric	Reference Period	Metric Value	Eligibility	Coverage

		2023	N/A	N/A	N/A
		2022	N/A	N/A	N/A

Eligibility: The proportion of the assets in the financial product (relative to NAV), which are in scope for the indicator.

Coverage: The proportion of the assets in the financial product (relative to NAV), where data is available to present the indicator.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The objective of the sustainable investments that the fund partially made, was to contribute to one or several of the UN SDGs or alternatively be involved in Taxonomy-aligned activities. Sustainable investments contributed to the objectives through the fund's investments in companies where a minimum of 20% of their activity could be linked to economic activities supporting an environmentally-sustainable objective defined in the EU Taxonomy, or an environmental or social objective belonging to the list of UN SDGs.

The UN SDGs are a set of 17 Sustainable Development Goals adopted by the United Nations in 2015 as a call for action to end poverty, protect the planet, and ensure peace and prosperity by 2030.

The EU Taxonomy provides a framework for assessment of environmentally sustainable economic activities and lists economic activities that are considered environmentally sustainable in the context of the European Green Deal.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

As part of the process to identify sustainable investments, companies were screened to ensure that they did not significantly harm (DNSH test) any other social or environmental objectives. The DNSH test used PAI indicators, as described below, to identify and exclude companies that do not pass the thresholds.

- How were the indicators for adverse impacts on sustainability factors taken into account?

The DNSH test, as part of the methodology to identify sustainable investments, identified negative outliers and poor performance related to PAI indicators. The investment manager considered the PAI indicators from Table 1, annex 1 in the SFDR RTS. In the reporting period, data was mainly available for the use of the below indicators.

Climate and other environment related indicators:

- Greenhouse Gas emissions
- Biodiversity impact
- Emissions to water
- Hazardous waste

Indicators for social and employee, respect for human rights, anti-corruption and anti-bribery matters:

- Violations of the UNGC and OECD principles
- Board gender diversity
- Exposure to controversial weapons
- Severe human rights issues and incidents

Companies that did not pass the thresholds that were defined by the investment manager, did not qualify as a sustainable investment. This included companies that were involved in severe human rights incidents, severe controversies related to biodiversity or violations of the UNGC and OECD principles.

Companies also failed the DNSH test if they were among the worst performers on emissions to water, hazardous waste or Greenhouse Gas emissions. In addition, companies that derived more than 0% of revenue from unconventional fossil fuel failed the DNSH test, and companies that derived more than 5% from conventional fossil fuel or more than 50% from services specific to the fossil fuel industry only passed the DNSH test if they were below the climate related exclusions criteria of the EU Paris Aligned Benchmark with revenue thresholds of 1% for coal, 10% for oil, 50% for natural gas and 50% for fossil fuel based electricity generation, and had a climate transition plan. Our Paris Aligned Fossil Fuel Policy describes the criteria used to identify companies with credible transition plans.

Additional exclusions to further limit negative externalities were applied to the investment universe of the fund, to avoid investment in companies that were involved in thermal coal or production of fossil fuels from oil sands and arctic drilling, as well as controversial weapons, and pornography.

The data on PAI indicators needed for the DNSH test was sourced from third party data providers.

- Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Alignment of the sustainable investments with the OECD guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights was confirmed as part of the process to identify sustainable investments using the Violations of the UNGC and OECD principles indicator.

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the fund that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this fund do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The specific PAI indicators that were taken into consideration for this fund were:

CLIMATE AND OTHER ENVIRONMENT-RELATED INDICATORS

Adverse Sustainability Indicator	Metric	Metric Value	Eligibility	Coverage
Greenhouse gas "GHG" emissions	GHG emissions	Scope 1 GHG emissions	7,293 tCO ₂ e	99.23 %
		Scope 2 GHG emissions	3,721 tCO ₂ e	99.23 %

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The product contains investments with both an environmental and a social objective. A single investment can both contribute to an environmental and a social objective resulting in a total allocation amounting to more than 100 per cent. There is no prioritisation of environmental and social objectives, and the strategy does not target any specific allocation or minimum proportion for either of these categories. The investment process accommodates the combination of environmental and social objectives by allowing the investment manager the flexibility to allocate between these based on availability and attractiveness of investment opportunities.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

- **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?**

Yes:

In fossil gas

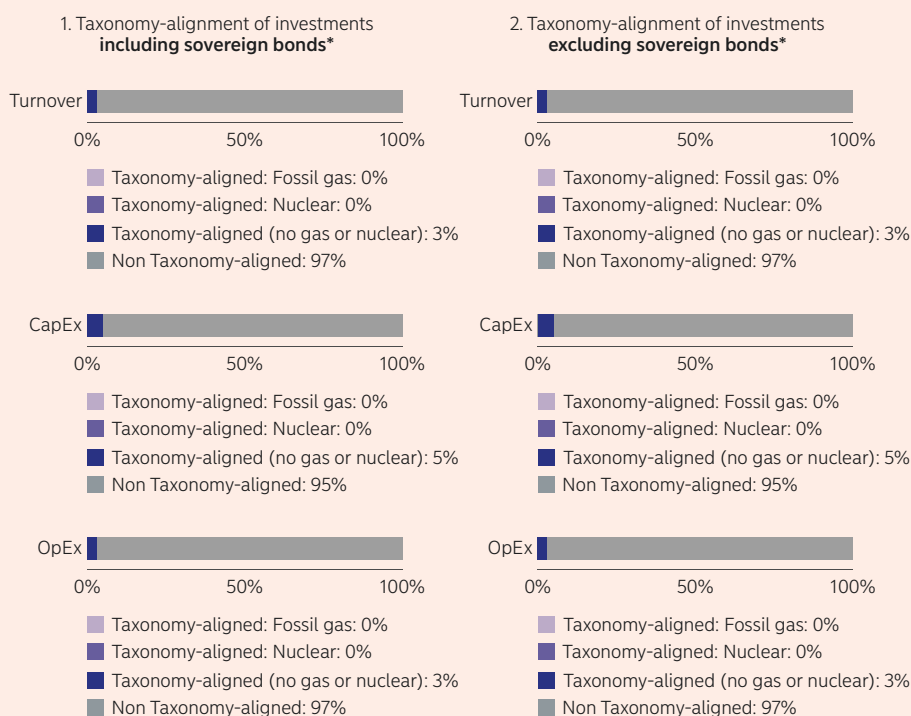

In nuclear energy

No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

There is no data available for the reporting period to confirm that the financial product invested in any fossil fuel gas and/or nuclear energy related activities that comply with the EU Taxonomy.

Assessment on Taxonomy alignment is currently conducted with data from third party providers as well as self-reported data from investee companies when available. Proprietary tools and processes to measure significant harm and minimum social safeguards have been developed.

The methodology applied by the third-party data providers assesses how companies are involved in economic activities that substantially contribute to an environmental objective while not significantly harming other sustainable objectives and meeting minimum social safeguards. Taxonomy-alignment of the investment is based on the percentage of turnover exposed or potentially exposed to taxonomy-aligned activities. Data providers' methodologies vary and results may not be fully aligned as long as publicly reported company data is still lacking and assessments rely largely on equivalent data.

We prioritise the use of self-reported data where available. Where data providers are used to deliver equivalent data, NAM has conducted due diligence on the data provider's methodology. Out of caution, unless we are able to confirm available data for the majority of the portfolio's holdings, we will report 0 (zero) per cent of Taxonomy-Aligned Investments.

The compliance of the investments with the EU Taxonomy has not been subject to an assurance by auditors or a review by third parties. Data provider methodologies vary and results may not be fully aligned as long as publicly reported data is still lacking.

● ***What was the share of investments made in transitional and enabling activities?***

Type of Activity	Assets
Transitional activities	0.25 %
Enabling activities	0.76 %

Reference Period	Taxonomy-Aligned Investments
2024	2.67 %
2023	0.00 %
2022	0.00 %

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 70 %.

What was the share of socially sustainable investments?

The share of socially sustainable investments was 72 %.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

Cash may have been held as ancillary liquidity or for risk balancing purposes. The fund may have used derivatives and other techniques for the purposes described in the “Fund Descriptions” in the prospectus. This category may also have included securities for which relevant data is not available. Minimum environmental or social safeguards were not applicable.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this fund have been monitored and documented on an ongoing basis.

How did this financial product perform compared to the reference benchmark?

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

ANNEX IV

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Nordea 2 - Technology Enhanced Equity Fund

Legal entity identifier: 254900E7DWF6APQ0XH85

Environmental and/or social characteristics

Sustainable investment

means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

☒ ☒ ☐ Yes

☒ ☐ ☒ No

☐ It made **sustainable investments with an environmental objective:** ____%

☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It made **sustainable investments with a social objective:** ____%

☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 67 % of sustainable investments

☒ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☒ with a social objective

☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The E/S characteristics promoted could have been environmental and/or social and included the following features:

Minimum proportion of sustainable investments The fund promoted E/S characteristics by partially investing in companies and issuers involved in activities that contributed to an environmental or social objective as outlined in UN Sustainable Development Goals (SDGs) and/or the EU Taxonomy, while not significantly harming any other environmental or social objectives and following good governance practices.

Sector- and value-based exclusions The fund promoted E/S characteristics by excluding companies that were deemed to be inappropriate based on their business activities or corporate behaviour.

Nordea Asset Management's Paris-Aligned Fossil Fuel Policy The fund promoted E/S characteristics by refraining from investing in companies that had significant exposure to fossil fuels unless they had a credible transition strategy.

There was no reference benchmark designated for the purpose of attaining the E/S characteristics of the fund.

● How did the sustainability indicators perform?

Sustainability Indicator	Metric	Metric Value	Eligibility	Coverage
% of sustainable investments	% of sustainable investments	66.92 %	94.23 %	94.23 %
% of investments, aligned with the E/S characteristics, that do not comply with sector- and value based exclusions	% of investments, aligned with the E/S characteristics, that do not comply with sector- and value based exclusions	0.00 %	94.23 %	94.23 %
% of investments, aligned with the E/S characteristics, that do not comply with NAM's Paris-Aligned Fossil Fuel Policy	% of investments, aligned with the E/S characteristics, that do not comply with NAM's Paris-Aligned Fossil Fuel Policy	0.00 %	94.23 %	94.23 %

Eligibility: The proportion of the assets in the financial product (relative to NAV), which are in scope for the indicator.

Coverage: The proportion of the assets in the financial product (relative to NAV), where data is available to present the indicator.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

The objective of the sustainable investments that the fund partially made, was to contribute to one or several of the UN SDGs or alternatively be involved in Taxonomy-aligned activities. Sustainable investments contributed to the objectives through the fund's investments in companies where a minimum of 20% of their activity could be linked to economic activities supporting an environmentally-sustainable objective defined in the EU Taxonomy, or an environmental or social objective belonging to the list of UN SDGs.

The UN SDGs are a set of 17 Sustainable Development Goals adopted by the United Nations in 2015 as a call for action to end poverty, protect the planet, and ensure peace and prosperity by 2030.

The EU Taxonomy provides a framework for assessment of environmentally sustainable economic activities and lists economic activities that are considered environmentally sustainable in the context of the European Green Deal.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

As part of the process to identify sustainable investments, companies were screened to ensure that they did not significantly harm (DNSH test) any other social or environmental objectives. The DNSH test used PAI indicators, as described below, to identify and exclude companies that do not pass the thresholds.

- How were the indicators for adverse impacts on sustainability factors taken into account?

The DNSH test, as part of the methodology to identify sustainable investments, identified negative outliers and poor performance related to PAI indicators. The investment manager considered the PAI indicators from Table 1, annex 1 in the SFDR RTS. In the reporting period, data was mainly available for the use of the below indicators.

Climate and other environment related indicators:

- Greenhouse Gas emissions
- Biodiversity impact
- Emissions to water
- Hazardous waste

Indicators for social and employee, respect for human rights, anti-corruption and anti-bribery matters:

- Violations of the UNGC and OECD principles
- Board gender diversity
- Exposure to controversial weapons
- Severe human rights issues and incidents

Companies that did not pass the thresholds that were defined by the investment manager, did not qualify as a sustainable investment. This included companies that were involved in severe human rights incidents, severe controversies related to biodiversity or violations of the UNGC and OECD principles.

Companies also failed the DNSH test if they were among the worst performers on emissions to water, hazardous waste or Greenhouse Gas emissions. In addition, companies that derived more than 0% of revenue from unconventional fossil fuel failed the DNSH test, and companies that derived more than 5% from conventional fossil fuel or more than 50% from services specific to the fossil fuel industry only passed the DNSH test if they were below the climate related exclusions criteria of the EU Paris Aligned Benchmark with revenue thresholds of 1% for coal, 10% for oil, 50% for natural gas and 50% for fossil fuel based electricity generation, and had a climate transition plan. Our Paris Aligned Fossil Fuel Policy describes the criteria used to identify companies with credible transition plans.

Additional exclusions to further limit negative externalities were applied to the investment universe of the fund, to avoid investment in companies that were involved in thermal coal or production of fossil fuels from oil sands and arctic drilling, as well as controversial weapons, and pornography.

The data on PAI indicators needed for the DNSH test was sourced from third party data providers.

- Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Alignment of the sustainable investments with the OECD guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights was confirmed as part of the process to identify sustainable investments using the Violations of the UNGC and OECD principles indicator.

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the fund that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this fund do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The specific PAI indicators that were taken into consideration for this fund were:

CLIMATE AND OTHER ENVIRONMENT-RELATED INDICATORS

Adverse Sustainability Indicator		Metric	Metric Value	Eligibility	Coverage
Greenhouse gas "GHG" emissions	GHG emissions	Scope 1 GHG emissions	872 tCO2e	94.23 %	94.23 %

				93.08 %

**SOCIAL AND EMPLOYEE, RESPECT FOR HUMAN RIGHTS, ANTI-CORRUPTION
AND ANTI-BRIBERY MATTERS**

Adverse Sustainability Indicator	Metric	Metric Value	Eligibility	Coverage
Social and employee matters	Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises	15.40 % involved in violations	94.23 %
	Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	Share of investments in investee companies without policies to monitor compliance with the UNGC principles or OECD Guidelines for Multinational Enterprises or grievance / complaints handling mechanisms to address violations of the UNGC principles or OECD Guidelines for Multinational Enterprises	0.00 % without policies	94.23 %
	Unadjusted gender pay gap	Average unadjusted gender pay gap of investee companies	5.80 % pay gap	94.23 %
	Board gender diversity	Average ratio of female to male board members in investee companies, expressed as a percentage of all board members	34.68 % (female directors / total directors)	94.23 %
	Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	Share of investments in investee companies involved in the manufacture or selling of controversial weapons	0.00 % involvement	94.23 %

Eligibility: The proportion of the assets in the financial product (relative to NAV), which are in scope for the indicator.

Coverage: The proportion of the assets in the financial product (relative to NAV), where data is available to present the indicator.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is:
13 November 2024 -
31 December 2024

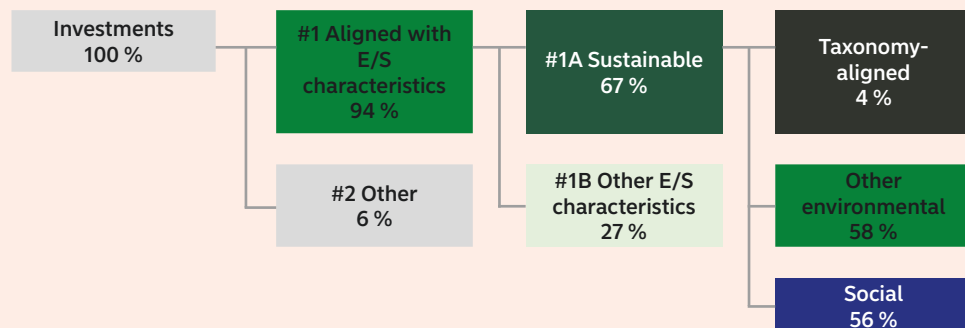

Largest investments	Sector	Assets	Country
Apple	Technology	8.77 %	United States
NVIDIA	Technology	8.30 %	United States
Microsoft	Technology	7.64 %	United States
Amazon.com	Communications	5.51 %	United States
Alphabet	Communications	5.18 %	United States
Broadcom	Technology	4.72 %	United States
Meta Platforms	Communications	4.19 %	United States
Tesla	Consumer, Cyclical	3.89 %	United States

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The product contains investments with both an environmental and a social objective. A single investment can both contribute to an environmental and a social objective resulting in a total allocation amounting to more than 100 per cent. There is no prioritisation of environmental and social objectives, and the strategy does not target any specific allocation or minimum proportion for either of these categories. The investment process accommodates the combination of environmental and social objectives by allowing the investment manager the flexibility to allocate between these based on availability and attractiveness of investment opportunities.

● *In which economic sectors were the investments made?*

Sector	Sub Sector	Assets
Basic Materials	Chemicals	0.91 %

Utilities	Electric	0.46 %
Sum		100.00 %

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

- **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?**

☐

Yes:

☐

In fossil gas

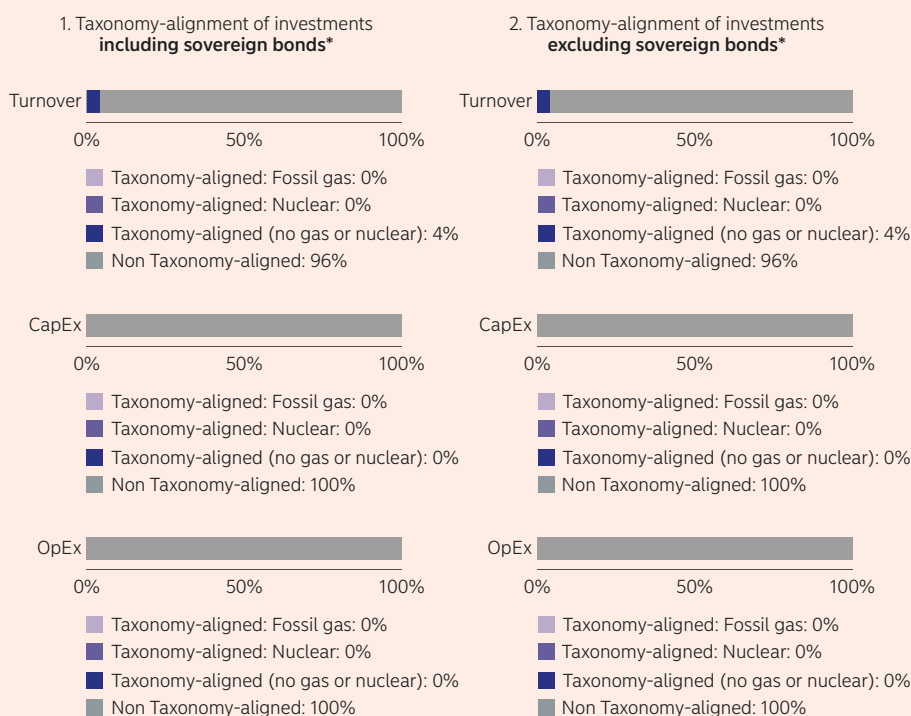

☐

In nuclear energy

☒

No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

There is no data available for the reporting period to confirm that the financial product invested in any fossil fuel gas and/or nuclear energy related activities that comply with the EU Taxonomy.

Assessment on Taxonomy alignment is currently conducted with data from third party providers as well as self-reported data from investee companies when available. Proprietary tools and processes to measure significant harm and minimum social safeguards have been developed.

The methodology applied by the third-party data providers assesses how companies are involved in economic activities that substantially contribute to an environmental objective while not significantly harming other sustainable objectives and meeting minimum social safeguards. Taxonomy-alignment of the investment is based on the percentage of turnover exposed or potentially exposed to taxonomy-aligned activities. Data providers' methodologies vary and results may not be fully aligned as long as publicly reported company data is still lacking and assessments rely largely on equivalent data.

We prioritise the use of self-reported data where available. Where data providers are used to deliver equivalent data, NAM has conducted due diligence on the data provider's methodology. Out of caution, unless we are able to confirm available data for the majority of the portfolio's holdings, we will report 0 (zero) per cent of Taxonomy-Aligned Investments.

The compliance of the investments with the EU Taxonomy has not been subject to an assurance by auditors or a review by third parties. Data provider methodologies vary and results may not be fully aligned as long as publicly reported data is still lacking.

● ***What was the share of investments made in transitional and enabling activities?***

Type of Activity	Assets
Transitional activities	0.12 %
Enabling activities	3.83 %
Sum	3.95 %

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 58 %.

What was the share of socially sustainable investments?

The share of socially sustainable investments was 56 %.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

Cash may have been held as ancillary liquidity or for risk balancing purposes. The fund may have used derivatives and other techniques for the purposes described in the “Fund Descriptions” in the prospectus. This category may also have included securities for which relevant data is not available. Minimum environmental or social safeguards were not applicable.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this fund have been monitored and documented on an ongoing basis.

How did this financial product perform compared to the reference benchmark?

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

ANNEX IV

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Nordea 2 - VAG Optimised Stable Return Fund

Legal entity identifier: 5493006IWMQPPIJ8CQ78

Environmental and/or social characteristics

Sustainable investment

means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

☒ ☒ ☐ Yes

☒ ☐ ☒ No

☐ It made **sustainable investments with an environmental objective:** ____%

☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It made **sustainable investments with a social objective:** ____%

☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 63 % of sustainable investments

☒ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☒ with a social objective

☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The E/S characteristics promoted could have been environmental and/or social and included the following features:

Minimum proportion of sustainable investments The fund promoted E/S characteristics by partially investing in companies and issuers involved in activities that contributed to an environmental or social objective as outlined in UN Sustainable Development Goals (SDGs) and/or the EU Taxonomy, while not significantly harming any other environmental or social objectives and following good governance practices.

Sector- and value-based exclusions The fund promoted E/S characteristics by excluding companies that were deemed to be inappropriate based on their business activities or corporate behaviour.

Nordea Asset Management's Paris-Aligned Fossil Fuel Policy The fund promoted E/S characteristics by refraining from investing in companies that had significant exposure to fossil fuels unless they had a credible transition strategy.

There was no reference benchmark designated for the purpose of attaining the E/S characteristics of the fund.

● How did the sustainability indicators perform?

Sustainability Indicator	Metric	Metric Value	Eligibility	Coverage
% of sustainable investments	% of sustainable investments	63.37 %	95.46 %	95.46 %
% of investments, aligned with the E/S characteristics, that do not comply with sector- and value based exclusions	% of investments, aligned with the E/S characteristics, that do not comply with sector- and value based exclusions	0.00 %	95.48 %	95.48 %
% of investments, aligned with the E/S characteristics, that do not comply with NAM's Paris-Aligned Fossil Fuel Policy	% of investments, aligned with the E/S characteristics, that do not comply with NAM's Paris-Aligned Fossil Fuel Policy	0.00 %	95.48 %	95.48 %

Eligibility: The proportion of the assets in the financial product (relative to NAV), which are in scope for the indicator.

Coverage: The proportion of the assets in the financial product (relative to NAV), where data is available to present the indicator.

● **...and compared to previous periods?**

Sustainability Indicator	Metric	Reference Period	Metric Value	Eligibility	Coverage

		2023	N/A	N/A	N/A
		2022	N/A	N/A	N/A

Eligibility: The proportion of the assets in the financial product (relative to NAV), which are in scope for the indicator.

Coverage: The proportion of the assets in the financial product (relative to NAV), where data is available to present the indicator.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The objective of the sustainable investments that the fund partially made, was to contribute to one or several of the UN SDGs or alternatively be involved in Taxonomy-aligned activities. Sustainable investments contributed to the objectives through the fund's investments in companies where a minimum of 20% of their activity could be linked to economic activities supporting an environmentally-sustainable objective defined in the EU Taxonomy, or an environmental or social objective belonging to the list of UN SDGs.

The UN SDGs are a set of 17 Sustainable Development Goals adopted by the United Nations in 2015 as a call for action to end poverty, protect the planet, and ensure peace and prosperity by 2030.

The EU Taxonomy provides a framework for assessment of environmentally sustainable economic activities and lists economic activities that are considered environmentally sustainable in the context of the European Green Deal.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

As part of the process to identify sustainable investments, companies were screened to ensure that they did not significantly harm (DNSH test) any other social or environmental objectives. The DNSH test used PAI indicators, as described below, to identify and exclude companies that do not pass the thresholds.

- How were the indicators for adverse impacts on sustainability factors taken into account?

The DNSH test, as part of the methodology to identify sustainable investments, identified negative outliers and poor performance related to PAI indicators. The investment manager considered the PAI indicators from Table 1, annex 1 in the SFDR RTS. In the reporting period, data was mainly available for the use of the below indicators.

Climate and other environment related indicators:

- Greenhouse Gas emissions
- Biodiversity impact
- Emissions to water
- Hazardous waste

Indicators for social and employee, respect for human rights, anti-corruption and anti-bribery matters:

- Violations of the UNGC and OECD principles
- Board gender diversity
- Exposure to controversial weapons
- Severe human rights issues and incidents

Companies that did not pass the thresholds that were defined by the investment manager, did not qualify as a sustainable investment. This included companies that were involved in severe human rights incidents, severe controversies related to biodiversity or violations of the UNGC and OECD principles.

Companies also failed the DNSH test if they were among the worst performers on emissions to water, hazardous waste or Greenhouse Gas emissions. In addition, companies that derived more than 0% of revenue from unconventional fossil fuel failed the DNSH test, and companies that derived more than 5% from conventional fossil fuel or more than 50% from services specific to the fossil fuel industry only passed the DNSH test if they were below the climate related exclusions criteria of the EU Paris Aligned Benchmark with revenue thresholds of 1% for coal, 10% for oil, 50% for natural gas and 50% for fossil fuel based electricity generation, and had a climate transition plan. Our Paris Aligned Fossil Fuel Policy describes the criteria used to identify companies with credible transition plans.

Additional exclusions to further limit negative externalities were applied to the investment universe of the fund, to avoid investment in companies that were involved in thermal coal or production of fossil fuels from oil sands and arctic drilling, as well as controversial weapons, and pornography.

The data on PAI indicators needed for the DNSH test was sourced from third party data providers.

- Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Alignment of the sustainable investments with the OECD guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights was confirmed as part of the process to identify sustainable investments using the Violations of the UNGC and OECD principles indicator.

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the fund that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this fund do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The specific PAI indicators that were taken into consideration for this fund were:

CLIMATE AND OTHER ENVIRONMENT-RELATED INDICATORS

Adverse Sustainability Indicator		Metric	Metric Value	Eligibility	Coverage
Greenhouse gas "GHG" emissions	GHG emissions	Scope 1 GHG emissions	2,618 tCO2e	91.69 %	91.46 %
		Scope 2 GHG emissions	1,077 tCO2e	91.69 %	91.46 %

CLIMATE AND OTHER ENVIRONMENT-RELATED INDICATORS

Adverse Sustainability Indicator	Metric	Metric Value	Eligibility	Coverage
Greenhouse gas "GHG" emissions	Energy consumption intensity per high impact climate sector	Agriculture forestry and fishing (A)	0.00 GWh / m€ of revenue	0.00 %
		Mining and quarrying (B)	0.00 GWh / m€ of revenue	0.00 %
		Manufacturing (C)	0.26 GWh / m€ of revenue	28.21 %
		Electricity gas steam and air conditioning supply (D)	3.77 GWh / m€ of revenue	2.75 %
		Water supply sewerage waste management and remediation activities (E)	0.54 GWh / m€ of revenue	0.70 %
		Construction (F)	0.15 GWh / m€ of revenue	1.18 %
		Wholesale and retail trade repair of motor vehicles and motorcycles (G)	0.07 GWh / m€ of revenue	7.53 %
		Transportation and storage (H)	0.00 GWh / m€ of revenue	0.21 %
		Real estate activities (L)	0.00 GWh / m€ of revenue	0.00 %
Biodiversity	Activities negatively affecting biodiversity-sensitive areas	Share of investments in investee companies with sites/operations located in or near to biodiversity-sensitive areas	2.76 % with negative impact	91.69 %
Water	Emissions to water	Tonnes of emissions to water generated by investee companies per million EUR invested, expressed as a weighted average	0.01 tons / m€ invested	91.69 %
Waste	Hazardous waste and radioactive waste ratio	Tonnes of hazardous waste and radioactive waste generated by investee companies per million EUR invested, expressed as a weighted average	0.47 tons / m€ invested	91.69 %

**SOCIAL AND EMPLOYEE, RESPECT FOR HUMAN RIGHTS, ANTI-CORRUPTION
AND ANTI-BRIBERY MATTERS**

Adverse Sustainability Indicator	Metric	Metric Value	Eligibility	Coverage	
Social and employee matters	Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises	2.74 % involved in violations	91.69 %	91.64 %
	Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	Share of investments in investee companies without policies to monitor compliance with the UNGC principles or OECD Guidelines for Multinational Enterprises or grievance / complaints handling mechanisms to address violations of the UNGC principles or OECD Guidelines for Multinational Enterprises	0.07 % without policies	91.69 %	91.21 %
	Unadjusted gender pay gap	Average unadjusted gender pay gap of investee companies	8.13 % pay gap	91.69 %	53.22 %
	Board gender diversity	Average ratio of female to male board members in investee companies, expressed as a percentage of all board members	36.27 % (female directors / total directors)	91.69 %	90.02 %
	Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	Share of investments in investee companies involved in the manufacture or selling of controversial weapons	0.00 % involvement	91.69 %	90.58 %

INDICATORS APPLICABLE TO INVESTMENTS IN SOVEREIGNS AND SUPRANATIONAL

Adverse Sustainability Indicator	Metric	Metric Value	Eligibility	Coverage
Environmental	GHG Intensity for sovereigns	GHG intensity of investee countries	343.52 tCO ₂ e / m€ of GDP	3.80 %
Social	Investee countries subject to social violations	Number of investee countries subject to social violations (absolute number and relative number divided by all investee countries), as referred to in international treaties and conventions, United Nations principles and, where applicable, national law	0 investee countries subject to violations	3.80 %
			0.00 % investee countries subject to violations	3.64 %
Governance	Non-cooperative tax jurisdictions	Investments in jurisdictions on the EU list of non-cooperative jurisdictions for tax purposes	0.00 % investee countries subject to violations	3.80 %

Eligibility: The proportion of the assets in the financial product (relative to NAV), which are in scope for the indicator.

Coverage: The proportion of the assets in the financial product (relative to NAV), where data is available to present the indicator.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is:
1 January 2024 -
31 December 2024

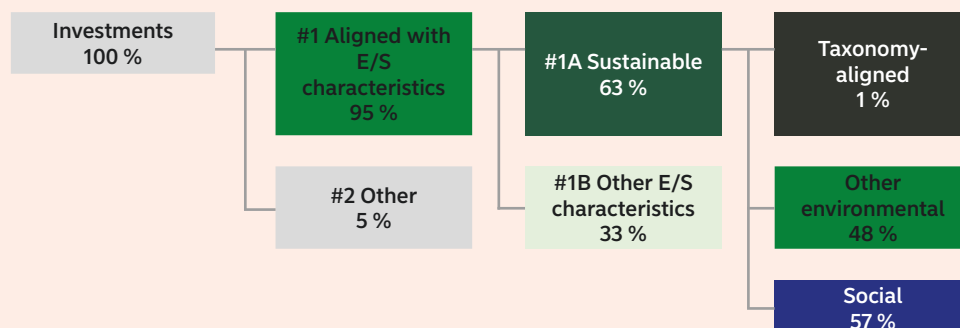

Largest investments	Sector	Assets	Country
Alphabet	Communications	4.44 %	United States
Microsoft	Technology	4.03 %	United States
Automatic Data Processing	Consumer, Non-cyclical	2.57 %	United States
Novo Nordisk B	Consumer, Non-cyclical	2.26 %	Denmark
Visa	Financial	2.17 %	United States
Coca-Cola	Consumer, Non-cyclical	2.16 %	United States
Johnson & Johnson	Consumer, Non-cyclical	1.98 %	United States
PepsiCo	Consumer, Non-cyclical	1.71 %	United States
Fortinet	Technology	1.68 %	United States
AutoZone	Consumer, Cyclical	1.67 %	United States
Mastercard	Financial	1.63 %	United States
Starbucks	Consumer, Cyclical	1.57 %	United States
Accenture	Technology	1.56 %	Ireland
Monster Beverage	Consumer, Non-cyclical	1.50 %	United States
NIKE	Consumer, Cyclical	1.49 %	United States

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The product contains investments with both an environmental and a social objective. A single investment can both contribute to an environmental and a social objective resulting in a total allocation amounting to more than 100 per cent. There is no prioritisation of environmental and social objectives, and the strategy does not target any specific allocation or minimum proportion for either of these categories. The investment process accommodates the combination of environmental and social objectives by allowing the investment manager the flexibility to allocate between these based on availability and attractiveness of investment opportunities.

● *In which economic sectors were the investments made?*

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

☒ Yes:

☐ In fossil gas

☒ In nuclear energy

☐ No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

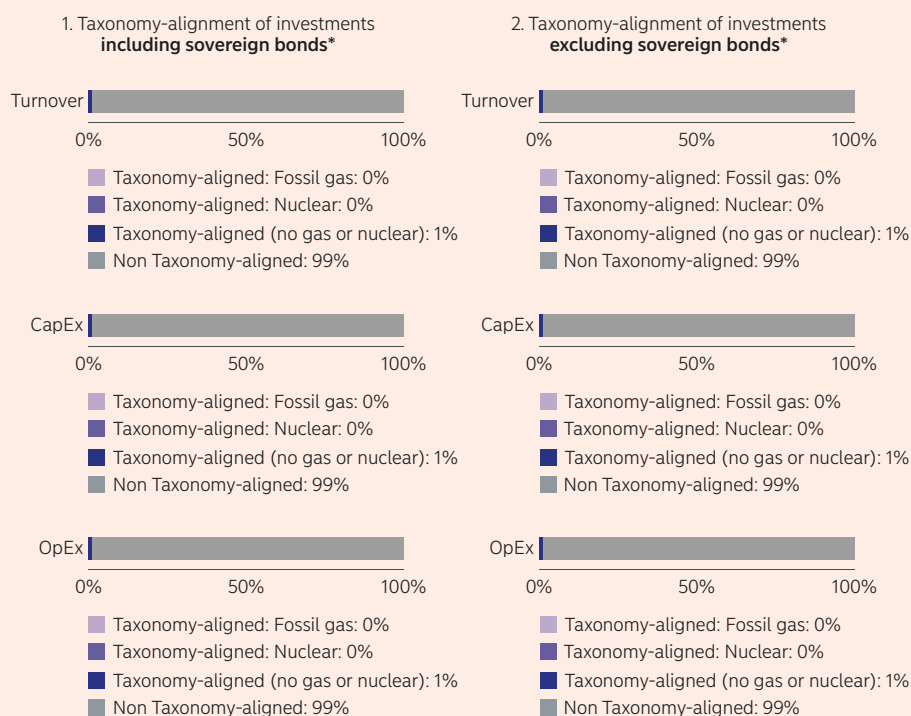

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

There is no data available for the reporting period to confirm that the financial product invested in any fossil fuel gas and/or nuclear energy related activities that comply with the EU Taxonomy.

Assessment on Taxonomy alignment is currently conducted with data from third party providers as well as self-reported data from investee companies when available. Proprietary tools and processes to measure significant harm and minimum social safeguards have been developed.

The methodology applied by the third-party data providers assesses how companies are involved in economic activities that substantially contribute to an environmental objective while not significantly harming other sustainable objectives and meeting minimum social safeguards. Taxonomy-alignment of the investment is based on the percentage of turnover exposed or potentially exposed to taxonomy-aligned activities. Data providers' methodologies vary and results may not be fully aligned as long as publicly reported company data is still lacking and assessments rely largely on equivalent data.

We prioritise the use of self-reported data where available. Where data providers are used to deliver equivalent data, NAM has conducted due diligence on the data provider's methodology. Out of caution, unless we are able to confirm available data for the majority of the portfolio's holdings, we will report 0 (zero) per cent of Taxonomy-Aligned Investments.

The compliance of the investments with the EU Taxonomy has not been subject to an assurance by auditors or a review by third parties. Data provider methodologies vary and results may not be fully aligned as long as publicly reported data is still lacking.

● ***What was the share of investments made in transitional and enabling activities?***

Type of Activity	Assets
Transitional activities	0.01 %
Enabling activities	0.52 %
Sum	0.52 %

● ***How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?***

Reference Period	Taxonomy-Aligned Investments
2024	1.42 %
2023	0.00 %
2022	0.00 %

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 48 %.

What was the share of socially sustainable investments?

The share of socially sustainable investments was 57 %.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

Cash may have been held as ancillary liquidity or for risk balancing purposes. The fund may have used derivatives and other techniques for the purposes described in the “Fund Descriptions” in the prospectus. This category may also have included securities for which relevant data is not available. Minimum environmental or social safeguards were not applicable.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this fund have been monitored and documented on an ongoing basis.

How did this financial product perform compared to the reference benchmark?

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.
